## SAFETY PRECAUTIONS

**CAUTION**  
**RISK OF ELECTRIC SHOCK**  
**DO NOT OPEN**

**CAUTION:**  
**TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING:**  
**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

### DECLARATION OF CONFORMITY

We declare under our sole responsibility that this product, to which this declaration relates, is in conformity with the following standards: EN60065, EN55013, EN55020, EN61000-3-2 and EN61000-3-3. Following the provisions of 2006/95/EC and 2004/108/EC Directive.

### ÜBEREINSTIMMUNGSERKLÄRUNG

Wir erklären unter unserer Verantwortung, daß dieses Produkt, auf das sich diese Erklärung bezieht, den folgenden Standards entspricht: EN60065, EN55013, EN55020, EN61000-3-2 und EN61000-3-3. Entspricht den Verordnungen der Direktive 2006/95/EC und 2004/108/EC.

### DECLARATION DE CONFORMITE

Nous déclarons sous notre seule responsabilité que l'appareil, auquel se réfère cette déclaration, est conforme aux standards suivants: EN60065, EN55013, EN55020, EN61000-3-2 et EN61000-3-3. D'après les dispositions de la Directive 2006/95/EC et 2004/108/EC.

### DICHIARAZIONE DI CONFORMITÀ

Dichiariamo con piena responsabilità che questo prodotto, al quale la nostra dichiarazione si riferisce, è conforme alle seguenti normative: EN60065, EN55013, EN55020, EN61000-3-2 e EN61000-3-3. In conformità con le condizioni delle direttive 2006/95/EC e 2004/108/EC. QUESTO PRODOTTO E' CONFORME AL D.M. 28/08/95 N. 548

### DECLARACIÓN DE CONFORMIDAD

Declaramos bajo nuestra exclusiva responsabilidad que este producto al que hace referencia esta declaración, está conforme con los siguientes estándares: EN60065, EN55013, EN55020, EN61000-3-2 y EN61000-3-3. Siguiendo las provisiones de las Directivas 2006/95/EC y 2004/108/EC.

### EENVORMIGHEIDSVERKLARING

Wij verklaren uitsluitend op onze verantwoordelijkheid dat dit produkt, waarop deze verklaring betrekking heeft, in overeenstemming is met de volgende normen: EN60065, EN55013, EN55020, EN61000-3-2 en EN61000-3-3. Volgens de bepalingen van de Richtlijnen 2006/95/EC en 2004/108/EC.

### ÖVERENSSTÄMMELSESINTYG

Härmed intygas helt på eget ansvar att denna produkt, vilken detta intyg avser, uppfyller följande standarder: EN60065, EN55013, EN55020, EN61000-3-2 och EN61000-3-3. Enligt stadgarna i direktiv 2006/95/EC och 2004/108/EC.

## CAUTION:

To completely disconnect this product from the mains, disconnect the plug from the wall socket outlet.

The mains plug is used to completely interrupt the power supply to the unit and must be within easy access by the user.

## VORSICHT:

Um dieses Gerät vollständig von der Stromversorgung abzutrennen, ziehen Sie bitte den Stecker aus der Wandsteckdose.

Der Netzstecker wird verwendet, um die Stromversorgung zum Gerät völlig zu unterbrechen; er muss für den Benutzer gut und einfach zu erreichen sein.

## PRECAUTION:

Pour déconnecter complètement ce produit du courant secteur, débranchez la prise de la prise murale.

La prise secteur est utilisée pour couper complètement l'alimentation de l'appareil et l'utilisateur doit pouvoir y accéder facilement.

## ATTENZIONE:

Per scollegare completamente questo prodotto dalla rete di alimentazione elettrica, scollegare la spina dalla relativa presa a muro. La spina di rete viene utilizzata per interrompere completamente l'alimentazione all'unità e deve essere facilmente accessibile all'utente.

## PRECAUCIÓN:

Para desconectar completamente este producto de la alimentación eléctrica, desconecte el enchufe del enchufe de la pared.

El enchufe de la alimentación eléctrica se utiliza para interrumpir por completo el suministro de alimentación eléctrica a la unidad y debe de encontrarse en un lugar al que el usuario tenga fácil acceso.

## WAARSCHUWING:

Om de voeding van dit product volledig te onderbreken moet de stekker uit het stopcontact worden getrokken.

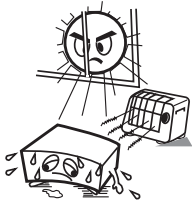

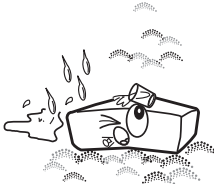

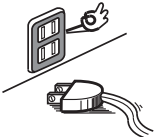

De netstekker wordt gebruikt om de stroomtoevoer naar het toestel volledig te onderbreken en moet voor de gebruiker gemakkelijk bereikbaar zijn.

## FÖRSIKTIHETSMÅTT:

Koppla loss stickproppen från eluttaget för att helt skilja produkten från nätet.

Stickproppen används för att helt bryta strömförsörjningen till apparaten, och den måste vara lättillgänglig för användaren.

# NOTE ON USE / HINWEISE ZUM GEBRAUCH / OBSERVATIONS RELATIVES A L'UTILISATION / NOTE SULL'USO / NOTAS SOBRE EL USO / ALVORENSTE GEBRUIKEN / OBSERVERA ANGÅENDE ANVÄNDNINGEN

 <ul style="list-style-type: none"> <li>• Avoid high temperatures. Allow for sufficient heat dispersion when installed in a rack.</li> <li>• Vermeiden Sie hohe Temperaturen. Beachten Sie, dass eine ausreichende Belüftung gewährleistet wird, wenn das Gerät auf ein Regal gestellt wird.</li> <li>• Eviter des températures élevées. Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère.</li> <li>• Evitate di esporre l'unità a temperature elevate. Assicuratevi che vi sia un'adeguata dispersione del calore quando installate l'unità in un mobile per componenti audio.</li> <li>• Evite altas temperaturas. Permite la suficiente dispersión del calor cuando está instalado en la consola.</li> <li>• Vermijd hoge temperaturen. Zorg er bij installatie in een audiorack voor, dat de door het toestel geproduceerde warmte goed kan worden afgevoerd.</li> <li>• Undvik höga temperaturer. Se till att det finns möjlighet till god värmeavledning vid montering i ett rack.</li> </ul>	 <ul style="list-style-type: none"> <li>• Keep the unit free from moisture, water, and dust.</li> <li>• Halten Sie das Gerät von Feuchtigkeit, Wasser und Staub fern.</li> <li>• Protéger l'appareil contre l'humidité, l'eau et la poussière.</li> <li>• Tenete l'unità lontana dall'umidità, dall'acqua e dalla polvere.</li> <li>• Mantenga el equipo libre de humedad, agua y polvo.</li> <li>• Laat geen vochtigheid, water of stof in het apparaat binnendringen.</li> <li>• Utsätt inte apparaten för fukt, vatten och damm.</li> </ul>	 <ul style="list-style-type: none"> <li>• Do not let foreign objects into the unit.</li> <li>• Lassen Sie keine fremden Gegenstände in das Gerät kommen.</li> <li>• Ne pas laisser des objets étrangers dans l'appareil.</li> <li>• Non inserite corpi estranei all'interno dell'unità.</li> <li>• No deje objetos extraños dentro del equipo.</li> <li>• Laat geen vreemde voorwerpen in dit apparaat vallen.</li> <li>• Se till att främmande föremål inte tränger in i apparaten.</li> </ul>	<p><b>CAUTION:</b></p> <ul style="list-style-type: none"> <li>• The ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, tablecloths, curtains, etc.</li> <li>• No naked flame sources, such as lighted candles, should be placed on the unit.</li> <li>• Observe and follow local regulations regarding battery disposal.</li> <li>• Do not expose the unit to dripping or splashing fluids.</li> <li>• Do not place objects filled with liquids, such as vases, on the unit.</li> </ul> <p><b>ACHTUNG:</b></p> <ul style="list-style-type: none"> <li>• Die Belüftung sollte auf keinen Fall durch das Abdecken der Belüftungsöffnungen durch Gegenstände wie beispielsweise Zeitungen, Tischtücher, Vorhänge o. #### A NOTE ABOUT RECYCLING:

This product's packaging materials are recyclable and can be reused. Please dispose of any materials in accordance with the local recycling regulations.

When discarding the unit, comply with local rules or regulations.

Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal.

This product and the supplied accessories, excluding the batteries, constitute the applicable product according to the WEEE directive.

#### HINWEIS ZUM RECYCLING:

Das Verpackungsmaterial dieses Produktes ist zum Recyceln geeignet und kann wieder verwendet werden. Bitte entsorgen Sie alle Materialien entsprechend der örtlichen Recycling-Vorschriften.

Beachten Sie bei der Entsorgung des Gerätes die örtlichen Vorschriften und Bestimmungen.

Die Batterien dürfen nicht in den Hausmüll geworfen oder verbrannt werden; bitte entsorgen Sie die Batterien gemäß der örtlichen Vorschriften.

Dieses Produkt und das im Lieferumfang enthaltene Zubehör (mit Ausnahme der Batterien!) entsprechen der WEEE-Direktive.

#### UNE REMARQUE CONCERNANT LE RECYCLAGE:

Les matériaux d'emballage de ce produit sont recyclables et peuvent être réutilisés. Veuillez disposer des matériaux conformément aux lois sur le recyclage en vigueur.

Lorsque vous mettez cet appareil au rebut, respectez les lois ou réglementations en vigueur.

Les piles ne doivent jamais être jetées ou incinérées, mais mises au rebut conformément aux lois en vigueur sur la mise au rebut des piles.

Ce produit et les accessoires inclus, à l'exception des piles, sont des produits conformes à la directive DEEE.

