Service Service Service

FC9014 /A /B

Philips Domestic Appliances and Personal Care

ServiceManual

PRODUCT INFORMATION

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down at this moment.

TECHNICAL INFORMATION

- Colour /A : Pistache /B : Crystal white

Maximum air displacement : 37 l/sec.
Maximum vacuum water column : 310 cm
Power consumption (IEC) 230 V : 1500 W
Duststorage capacity : 3 L
Type number dustbag : FC8021
Cord length (depends on version) : 7 metres

- Filter system : Paper dustbag

: Exhaust AFS air filter

: Motor inlet filter

- Dimensions of cleaner : 460 x 315 x 270 mm

- Dimensions of packaging : 595 x 395 x 295 mm

- Net weight : 5.88 kg - Gross weight : 9.135 kg

OPTIONAL (accessories)

FC8021 S-bagsFC8030 AFS-filterFC8031 HEPA Air Filter

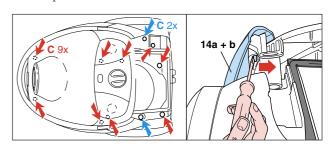

- FC8034 Upgrate kit Active Carbon Filter

FC8042 Polishing nozzleFC8043 Turbo brush nozzle

= changed

DISASSEMBLY- AND RE-ASSEMBLY ADVISE

- Open the appliance, first remove the exhaust filter grille (item 20), and then remove the 2 screws - C of the switch control panel (item 15).

- To remove the the panel, pos 14a + b must be removed by using a screwdriver to separate the two covers from the panel as shown in the picture.
- Undo and remove the 9 screws (T15) C in the upper housing (item 8). You will require a screwdriver with a 14.5 cm-long shank for this. Srewdriver 4322 009 08490 can be used.
- The component configuration shown in the exploded view may differ in case of specific versions. The components are distinguished by means of code numbers.
- When the repair is finished, check whether all functions of the appliance work properly.
- To disassemble the cord winder, use TORX screwdriver no. T10, which is one of a set consisting of T20; T15; T10; T9; T8; T7 and T6 (code number 4822 395 50145).

REPAIR INSTRUCTION

- Item 4, cotton dustbag, is used in countries in which paper dustbags are not available.
- If the reel half spring unit is replaced, shaft A must be lubricated with silicone grease. Do not apply any silicone grease to or spill any grease on terminals (43) or conductors (42).
- Item 40 is provided with a long cord-winder spring, but both long and short cords can be used in combination with this spring. (L = 9.3 m)
- Depending on the original cord, the spare cord must be shortened to the length of the original cord.
- The cord winder spring must be tensioned to the maximum level and then be rewound approx. 1.5 turn
- Item 13, air valve, opens to cool the motor if the air displacement is too low or if the airflow is blocked.
- If the function of the electronic control unit (item 12) is not required, the Triac must be short-circuited in the manner shown in the circuit diagram.
- When the vacuum cleaner is used to suck up fine dust the
 pores of the dustbag may become clogged, causing the
 passage of air through the dustbag to become obstructed.
 As a result, the dustbag-full indicator will indicate that the
 dustbag needs to be replaced, eventhough the dustbag is not
 full at all.

- Due to introduction of a **new switch** (item 11) **0320** onwards, which is not interchangable with the old switch soldered on the PCB (item 12).
- The switch lever assy (item 11a) is also modified.

To recognize the switches:

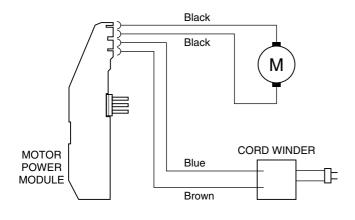

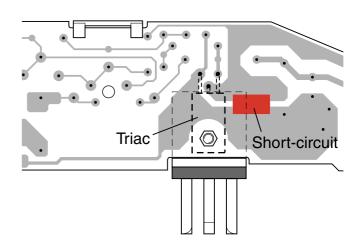

New spares are:

Switch soldered version - 4322 006 50600 Switch lever assy - 4322 009 08980
