LOCATION OF PCB BOARDS

VERSION VARIATION:

Type/Versions	LX700D /21S	LX700D /22S	LX700D /25S
Features & Board in used			
RDS function		X	X
Grid Switch	By software		
Line Cord (Detachable)	X	X	X
Line Cord (Fixed)			
AC Voltage (110V~127V / 220~240V)	X		
AC Voltage (220V~240V)		X	X
AC Voltage Selector	X		

SPECIFICATIONS

AMPLIFIER SECTION

Power Output	
- Stereo mode (DIN).....	2 x 50 W
- Surround mode (1 kHz).....	50 W RMS/channel
Total Harmonic Distortion.....	10 % at rated power (1 kHz)
Frequency Response	180 Hz-14 kHz/ 1 dB
Signal-to-Noise Ratio.....	>65dB(CCIR)
Input Sensitivity.....	400 mV

TUNER SECTION

Tuning Range.....	FM 87.5 -108 MHz
.....	MW 531 - 1602 kHz (9kHz steps)
	/22S/25S
.....	MW 530 - 1700 kHz (10kHz steps)
	/21S
26 dB Quieting Sensitivity.....	FM 20 dB
26 dB Quieting Sensitivity.....	MW3260uV/m
Image Rejection Ratio.....	FM 25 dB
.....	MW28dB
IF Rejection Ratio.....	FM 60 dB
.....	MW24 dB
Signal-to-Noise Ratio.....	FM 55 dB
.....	MW35 dB
AM Suppression Ratio.....	FM 30 dB
Harmonic Distortion.....	FM Mono 3%
.....	FM Stereo 3%
.....	MW5%
Frequency Response.....	FM 180 Hz-10kHz/ 6 dB
Stereo Separation.....	FM 26 dB(1 kHz)
Stereo threshold.....	FM 23.5 dB

MISCELLANEOUS / GENERAL SECTION

Power Supply Rating.....	220~240V/50Hz
	/22S/25S
.....	110~127V/220~240V, 50/60Hz
	/21S
Power Consumption.....	160 W
Dimensions (w x h x d).....	435 mm x 58 mm x 362mm
Weight.....	4.2 kg

IR REMOTE CONTROL

Effective Range.....	>8 Meter
Number of Keys.....	45
Battery (1.5V).....	AA x 2

SPEAKERS

Front Speakers / Surround speaker

System.....	2-way shielded
Impedance/ohm.....	8Ω
Speaker drivers.....	3" woofer, flat tw
Dimensions (w x h x d).....	89 mm x 270 mm x 41 mm
Weight.....	0.40 Kg

Center Speaker

System.....	2-way shielded
Impedance/ohm.....	8Ω
Speaker drivers.....	3" woofer, flat tw
Dimensions (w x h x d).....	286 mm x 95 mm x 67 mm
Weight.....	0.88 Kg

SUBWOOFER

Subwoofer (not magnetically shielded design).....	6.5"
Input power.....	100W (8Ω, DIN)
Dimensions (w x h x d).....	195 mm x 462 mm x 263 mm
Weight.....	5.5 Kg

MEASUREMENT SETUP

SERVICE AIDS

Service Tools:

Universal Torx driver holder	4822 395 91019
Torx bit T10 150mm	4822 395 50456
Torx driver set T6-T20	4822 395 50145
Torx driver T10 extended	4822 395 50423

Compact Disc:

SBC426/426A Test disc 5 + 5A	4822 397 30096
SBC442 Audio Burn-in test disc 1kHz	4822 397 30155
SBC429 Audio Signals disc	4822 397 30184
Dolby Pro-logic Test Disc	4822 395 10216

ESD Equipment:

Anti-static table mat - large 1200x650x1.25mm	4822 466 10953
anti-static table mat - small 600x650x1.25mm	4822 466 10958
Anti-static wristband	4822 395 10223
Connectorbox (1MΩ)	4822 395 11307
Extension cable (to connect wristband to conn.box)	4822 320 11305
Connecting cable (to connect table mat to conn.box)	4822 320 11306
Earth cable (to Connect product to mat or box)	4822 320 11308
Complete kit ESD3 (combining all above products)	4822 320 10671
Wristband tester	4822 344 13999

HANDLING CHIP COMPONENTS

GB

WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance.

Keep components and tools also at this potential.

ESD

NL

WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD).

Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.

Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

F

ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD).

Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.

Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité.

Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

D

WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).

Unsorgfältige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren.

Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes.

Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

I

AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD).

La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cauzione alla loro manipolazione.

Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza.

Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

GB

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used.

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

NL

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

F

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

D

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Original zustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

I

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

"After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA."

Connections

IMPORTANT!

- Before connecting the AC power cord to the wall outlet, ensure that all other connections have been made.
- Never make or change any connections with the power switched on.
- The type plate is located at the rear of the system.