#### NOTA RELATIVA AL RICICLAGGIO:

I materiali di imballaggio di questo prodotto sono riutilizzabili e riciclabili. Smaltire i materiali conformemente alle normative locali sul riciclaggio.

Per lo smaltimento dell'unità, osservare le normative o le leggi locali in vigore.

Non gettare le batterie, né incenerirle, ma smaltirle conformemente alla normativa locale sui rifiuti chimici.

Questo prodotto e gli accessori inclusi nell'imballaggio sono applicabili alla direttiva RAEE, ad eccezione delle batterie.

#### ACERCA DEL RECICLAJE:

Los materiales de embalaje de este producto son reciclables y se pueden volver a utilizar. Disponga de estos materiales siguiendo los reglamentos de reciclaje de su localidad.

Cuando se deshaga de la unidad, cumpla con las reglas o reglamentos locales.

Las pilas nunca deberán tirarse ni incinerarse. Deberá disponer de ellas siguiendo los reglamentos de su localidad relacionados con los desperdicios químicos.

Este producto junto con los accesorios empaquetados es el producto aplicable a la directiva RAEE excepto pilas.

#### EEN AANTEKENING MET BETREKKING TOT DE RECYCLING:

Het inpakmateriaal van dit product is recycleerbaar en kan opnieuw gebruikt worden. Er wordt verzocht om zich van elk afvalmateriaal te ontdoen volgens de plaatselijke voorschriften.

Volg voor het wegdoen van de speler de voorschriften voor de verwijdering van wit- en bruingoed op.

Batterijen mogen nooit worden weggegooid of verbrand, maar moeten volgens de plaatselijke voorschriften betreffende chemisch afval worden verwijderd.

Op dit product en de meegeleverde accessoires, m.u.v. de batterijen is de richtlijn voor afgedankte elektrische en elektronische apparaten (WEEE) van toepassing.

#### OBSERVERA ANGÅENDE ÅTERVINNING:

Produktens emballage är återvinningsbart och kan återanvändas. Kassera det enligt lokala återvinningsbestämmelser.

När du kasserar enheten ska du göra det i överensstämmelse med lokala regler och bestämmelser.

Batterier får absolut inte kastas i soporna eller brännas. Kassera dem enligt lokala bestämmelser för kemiskt avfall.

Denna apparat och de tillbehör som levereras med den uppfyller gällande WEEE-direktiv, med undantag av batterierna.

## Getting Started

Thank you for purchasing this DENON product. To ensure proper operation, please read these owner's manual carefully before using the product.

After reading them, be sure to keep them for future reference.

## Accessories

Check that the following parts are supplied with the product.

① Owner's manual	1
② Service station list	1
③ Power cord (Cord length: Approx. 1.5 m)	1
④ Main remote control (RC-1068)	1
⑤ LR6/AA batteries (for RC-1068)	2
⑥ Sub remote control (RC-1070)	1
⑦ R03/AAA batteries (for RC-1070)	2
⑧ FM indoor antenna	1
⑨ AM loop antenna	1
⑩ Setup microphone (Cord length: Approx. 7.6 m)	1

## Cautions on Handling

### • Before turning the power switch on

Check once again that all connections are correct and that there are no problems with the connection cables.

- Power is supplied to some of the circuitry even when the unit is set to the standby mode. When traveling or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

### • About condensation

If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

### • Cautions on using mobile phones

Using a mobile phone near this unit may result in noise. If so, move the mobile phone away from this unit when it is in use.

### • Moving the unit

Turn off the power and unplug the power cord from the power outlet.

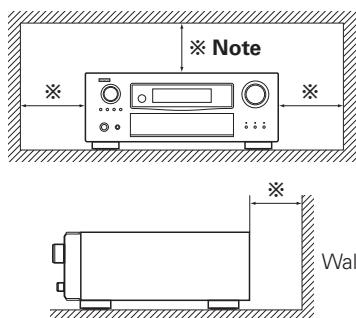

Next, disconnect the connection cables to other system units before moving the unit.

- Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.

## Cautions on Installation

### Note:

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.

## About the Remote Control Unit

In addition to the AVR-3808, the included main remote control unit (RC-1068) can also be used to operate the equipment listed below.

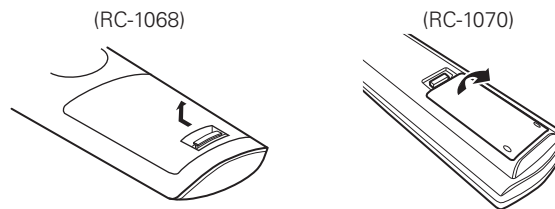

### ① DENON system components

### ② Non-DENON system components

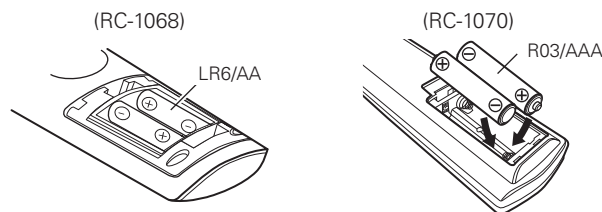

- By setting the preset memory (page 60 ~ 62)
- By using the learn function (page 63)

## Inserting the Batteries

### ① Lift the clasp and remove the rear lid.

### ② Load the two batteries properly as indicated by the marks in the battery compartment.

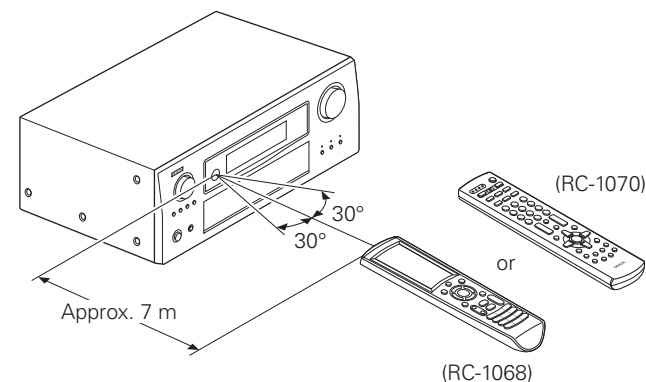

### ③ Put the rear cover back on.

## NOTE

- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit.
- The supplied batteries are only for verifying operation.
- When inserting the batteries, be sure to do so in the proper direction, following the “⊕” and “⊖” marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- When replacing the batteries, have the new batteries ready and insert them as quickly as possible.

## Operating Range of the Remote Control Unit

Point the remote control unit at the remote sensor when operating it.

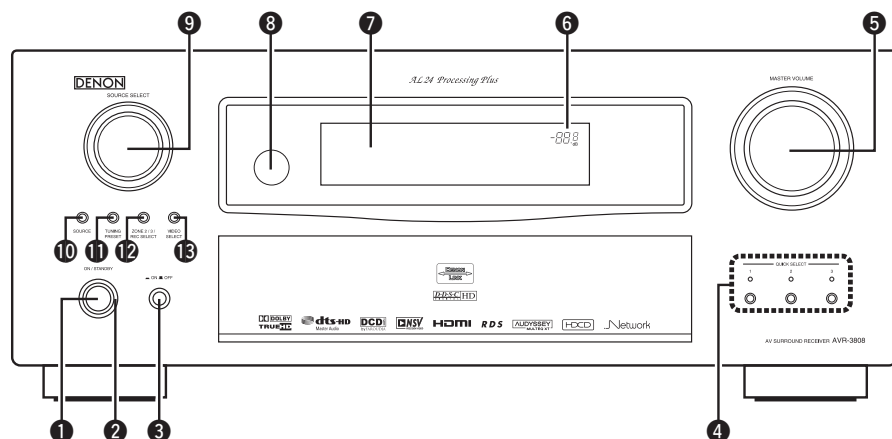

## NOTE

The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

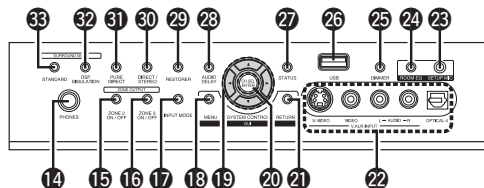

## Part Names and Functions

For buttons not explained here, see the page indicated in parentheses ( ).

### Front Panel

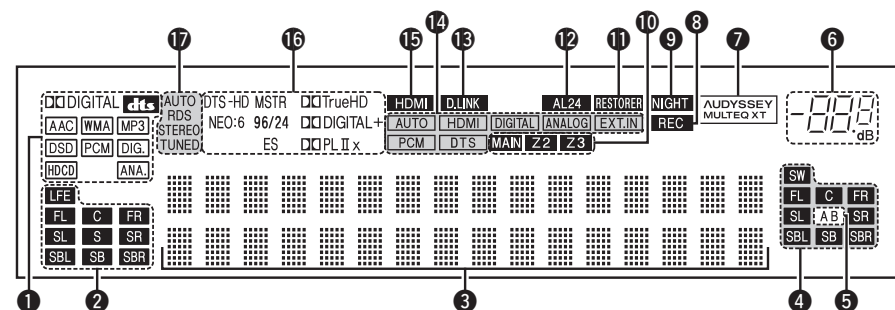

### [With the door open]

- 1 Power operation button (ON/STANDBY) ..... (47)

### Display

- 1 Input signal indicators
- 2 Input signal channel indicators  
These light when digital signals are input.
- 3 Information display  
The input source name, surround mode, setting values and other information are displayed here.
- 4 Output signal channel indicators
- 5 Surround speaker indicators  
These light according to the settings of the surround A and B speakers.
- 6 Master volume indicator
- 7 AUDYSSEY MULTEQ XT indicator  
This lights when the room equalizer is selected.
- 8 Recording output source indicator  
This lights when the REC OUT mode is selected.
- 9 NIGHT indicator  
This lights when the night mode is selected.
- 10 Multi-zone indicators  
These light when the power for the respective zone is turned on.
- 11 RESTORER indicator  
This lights when the RESTORER mode is selected.
- 12 AL24 indicator  
This lights when AL24 Processing Plus is activated (page 75).
- 13 D.LINK indicator  
This lights when playing using DENON LINK connections.
- 14 Input mode indicators
- 15 HDMI indicator  
This lights when playing using HDMI connections.
- 16 Decoder indicators  
These light when the respective decoders are operating.
- 17 Tuner reception mode indicators  
These light according to the reception conditions when the input source is set to "TUNER".
  - AUTO  
These light when in the auto tuning mode.
  - RDS  
This lights when receiving RDS broadcasts.
  - STEREO  
In the FM mode, these light when receiving analog stereo broadcasts.
  - TUNED  
Lights when the broadcast is properly tuned in.

