TECHNICAL DATA

Input voltage	: 220-230V 50Hz
Input consumption	: approx. 2530W
Fuse	: min. 16A slow
IR source	: 2X IRK 15020R
UVA source	: 4X HPA400/118mm
Ballast	: 2X 400W 2X 500W
Starter	: 4X SN58-spec.
Timer	: digital 30 mins
Cooling	: 1X fan floor part 3X fan tanning part
Radiation area	: 190 X 70 cm
Output (min) at 65 cm	: 5.6 mW/cm ² LMV 2.4 mW/cm ² HEBRU
Protecting goggles	: 2X HB072
Safety	: CENELEC insulation class 2 UV type 3
Weight	: approx. 42 kg
SAP Coding	: HB875

AS THE APPLIANCE IS HIGHLY SUSCEPTIBLE TO SCRATCHING, YOU SHOULD BE EXTRA CAREFUL DURING DISASSEMBLY.

TO PREVENT THE MULTI-CORE CABLES FROM GETTING DAMAGED AT THE HINGES, THEY MUST BE ASSEMBLED AND CLAMPED AT THE ORIGINAL PLACES.

DISASSEMBLY

AS THE APPLIANCE IS HIGHLY SUSCEPTIBLE TO SCRATCHING, YOU SHOULD BE EXTRA CAREFUL DURING DISASSEMBLY.

BY INTERCHANGING IT CAN BE FOUND OUT WHETHER A LAMP, BALLAST OR STARTER IS DEFECTIVE.

1. FLOOR PART (item 32)

- Remove the cord holders (item 26) and detach the cord clamps at the back.
- Remove the covers (item 27 and 34).
The cover on the flex side can only be removed last.

2. REMOTE CONTROL (item 36)

- Remove the cord holder and pull the connector loose.

3. WHEEL (item 46)

- Remove the covers (item 27,34).
- Remove the locking plate and the nearest frame screw.
- Push the shaft out of its clamping.

4. GAS SPRING (item 12)

- Remove the covers (item 27,34).
- Put the appliance in its highest operating position (to ensure that no pressure is exerted on the gas spring) and tighten the ornamental screw (item 24).
- Loosen the 10-core cable so that the cable can easily slide through the cable duct.
- Remove a retaining ring from the hinge shaft at A.
- Tilt the appliance carefully so that the radiation part rests on the floor.
- Support the floor part to remove the pressure from the hinge shaft.
- Remove the hinge shaft and lower the floor part onto the floor.
- Remove the 2 bearing bushes.
- Loosen the ornamental screw (item 24), slide the top part of the stand approx. 20 cm inwards and tighten the screw again.
- Remove the 2 screws from the upper part of the stand at B and pull this part loose from the hinge.
- After the shafts have been removed, the gas spring can be slid out of the stand.

5. HEIGHT ADJUSTMENT (item 25)

- Loosen the lower attachment of the gas spring in the manner described under 4.
- Remove the cord with its clamping by pressing the snap clamping on the inside.
- Remove the outer tube.
- Remove the 2 guide blocks and slide the clamping block from the inner tube.

6. HINGE WITH GAS SPRING (item 11)

- Remove the stand part in the manner described under 4 and 5.
- Remove the upper ornamental strips from the hinge part.
- Remove the cover (item 15) from the radiation part.
- Remove the cover from the connector compartment.
- Detach the 10-core cable.
- Remove the retaining ring from the locking shaft at C and push the shaft out of the stand.
- Remove the hinge part.

7. HPA LAMP (item 21) or IR LAMP (item 21A)

- Remove the glass filter from the lamp unit in question.
The lamp unit will continue to cling to the upper part.
- Remove the reflector clamps.
- Remove the reflector and take the lamp from the holder.

NB: When checking or replacing HPA lamps, pay attention to the following:

- a. HPA lamps only start burning when they have cooled down sufficiently.
- b. Never touch a lamp with your fingers. Clean the lamp with a cloth moistened with alcohol, if necessary.
- c. After assembly the glass filter should be free from finger prints and dust. Clean the glass filter with a cloth moistened with alcohol, if necessary.

8. COVER OUTER SECTION (item 17)

- Remove the cover (item 15) and the cover of the connector compartment.
- Detach the wires of the outer section.
- Support this section and remove the 3 fixing screws at D.

9. COVER INNER SECTION (item 1)

- Disassembly of the cover is not advisable, since the non-visible parts of the pivot can only be fitted with special tools.
For this reason, the cover is supplied as a whole with grip plate and wiring.
- Remove the centre glass filter and assemble it onto the new cover.
- Remove the outer sections (see under 8) and attach them to the inner section.
- Detach the wiring that runs through the tube of the stand.
- Remove the upper ornamental strips.
- Remove the retaining ring from the locking shaft at C and push the shaft out of the stand.
- Pull the inner section out of the stand.

ASSEMBLY

TO PREVENT THE MULTI-CORE CABLES FROM GETTING DAMAGED AT THE HINGES, THEY MUST BE ASSEMBLED AND CLAMPED AT THE ORIGINAL PLACES.