Before connecting the speakers:

- Mount the speakers onto the mini speaker stands as shown in the illustration.
- Remove the protective cover only after the connection and installation of speakers are completed.

Connect the supplied speaker system using the supplied speaker cable by matching the colors of the jacks and speaker cable.

Notes:

- Check the speaker cables are correctly connected. Improper connections may damage the system due to short-circuit.
- For optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of +/- speaker jacks.
- Do not connect speakers with impedance lower than the speakers supplied. Please refer to the SPECIFICATION section of this manual.

Speakers		
Front Left (L)	black	white
Front Right (R)	black	red
Center	black	green
Surround (Rear) Left (L)	black	blue
Surround (Rear) Right (R)	black	grey
Passive Subwoofer	black	purple

Connections

Connecting antennas

MW Indoor Loop Antenna

Connect the supplied MW loop antenna to the **MW** jack. Position the loop antenna to receive the clearest sound.

FM Indoor Antenna

Connect the supplied FM antenna to the **FM** jack. Move the antenna in various directions until the clearest signal is received.

Note:

– Keep the antenna as far away as possible from the TV, VCR or any radiation source to prevent unwanted noise.

FM Outdoor Antenna

For better FM reception, use a 75 ohm coaxial cable (not supplied) to connect the system to an outdoor FM antenna as shown.

Connecting from a DVD and additional components

To listen to playback from your **DVD** or **SACD** player.

Option 1

6 CHANNEL-DVD/SACD IN

Use the supplied audio cables to connect the **6 CHANNEL-DVD/SACD IN** jacks to the corresponding Multichannel **AUDIO OUT** on your **DVD** or **SACD** player.

About 6 CHANNEL-DVD/SACD IN

The **6 CHANNEL-DVD/SACD IN** can be used to connect from a device with a built-in multichannel decoder (e.g. Dolby, Digital, DTS, etc) and 6-channel output, i.e. a high end **DVD/SACD** player.

When using the **6 CHANNEL-DVD/SACD IN** audio input, the Receiver works as a multichannel amplifier. The source reproduces surround sound and sends it to the Receiver divided into the necessary channels. Therefore the **SURROUND** button has no effect since the provided signal is already multichannel.

From a source which is connected to the **6 CHANNEL-DVD/SACD IN**, audio input cannot be recorded.

OR

Option 2

DIGITAL IN

Connect the **OPTICAL** or **COAXIAL** jack to the **DIGITAL OUT** jack on the **DVD** or **SACD** player. You will need to set the Receiver's digital input to the jack you connected to (refer to "System Setup - Digital Input")

Connecting additional components

For listening to the playback from other audio/ visual devices through the Receiver

- Connect the **AUDIO IN (TV/AV or AUX)** jacks to the **AUDIO OUT** jacks on the **TV, VCR** or other audio/visual device.

AND/OR

- Connect the **DIGITAL IN (OPTICAL or COAXIAL)** jack to the **DIGITAL OUT** jack on other audio/ visual device. You will need to set the Receiver's digital input to the jack you connected to (refer to "System Setup - Digital Input").

For recording to an external recording device

- Connect the **AUDIO OUT** jacks to the **AUDIO IN** jacks on an analog recording device.

AND/OR

- Connect the **DIGITAL OUT** jack to the **DIGITAL IN** jack on a digital recording device. You can only make a digital recording from digital signal received from the **DIGITAL IN** jack on this receiver.

Connections

Notes:

- If the audio format of the digital input does not match the capabilities of your Receiver, it will produce a strong distorted sound or no sound at all
- Always refer to the instruction manual of the connected equipment to make an optimal connection

Recording from the digital output

It is possible to connect a digital recorder to the digital output of the receiver. In this way, all signals coming from the digital inputs can be recorded directly on the connected audio recorder.

The receiver can be used to record digital sound audio signal from DVD to CD-R.

Notes:

- Dolby Digital, DTS or MPEG signal are not possible to record from this receiver.
- Digital recording is not possible when the digital source material is copy-protected.

Inserting batteries into the remote control

- Open the battery compartment.
- Place the batteries in the compartment with the correct polarity as indicated by '+' and '-' symbols.
- Close the cover.

CAUTION!

- Remove batteries if they are exhausted or will not be used for a long time.
- Do not use old and new or different types of batteries in combination.
- Batteries contain chemical substances, so they should be disposed off properly.

Setting up the surround sound system

You must connect all the speakers and set up the system properly in order to enjoy the Digital Cinema experience at home (refer to "Connections - Connecting the speakers"). You will have the feeling of being in the middle of the action because sound is coming from everywhere around you. The subwoofer can enhance the bass performance of your system dramatically.

IMPORTANT!

Please sit at your usual listening position in order to set up the speaker balance correctly.