- 25 Master volume control buttons (VOL) ..... (47)
- 26 Muting button (MUTE) ..... (47, 72)
- 27 Main remote control unit setup button (RC SETUP) ..... (60)

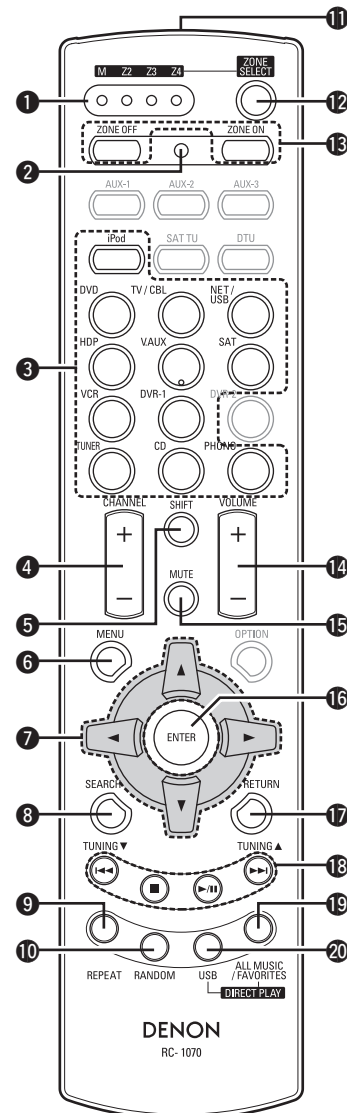

The time for which the backlight stays on can be changed (page 65 "Setting the Time the Backlight Stays Lit").

**NOTE**

- The **M. SEL**, **SAT TU**, **DTU** buttons cannot be used.
- The ZONE2 mode **QUICK SELECT (1 ~ 3)**, **A.DL**, **RSTR**, **NGT**, **INPUT**, **SPKR**, **TEST** and surround mode buttons cannot be used.
- The ZONE4 mode cannot be used.

## Sub remote control unit (RC-1070)

- 1 ZONE indicators ..... (68)
- 2 Advanced setup button ..... (68)
- 3 Input source select buttons ..... (37)
- 4 CHANNEL buttons ..... (48)
- 5 SHIFT button ..... (48)
- 6 MENU button ..... (23)
- 7 Cursor buttons ( $\Delta \nabla \triangleleft \triangleright$ ) ..... (23)
- 8 SEARCH button ..... (49)
- 9 REPEAT button ..... (52)
- 10 RANDOM button ..... (52)
- 11 Remote control signal transmitter ..... (3)
- 12 ZONE SELECT button ..... (68)
- 13 Zone power on/off buttons (ZONE ON / ZONE OFF) ..... (72)
- 14 Master volume control buttons (VOLUME) ..... (66, 67)
- 15 Muting button (MUTE) ..... (47, 72)
- 16 ENTER button ..... (23)
- 17 RETURN button ..... (23)
- 18 System buttons ..... (48, 66, 67)
- 19 ALL MUSIC/FAVORITES (DIRECT PLAY) button ..... (66)
- 20 USB (DIRECT PLAY) button ..... (66)

**NOTE**

The **AUX-1**, **AUX-2**, **AUX-3**, **SAT TU**, **DTU**, **DVR-2** and **OPTION** buttons cannot be used.

# Connections

Connections for all compatible audio and video signal formats are described in these operating instructions. Please select the types of connections suited for the equipment you are connecting. With some types of connections, certain settings must be made on the AVR-3808. For details, refer to the instructions for the respective connection items below.

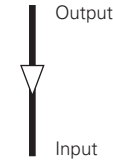

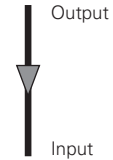

## NOTE

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

## Preparations

### Cables Used for Connections

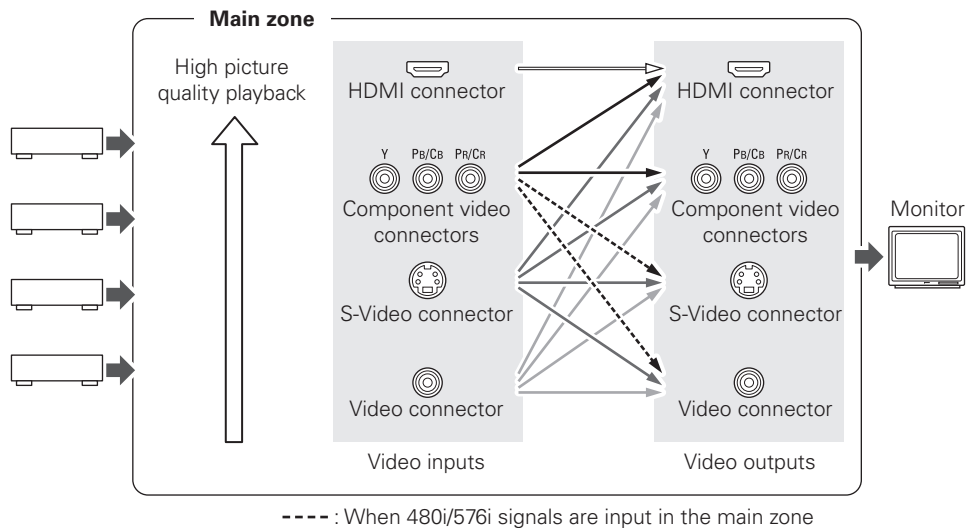

Select the cables according to the equipment being connected.

Audio cables	Video cables
<b>Coaxial digital connections</b> (Orange)    Coaxial digital (75 Ω/ohms pin-plug) cable	<b>Component video connections</b> (Green)    (Y) (Blue)    (PB/CB) (Red)    (PR/CR) Component video cable
<b>Optical digital connections</b>    Optical cable	<b>S-Video connections</b>    S-Video cable
<b>Analog connections (stereo)</b> (White)    (L) (Red)    (R) Stereo pin-plug cable	<b>Video connections</b> (Yellow)    75 Ω/ohms pin-plug video cable
Audio and video cables	
<b>HDMI connections</b>    19-pin HDMI cable	
Signal direction	
Audio signal:   Video signal:  	

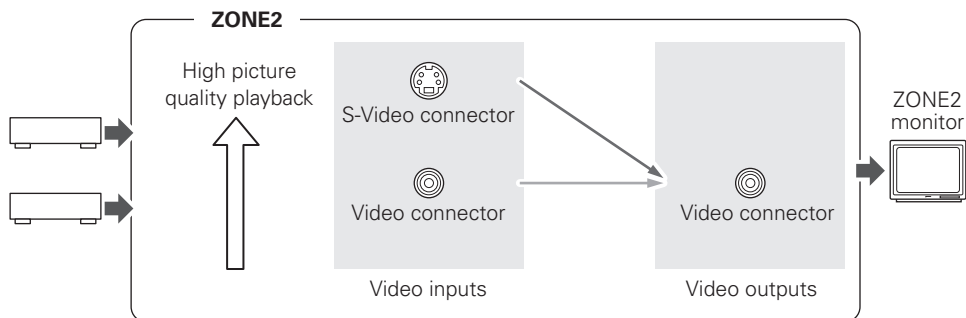

## Video Conversion Function

- This function automatically converts various formats of video signals input to the AVR-3808 into the format used to output the video signals from the AVR-3808 to a monitor.
- The AVR-3808's video input/output circuitry is compatible with the following four types of video signals:  
Digital video signals: HDMI  
Analog video signals: Component video, S-Video and Video

### [Flow of video signals inside the AVR-3808]

### [Flow of video signals for ZONE2]

- When not using this function, connect a monitor output with the same type of connector as the video input connector.
- The resolution of the HDMI input-compatible monitor connected to the AVR-3808 can be checked at GUI menu "Information" – "HDMI Information" – "Monitor" (page 46).

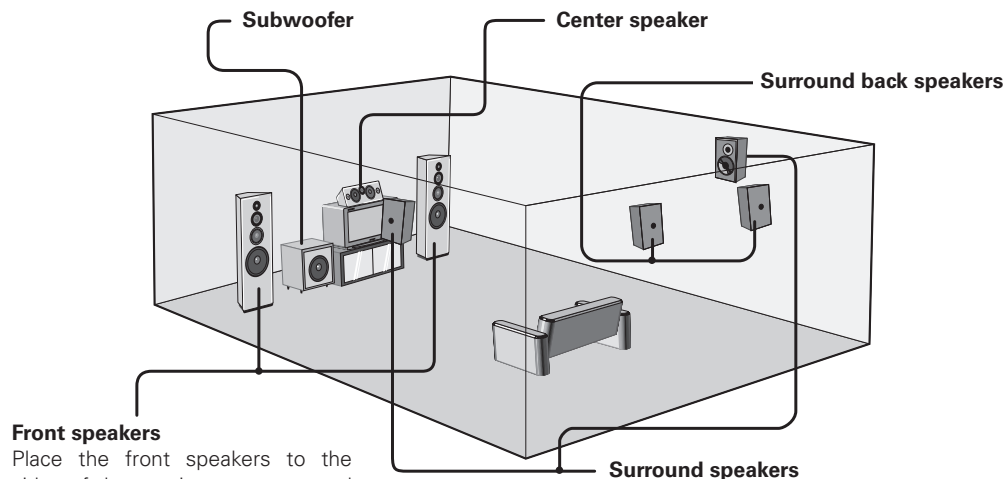

### NOTE

- HDMI signals cannot be converted into analog signals.
- 1080p component input video signals cannot be output to anything other than component video connectors.
- 480p/576p, 1080i and 720p component video input signals cannot be converted into S-Video or Video format.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.

# Speaker Connections

## Speaker Installation

The illustration below shows a basic example of installation of the amplifier combined with 8 speakers and a monitor.

### Front speakers

Place the front speakers to the sides of the monitor or screen and as flush with the screen surface as possible.

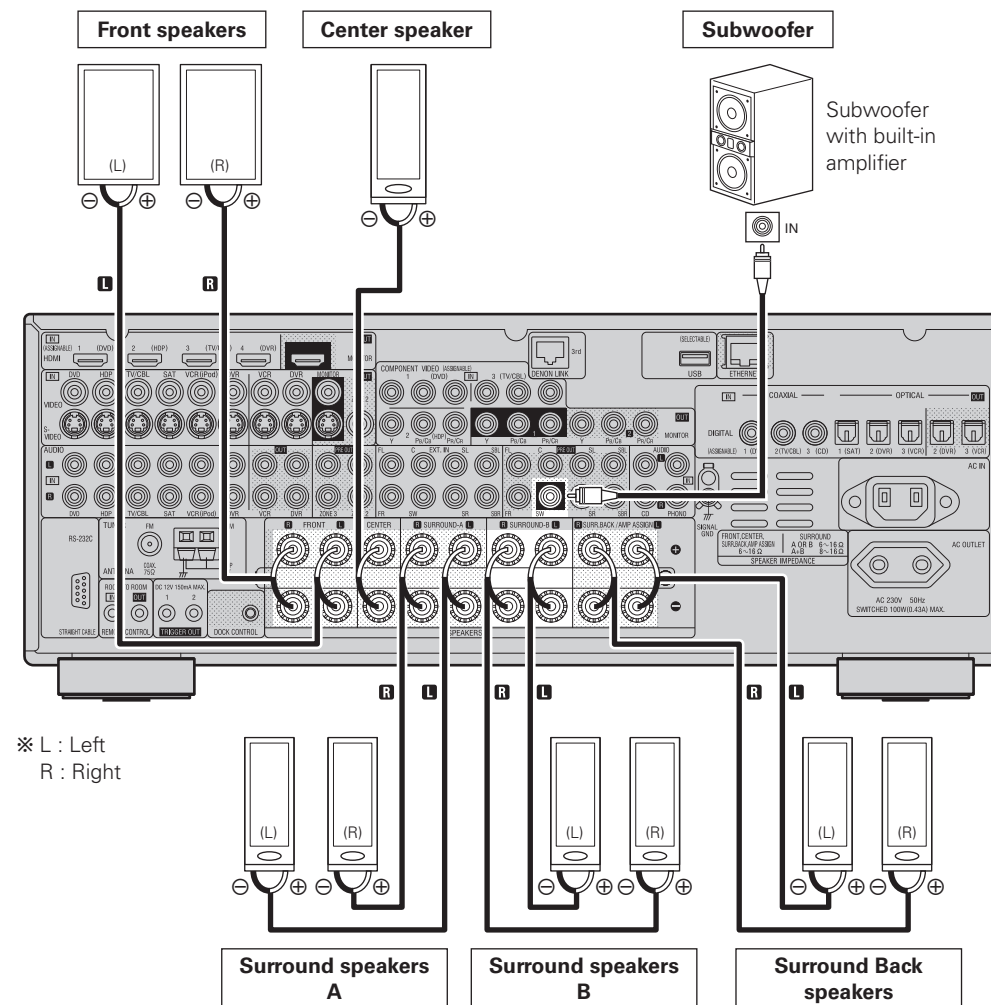

The table below shows a typical speaker configuration for the AVR-3808.

	FRONT		CENTER	SURROUND A		SURROUND B		SURROUND BACK			SUBWOOFER
	L	R		L	R	L	R	L	R	1 only	
7.1-channels (Surround A+B)	○	○	○	○	○	○	○	○	○	—	○
7.1-channels	○	○	○	○	○	—	—	○	○	—	○
6.1-channels	○	○	○	○	○	—	—	—	—	○	○
5.1-channels	○	○	○	○	○	—	—	—	—	—	○
3.1-channels	○	○	○	—	—	—	—	—	—	—	○
2.1-channels	○	○	—	—	—	—	—	—	—	—	○
2-channels	○	○	—	—	—	—	—	—	—	—	—

# Speaker Connections

Example: 7.1-channels (Surround A+B)

When using just one surround back speaker, connect it to the left channel (SBL).

Connecting the Speaker Cables

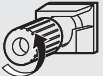

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to the AVR-3808, and be sure to interconnect the channels and polarities correctly.

- 1

Peel off about 10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.

- 2

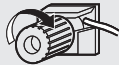

Turn the speaker terminal counterclockwise to loosen it.

- 3

Insert the speaker cable's core wire to the hilt into the speaker terminal.

- 4

Turn the speaker terminal clockwise to tighten it.

NOTE

- Use speakers with an impedance of 6 to 16 Ω/ohms. When using surround A and B speakers simultaneously, use speakers with an impedance of 8 to 16 Ω/ohms.
- Connect the speaker cables in such a way that they do not stick out of the speaker terminals. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (⚠ “Protection circuit”).
- Never touch the speaker terminals while the power supply is connected. Doing so could result in electric shock.

Protection circuit

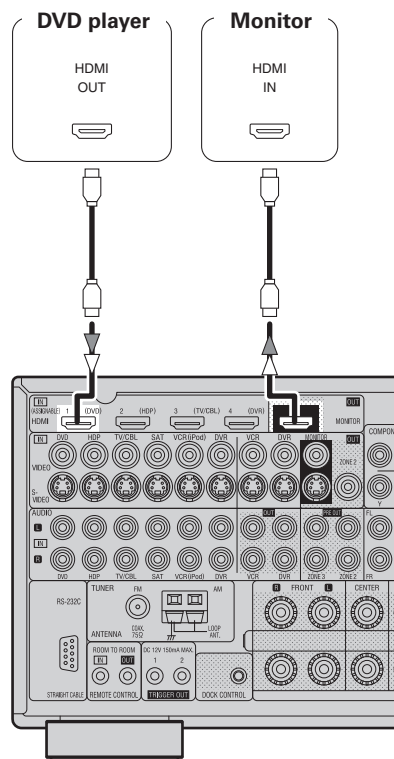

If speakers with an impedance lower than specified (for example 4 Ω/ohms speakers) are used for an extended period of time with the volume turned up high, the temperature may rise, activating the protection circuit.

When the protection circuit is activated, the speaker output is shut off and the power indicator flashes red. If this happens, unplug the power cord, then check the speaker cable and input cable connections. If the set is extremely hot, wait for it to cool off and improve ventilation around it. Once this is done, plug the power cord back in and turn the set's power back on.

If the protection circuit is activated again even though there are no problems in the ventilation around the set nor in the connections, the set may be damaged. Turn the power off, then contact a DENON service center.

## Connecting Equipment with HDMI connectors

With HDMI connections, the video and audio signals can be transferred with a single cable.

※ The AVR-3808 is equipped for HDMI version 1.3a. This version is compatible with other versions, allowing connection to all components equipped with an HDMI connector.

※ The AVR-3808 is compatible with 30- and 36-bit Deep Color.

Compatible audio format	Details	Discs (examples)
2-channel linear PCM	2ch 32-192 kHz 16/20/24 bits	CD, DVD-Video, DVD-Audio
Multi-channel linear PCM	8ch 32-192 kHz 16/20/24 bits	DVD-Audio
Dolby Digital, DTS	Bitstream	DVD-Video
DSD	2/5.1ch 2.8224 MHz 1 bit	SACD
Dolby Digital Plus, Dolby TrueHD, DTS-HD	Bitstream	HD DVD, Blu-ray Disc

### Copyright protection system (HDCP)

In order to play the digital video and audio signals of a DVD-Video or DVD-Audio disc using HDMI/DVI connections, both the connected DVD player and monitor must be equipped for a copyright protection system called "HDCP" (High-bandwidth Digital Content Protection). HDCP is a copy protection technology consisting of data encoding and mutual identification of the devices. The AVR-3808 is HDCP-compatible. For details on the DVD player or monitor you are using, refer to its operating instructions.

### NOTE

- Use a CPPM-compatible DVD player to play DVD-Audio discs that are copyright-protected by CPPM.
- The AVR-3808 cannot be controlled from another device via the HDMI cable.
- The audio signals output from the HDMI connector (sampling frequency, bit rate, etc.) may be restricted by the connected device.
- Video signals are not output properly when using devices that are not HDCP-compatible.
- Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the DVD player's resolution to a resolution with which the monitor is compatible.
- If the GUI menu "Manual Setup" – "HDMI Setup" – "Audio" setting (page 30) is set to "Amp", the sound may be interrupted when the monitor's power is turned off.
- Use a cable on which the HDMI logo is indicated (a certified HDMI product) for connection to the HDMI connector. Normal playback may not be possible when using a cable other than one on which the HDMI logo is indicated (a non-HDMI-certified product).
- If the monitor or DVD player does not support deep color, deep color signal transfer is not possible.
- If the monitor or DVD player does not support xvYCC, xvYCC signal transfer is not possible.
- If the monitor does not support "Auto Lipsync Correction" function, this function will not work.

- When the AVR-3808 and DVD player are connected using an HDMI cable, also connect the AVR-3808 and monitor using an HDMI cable.
- If the connected monitor or DVD player only has a DVI-D connector, use an HDMI/DVI converter cable. When using a DVI cable, no audio signals are transmitted.
- Use a Deep Color compatible cable for connection to Deep Color compatible devices.