Placing the speakers

To obtain the best surround effect, place the speaker as follows.

Preparations

- 1 Place the front left and right speakers at equal distances from the TV and at an angle of approximately 45 degrees from the listening position.
- 2 Place the center speaker above or below the TV, so the center channel's sound is localized.
- 3 Place the surround speakers at normal listening ear level facing each other or mounted on the wall.
- 4 Place the subwoofer on the floor near to the TV.

Notes:

- To avoid magnetic interference, do not position the front speakers too close to your TV.
- If the rear surround speakers are installed farther away from the listening position than the front and center speakers, it will weaken the surround effect.
- All speakers should be securely installed to prevent accidents and improve sound quality.

Switching on the system

- 1 After completing all the connections, connect the AC power cord of the Receiver to the wall outlet. The system will go into STANDBY mode.
- 2 Press **STANDBY ON** to switch on the last selected source.
- 3 Rotate the **SOURCE** button or press **TV/AV, DISC, TUNER** or **AUX** on the remote control to select the input source.
→ The selected source will be displayed.

Functional Overview

Front and Rear panels

① SURROUND

- to select multichannel surround (Dolby Digital, DTS, Dolby Pro Logic or Dolby Pro Logic II) or stereo sound effect.

② TUNING ▶◀ ▶▶

- to select the tuner frequency.

③ BASS

- to select bass adjustment mode.

④ TREBLE

- to select treble adjustment mode.

⑤ STANDBY ON ⏻

- to switch between power on and standby mode.

⑥ DISPLAY SCREEN

- shows the status of the system.

⑦ PROGRAM

- in Tuner mode, to program MW/FM stations.

⑧ SOURCE

- to select the desired source or external input source (TV/AV, DISC DI, DISC 6CH, TUNER or AUX).

⑨ VOLUME

- to adjust the master volume.

⑩ PHONE

- to connect headphones.

① DIGITAL OUT

- connect to the digital inputs of an external audio equipment.
- is active only when receiving input from DIGITAL IN (Coaxial or Optical).

② WOOFER LINE OUT

- connect to an active subwoofer (optional).

③ SPEAKERS

- connect to the front, center, surround and subwoofer speakers.

④ DVD/SACD IN

- connect from the 6 channel output of a DVD or SACD player.

⑤ AC POWER CORD

- connect to a standard AC outlet.

⑥ MW / FM

- connect to the MW loop antenna or FM antenna

⑦ DIGITAL IN

- connect from audio equipment with digital (Coaxial or Optical) audio output.

⑧ AUDIO IN (TV/AV, AUX)

- connect from the analog audio outputs of a TV or other equipment.

⑨ AUDIO OUT

- connect to the analog audio inputs of an external recording device or amplifier.

Caution: Do not touch the inner pins of the jacks on the rear panel. Electrostatic discharge may cause permanent damage to the unit.

Functional Overview

Remote control

Notes:

- The keys in the following list operate exclusively for this Receiver only.

① SOURCE

- to select the desired source (TV/AV, DISC, TUNER or AUX).

④ ◀▶

- Press ◀/▶ to select a preset radio station.

⑤ ◀◀ / ▶▶

- in Tuner mode, to tune to a lower or higher radio frequency.

⑧ SURROUND

- to select multichannel surround (Dolby Digital, DTS or Dolby ProLogic II) or stereo sound effect.

⑨ SOUND

- to select the various soundfield effects: CONCERT,

DRAMA, ACTION, SCI-FI, CLASSIC, JAZZ, ROCK or DIGITAL.

⑫ SUBW +/−

- to adjust the subwoofer's level.

⑬ REAR +/−

- to adjust the surround speakers' level.

⑭ CENTER +/−

- to adjust the center speaker's level.

⑮ TV +/−

- to adjust Philips's television volume level.

⑯ SLEEP

- to set the sleep (auto-off) timer function.

⑰ DIM

- to select different brightness for the display screen.

⑱ MUTE

- to interrupt or resume sound reproduction.

⑲ NIGHT (Dolby Digital mode only)

- to optimise the dynamics of the sound output.

⑳ VOL +/−

- to adjust the volume level.

㉑ Numeric Keypad (0-9)

- to enter the number of a preset radio station.

㉒ ⏻

- to switch to standby mode.

Notes:

The following keys only operate for a Philips DVD player. For details, please refer to a Philips DVD player instruction manual.

㉓ DISC - DVD MENU

- to enter or exit the disc contents menu.

㉔ SYSTEM - DVD MENU

- to enter or exit the system menu bar.

㉕ ► II

- to start or interrupt disc playback.

㉖ ■

- to stop playing the disc.

㉗ REPEAT

- to repeat chapter, track or disc.

㉘ REPEAT A-B

- to repeat a specific section on a disc.