### When connecting with an HDMI/DVI converter cable (adapter)

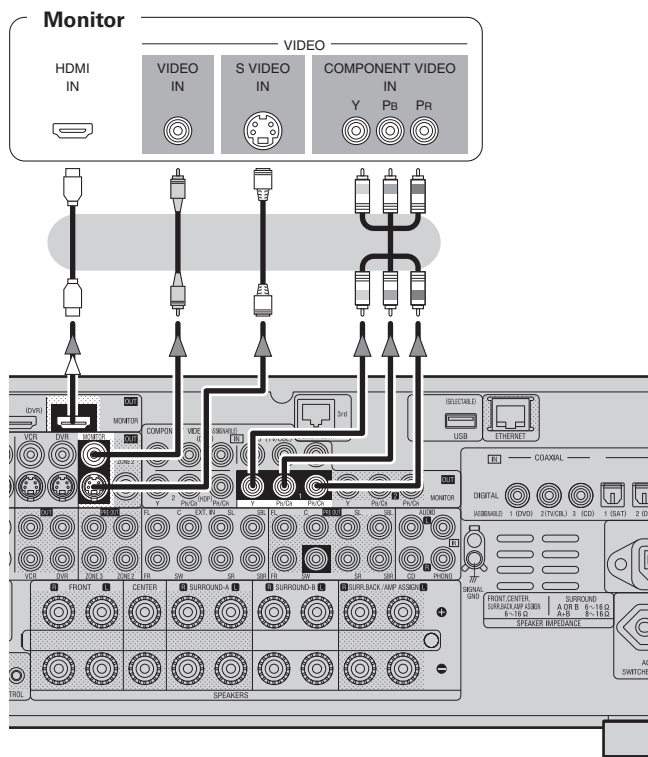

- HDMI video signals are theoretically compatible with the DVI format. When connecting to a monitor, etc., equipped with a DVI-D connector, connection is possible using an HDMI/DVI converter cable, but depending on the combination of components in some cases the video signals will not be output.
- When connecting using an HDMI/DVI converter adapter, the video signals may not be output properly due to poor connections with the connected cable, etc.

- By default, the HDMI audio signals are output from the speakers connected to the AVR-3808.
- To output the sound from the TV, make the settings at GUI menu "Manual Setup" – "HDMI Setup" – "Audio" – "TV" (page 30).

## Connecting the Monitor

- Connect the cables to be used (☞ page 8 “Video Conversion Function”).
- With HDMI connections, the video and audio signals can be transferred with a single cable.
- To output the audio signals to the monitor with HDMI connections, set GUI menu “Manual Setup” – “HDMI Setup” – “Audio” to “TV” (☞ page 30).

### NOTE

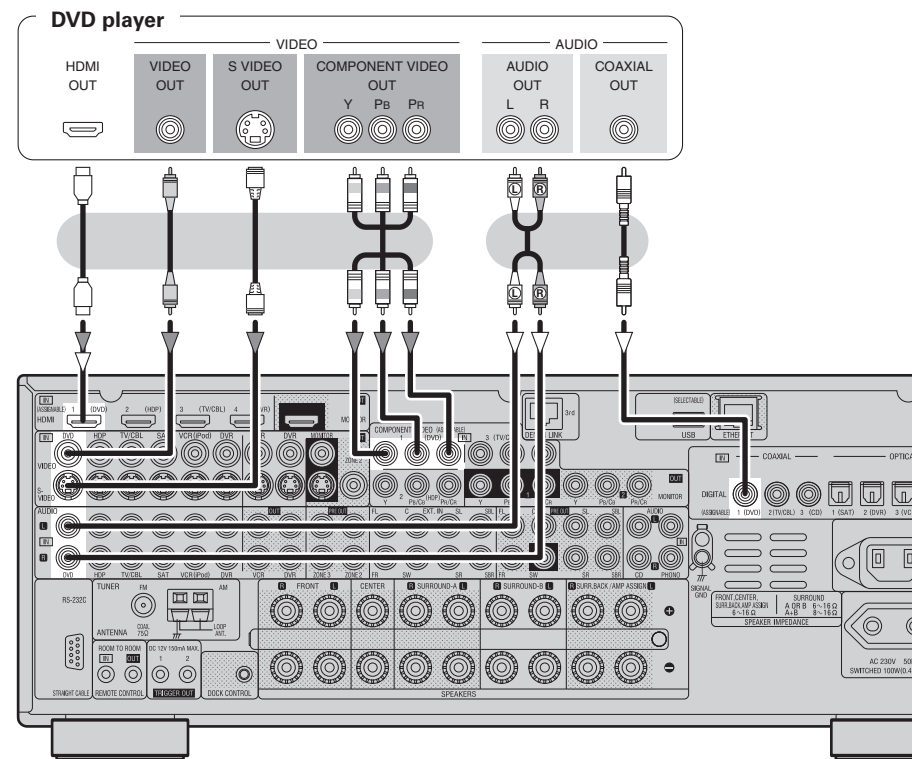

- The component video connectors may be indicated differently on your monitor. For details, see the monitor's operating instructions.
- The audio signals output from the HDMI connectors are only the HDMI input signals.

## Connecting the Playback Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

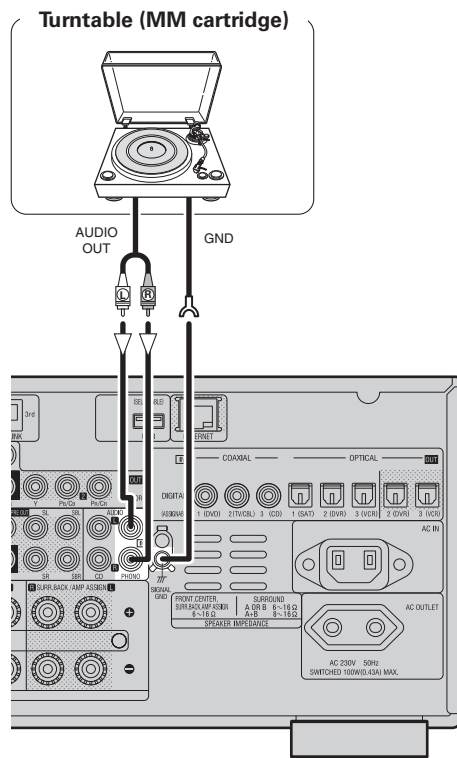

### DVD Player

- Connect the cables to be used.
- With HDMI connections, the video and audio signals can be transferred with a single cable.

- Connect an HDP (High-Definition Player) in the same way.
- When using an optical cable for the digital audio connection, make the settings at GUI menu “Source Select” – “DVD” – “Assign” – “Digital” (☞ page 39).

## Record Player

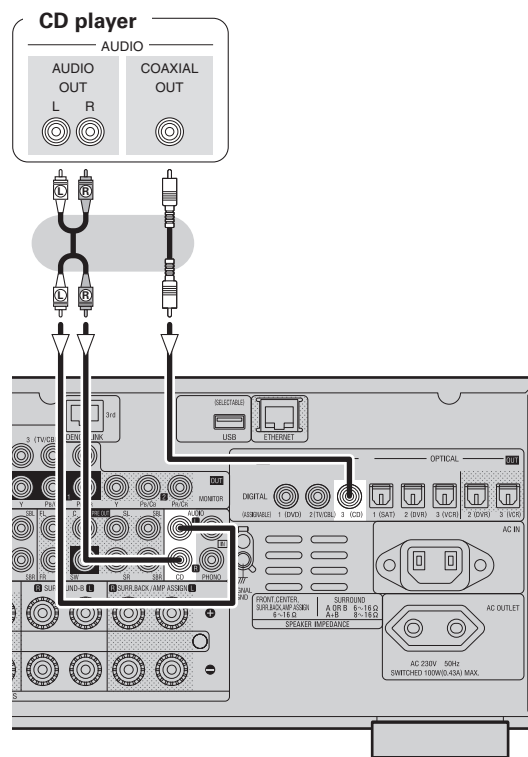

- When connecting a record player with an MC cartridge, use a commercially available MC head amplifier or a step-up transformer.
- Induction humming (a booming sound) may be produced from the speakers if the volume is raised with no record player connected.
- With some record players, noise may be generated when the ground wire is connected. If so, disconnect the ground wire.

### NOTE

The AVR-3808's SIGNAL GND terminal is meant to reduce noise when a record player is connected. This is not a safety ground terminal.

## CD Player

Connect the cables to be used.

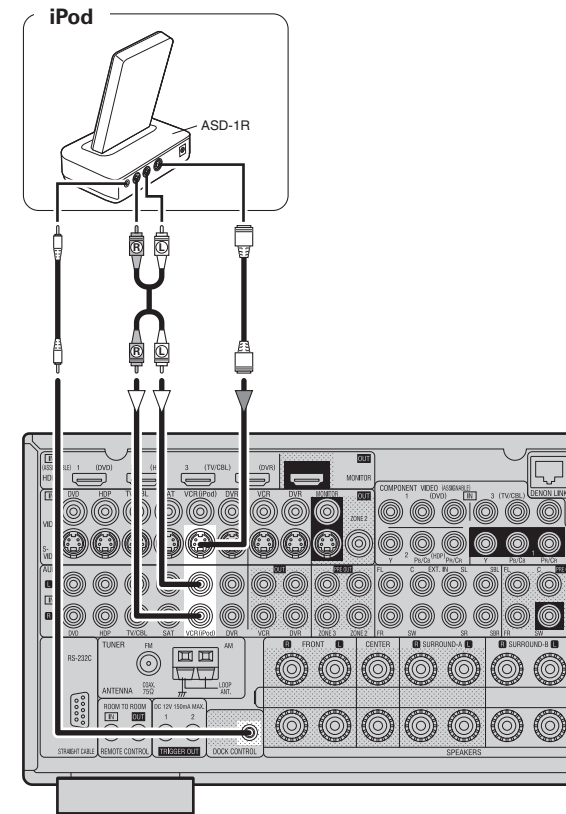

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" – "CD" – "Assign" – "Digital" (page 39).

## iPod®

Use a DENON Control Dock for iPod (ASD-1R, sold separately) to connect the iPod to the AVR-3808. For instructions on the Control Dock for iPod settings, refer to the Control Dock for iPod's operating instructions.

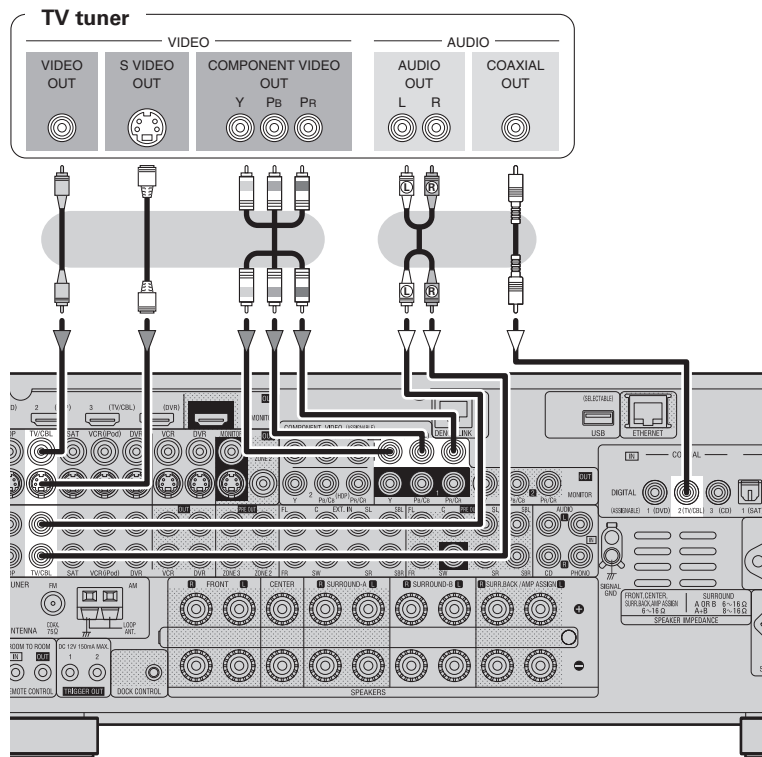

**Example :**

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- To assign the iPod to a connector other than VCR (iPod), make the settings at GUI menu "Source Select" – "(input source to which iPod dock assigned)" – "Assign" – "iPod dock" (page 39).

## TV/CABLE Tuner

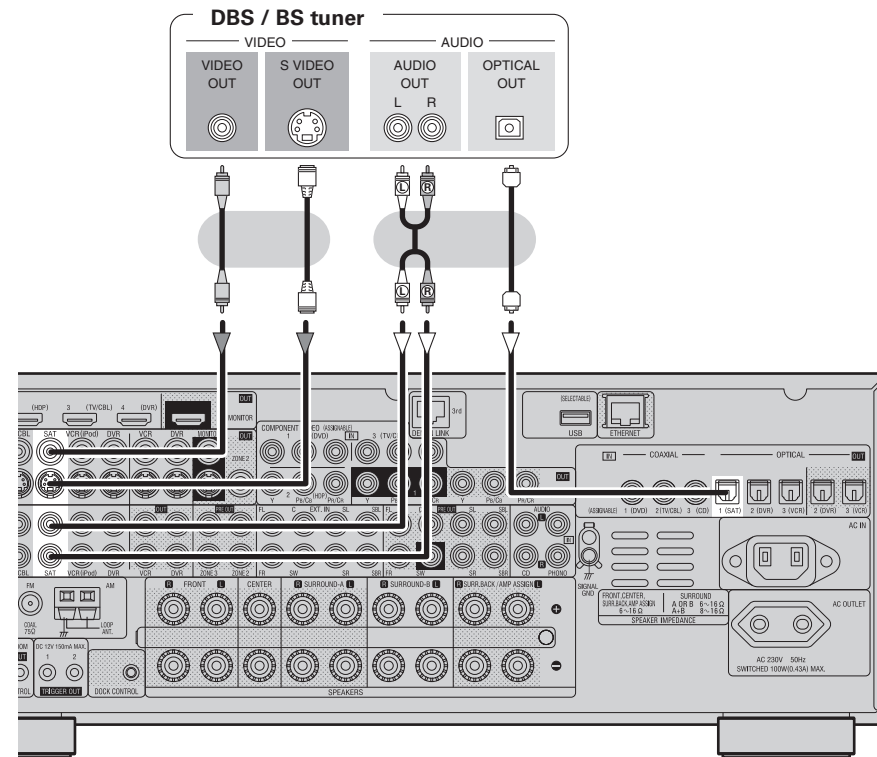

Connect the cables to be used.

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" – "TV/CBL" – "Assign" – "Digital" (page 39).

## Satellite Receiver

Connect the cables to be used.

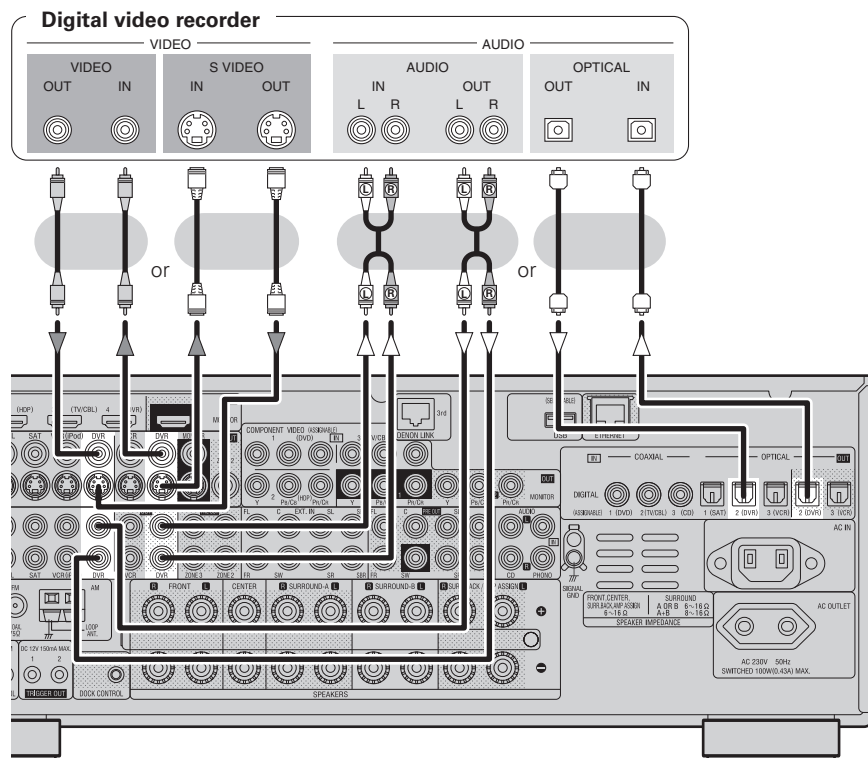

- When using a coaxial digital cable for the digital audio connection, make the settings at GUI menu "Source Select" – "SAT" – "Assign" – "Digital" (page 39).
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" – "SAT" – "Assign" – "Component" (page 39).

## Connecting the Recording Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

### Digital Video Recorder

Connect the cables to be used.

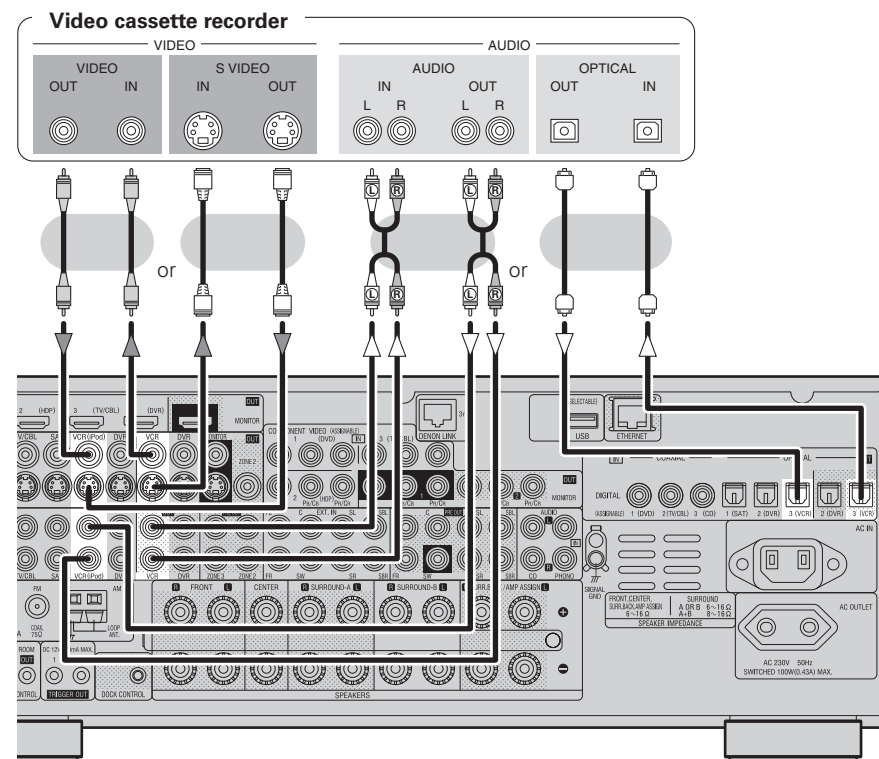

- Make analog connections if you wish to record analog audio signals.
- When recording via the AVR-3808, the playback device's cable must be of the same type as the cable used to connect the AVR-3808's DVR OUT connector.  
**Example:** TV IN → S-Video cable : DVR OUT → S-Video cable  
TV IN → Video cable : DVR OUT → Video cable
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" – "DVR" – "Assign" – "Component" (page 39).