㉙ RESUME

- to continue disc playback after an interruption.

㉚ OK

- to exit or confirm the selection.

Troubleshooting

WARNING!

Under no circumstances should you try to repair the system yourself, as this will invalidate the warranty. Do not open the system as there is a risk of electric shock.

If a fault occurs, first check the points listed below before taking the system for repair. If you are unable to solve a problem by following these hints, consult your dealer or service center.

Problem	Solution
No power.	<ul style="list-style-type: none"> – Check the connection to the AC power cord.
No sound or distorted sound from speakers	<ul style="list-style-type: none"> – Check the connection to the speakers. – Adjust the volume. – Select the source you wish to listen to. – If the muting is on, press the MUTE button. – Replace the speaker cables.
No sound is heard from center or rear speakers	<ul style="list-style-type: none"> – Check the connections to the speakers. – Use the CENTER +/- or REAR +/- to adjust the volume level. – Check the speaker settings are connect correctly.
No sound from subwoofer.	<ul style="list-style-type: none"> – Check the connections to the subwoofer. – Play the bass source.
Noise interference	<ul style="list-style-type: none"> – The unit is too close to a TV set or other electrical appliances, relocate the unit, or turn off other appliances.
Sound cuts off during listening to music	<ul style="list-style-type: none"> – The positive and negative speaker cords may have short-circuited. Turn off the power and check the speaker cords. – Turn off the power and turn it on again, then reduce the volume.
Sound from the left and right speaker is reversed	<ul style="list-style-type: none"> – Check that the left and right speakers are not positioned in reverse order. – Check the left and right speakers cables are not connected to the terminals in reverse order.
Considerable noise in radio broadcasts.	<ul style="list-style-type: none"> – Tune to the correct frequency. – Connect the antenna. – Route all connection cables away from the antenna terminals and wires. – Fully extend the FM wire antenna. Position for best reception and secure to a wall. – Connect an outdoor FM or MW antenna. – Adjust the direction and position for best reception. – Turn off the equipment causing the noise. – Place the antenna farther away from the equipment causing the noise.
The remote control does not function.	<ul style="list-style-type: none"> – Point the remote control at the remote sensor of the unit. – Reduce the distance to the Receiver. – Remove any possible obstacles. – Replace the batteries with new ones. – Check that the batteries are loaded correctly. – Insert the mains plug into an outlet and press the main unit STANDY ON \diamond button.
Can't set NIGHT mode	<ul style="list-style-type: none"> – Play a source with DOLBY DIGITAL 5.1 channel sound. – Select a source (OPTICAL or COAXIAL) connected by digital cable correctly.
The display is dark	<ul style="list-style-type: none"> – Press DIM again.
Low bass response	<ul style="list-style-type: none"> – Check all speakers for correct polarity.
Can't select DTS mode	<ul style="list-style-type: none"> – Check the source's sound output setting and turn on DTS output. – Play a source with DTS sound. – Select a OPTICAL or COAXIAL source connected by digital cable.

REPAIR INSTRUCTION

REPAIR INSTRUCTION

DISASSEMBLY INSTRUCTIONS

- 1) Loosen 9 screws and remove the Top Cover by lifting the rear portion upwards before sliding it out towards the rear.
 - 5 screws on the back
 - 2 screws each on the left & right side

- 2) Loosen 7 screws & lift up the top edge of Front Panel assembly to free some catches before sliding it out towards the front.
 - 4 screws on the bottom
 - 1 screw "A" on the inside as indicated in Figure 1.
 - 1 screw each on the left & right side

Figure 2

Dismantling of the Main Board

- 1) Loosen 6 screws "B" on the top of main board as shown in figure 1.
- 2) Loosen 9 screws "C" at the back panel as shown in figure 2.

Dismantling of the PowerBoard

- 1) Loosen 4 screws "d" on the top of power board as shown in figure 3.

Figure 1

PIN DESCRIPTION

Symbol	Pin Name	Functions
A _{MS} ¹ -A ₀	Address Inputs	To provide memory addresses. During Sector-Erase A _{MS} -A ₁₂ address lines will select the sector.
DQ ₇ -DQ ₀	Data Input/output	To output data during Read cycles and receive input data during Write cycles. Data is internally latched during a Write cycle. The outputs are in tri-state when OE# or CE# is high.
CE#	Chip Enable	To activate the device when CE# is low.
OE#	Output Enable	To gate the data output buffers.
WE#	Write Enable	To control the Write operations.
V _{DD}	Power Supply	To provide 5.0V supply (4.5-5.5V)
V _{SS}	Ground	
NC	No Connection	Unconnected pins.

1. A_{MS} = Most significant address
A_{MS} = A₁₆ for SST39SF010A, A₁₇ for SST39SF020A, and A₁₈ for SST39SF040