#### NOTE

Do not connect the output of the component connected to the AVR-3808's OPTICAL2 output connector to any input connector other than OPTICAL2.

### Video Cassette Recorder

Connect the cables to be used.

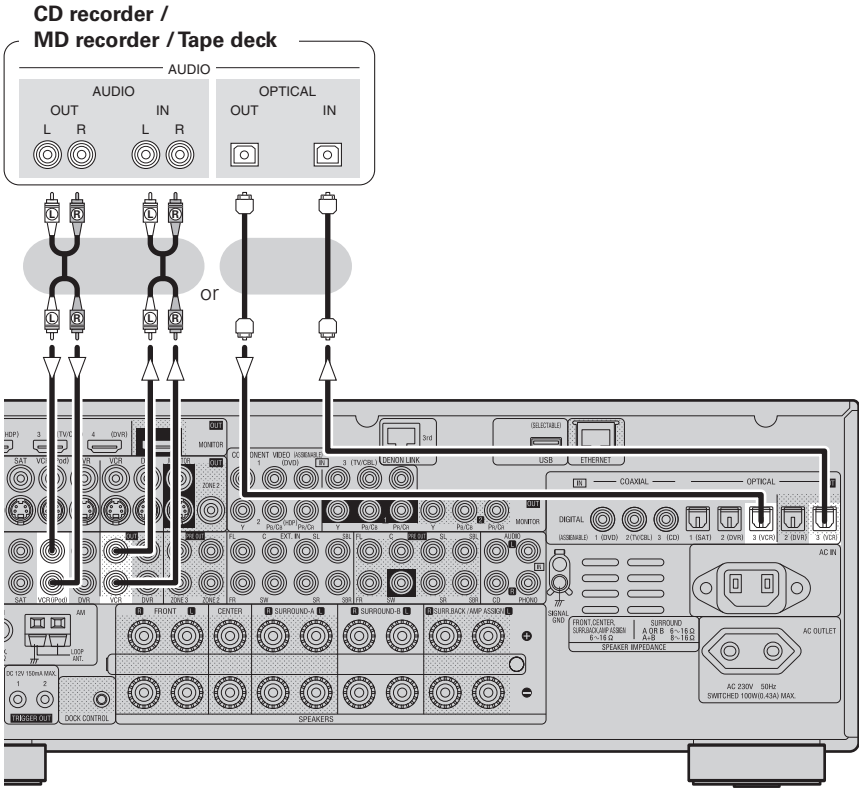

- When recording via the AVR-3808, the playback device's cable must be of the same type as the cable used to connect the AVR-3808's VCR OUT connector.  
**Example:** TV IN → S-Video cable : VCR OUT → S-Video cable  
TV IN → Video cable : VCR OUT → Video cable
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" – "VCR" – "Assign" – "Component" (page 39).

#### NOTE

Do not connect the output of the component connected to the AVR-3808's OPTICAL3 output connector to any input connector other than OPTICAL3.

CD Recorder / MD Recorder / Tape Deck

Make analog connections if you wish to record analog audio signals, or digital connections if you wish to record digital audio signals, depending on the types of connectors on the components being used.

NOTE

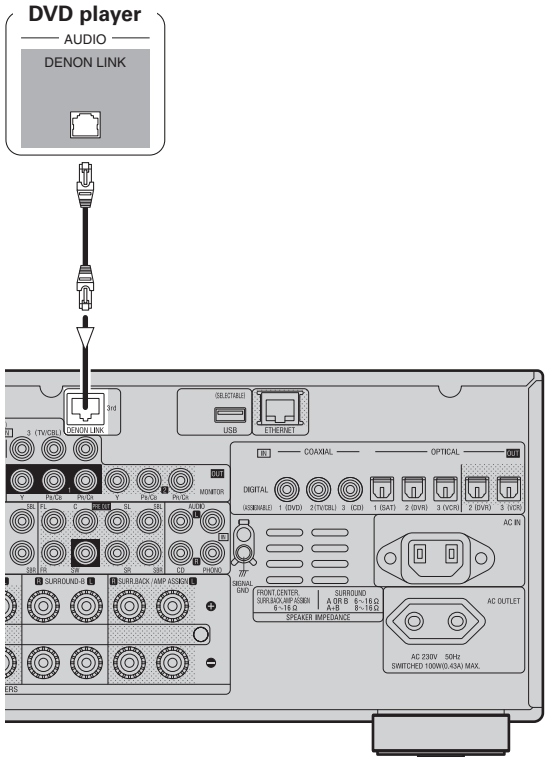

Do not connect the output of the component connected to the AVR-3808's OPTICAL3 output connector to any input connector other than OPTICAL3.

Connections to Other Devices

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

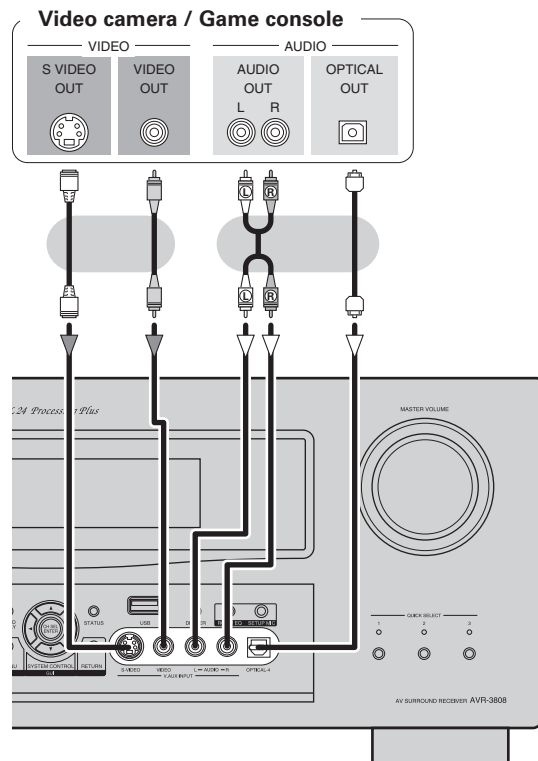

Components Equipped with a DENON LINK connector

Multi-channel playback is possible with DVD-Audio discs, Super Audio CD, etc.

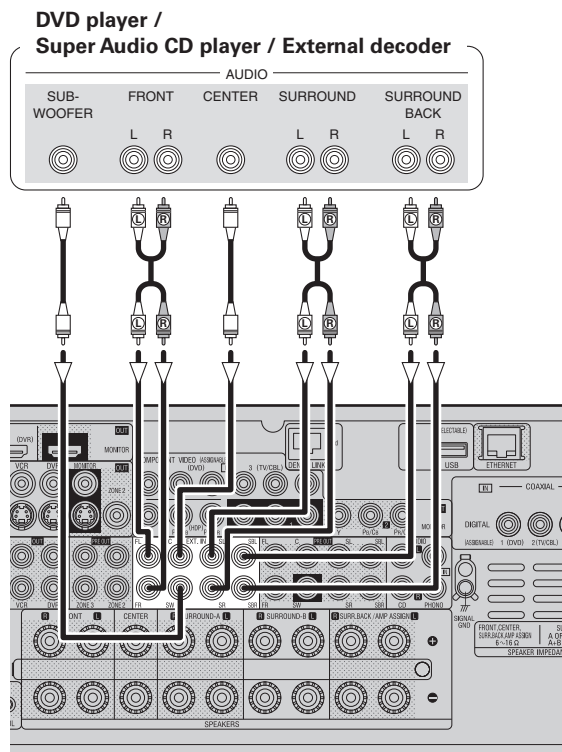

To use with DENON LINK connections, make the settings at GUI menu "Source Select" – "Assign" – "Digital" – "DENON LINK" (page 39).

## Video Camera / Game Console

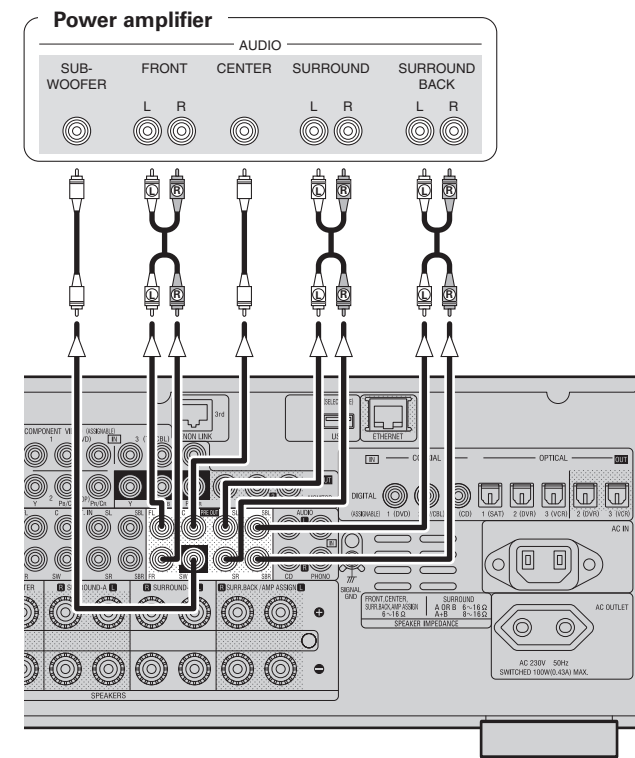

## Component with Multi-channel Output connectors

- To play the analog input signals input to the EXT. IN connectors, press the **INPUT MODE** button on the main unit or **INPUT** button on the main remote control unit and select "EXT. IN" or make the settings at GUI menu "Source Select" – "(input source)" – "Input Mode" – "Input Mode" – "EXT. IN" (page 38).
- The video signal can be connected in the same way as a DVD player (page 12).
- To play copyright-protected discs, connect the AVR-3808's EXT. IN connector with the DVD player's analog multi-channel output connector.

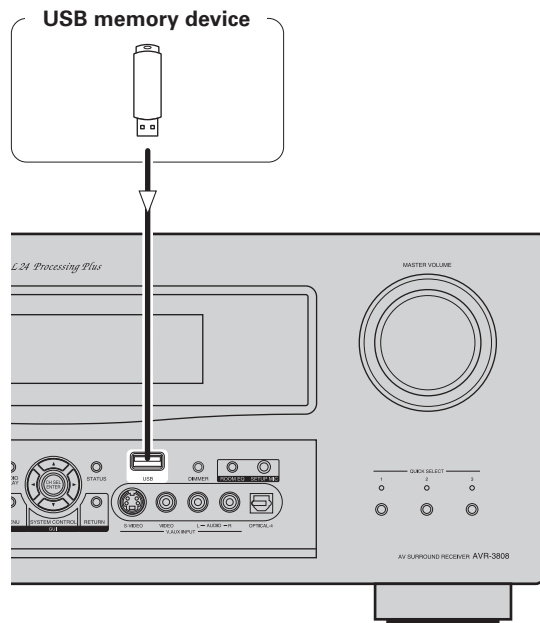

## External Power Amplifier

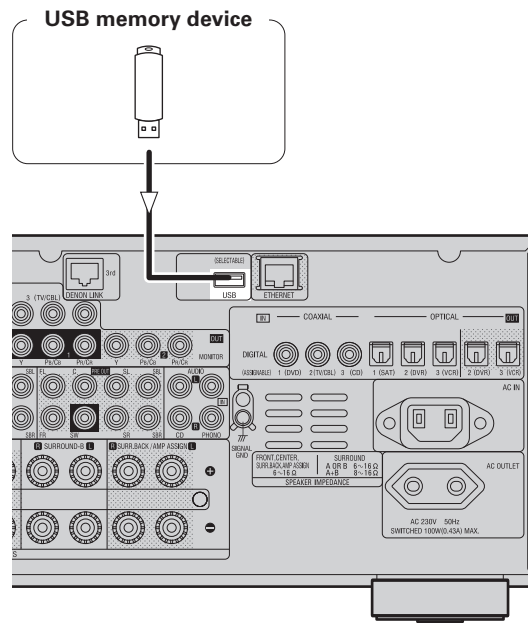

When using just one surround back speaker, connect it to the left channel (SBL).

## USB Port

### Front panel

### Rear panel

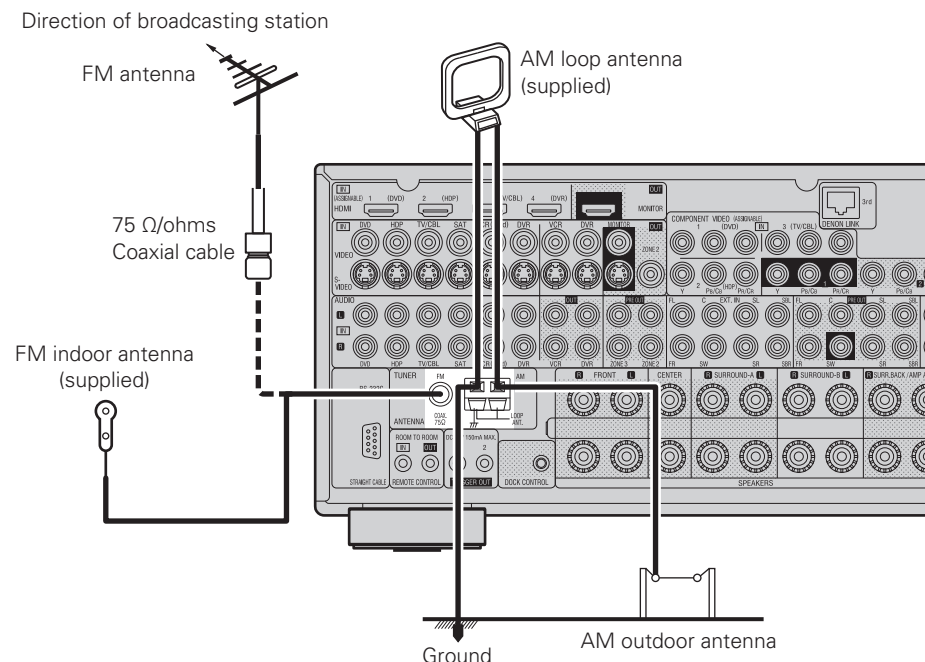

- In the initial status, USB memory devices can be used by connecting them to the USB port on the front panel.
- To change the port to be used, see “USB Select” on page 40.
- For instructions on playing the files on a USB memory device, see page 56.

### NOTE

- Set to the USB port you want to use.
- The AVR-3808 is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the GUI menu “Source Select” – “NET/USB” – “Playback Mode” – “USB Select”.
- Do not use the extension cable for connecting the USB memory device to the AVR-3808's USB port. Use of the extension cable may cause harmful interference.

## Antenna terminals

An FM antenna cable plug can be connected directly.

## AM loop antenna assembly

- ① Remove the vinyl tie and take out the connection line.
  - ② Connect to the AM antenna terminals.
  - ③ Bend in the reverse direction.
  - ④
    - a. With the antenna on top of any stable surface.
    - b. With the antenna attached to a wall.
- Mount
- Installation hole Mount on wall, etc.

### Connection of AM antennas

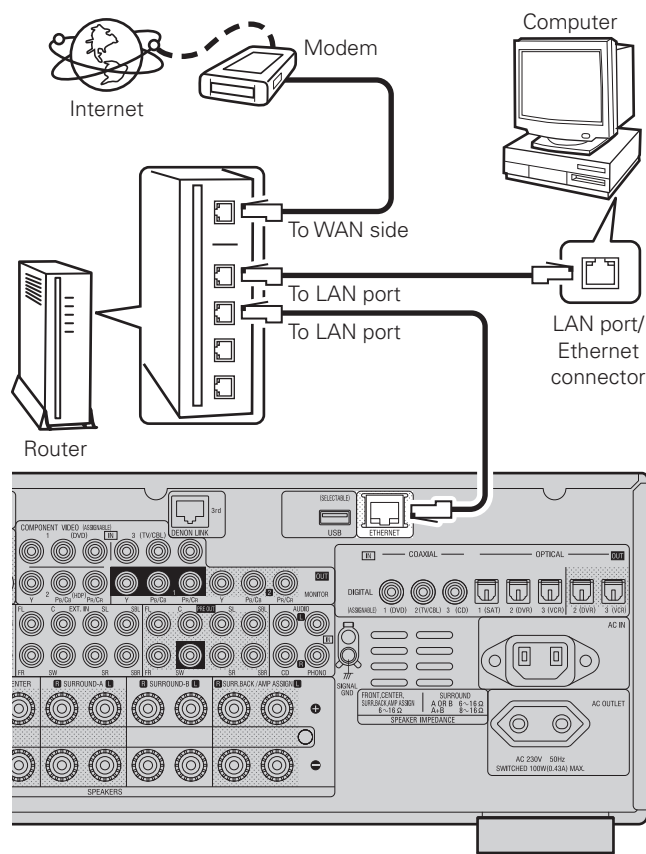

1. Push the lever.
2. Insert the conductor.
3. Return the lever.

### NOTE

- Do not connect two FM antennas simultaneously.
- Even if an external AM antenna is used, do not disconnect the AM loop antenna.
- Make sure the AM loop antenna lead terminals do not touch metal parts of the panel.

## Network Audio

## Required system

### ■ Broadband Internet connection

A broadband line connection to the Internet is required in order to use the AVR-3808's Internet radio function and firmware update.

### ■ Modem

This is a device that is connected to the broadband line to communicate with the Internet. Some are integrated with the router.

### ■ Router

When using the AVR-3808, we recommend you use a router equipped with the following functions:

- Built-in DHCP (Dynamic Host Configuration Protocol) server  
This function automatically assigns IP addresses on the LAN.
- Built-in 100BASE-TX switch  
When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

### ■ Ethernet cable (CAT-5 or greater recommended)

- The AVR-3808 does not come with an Ethernet cable.
- Some flat type Ethernet cables are easily affected by noise.  
We recommend using a normal type cable.
- For the Ethernet cable, used a shielded twisted pair (STP) cable.  
Do not use an unshielded twisted pair (UTP) cable, as it may exceed noise standard limits.

### ■ Computer

A computer with the following specifications is required to use a music server:

- OS  
Windows® XP Service Pack2, Windows Vista
- Software (Prepare one of the following.)
  - .NET Framework 1.1 and Windows Media Connect (Windows XP)
  - Windows Media Player ver.11
  - DLNA-compatible server software
- Internet browser  
Microsoft Internet Explorer 5.01 or later
- LAN port
- 300 MB or more free disk space

※ Free disk space is required to store music files. The following sizes are approximate.

Format	Bit rate	Per minute	Per hour
MP3 / WMA MPEG-4 AAC	128 kbps	Approx. 1 MB	Approx. 60 MB
	192 kbps	Approx. 1.5 MB	Approx. 90 MB
	256 kbps	Approx. 2 MB	Approx. 120 MB
	392 kbps	Approx. 3 MB	Approx. 180 MB
WAV (LPCM)	1400 kbps	Approx. 10 MB	Approx. 600 MB
FLAC	1080 kbps	Approx. 7.7 MB	Approx. 464 MB

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.

### NOTE

- A contract with an ISP is required to connect to the Internet.  
No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Depending on the server, video files may be displayed, but they cannot be played on the AVR-3808.

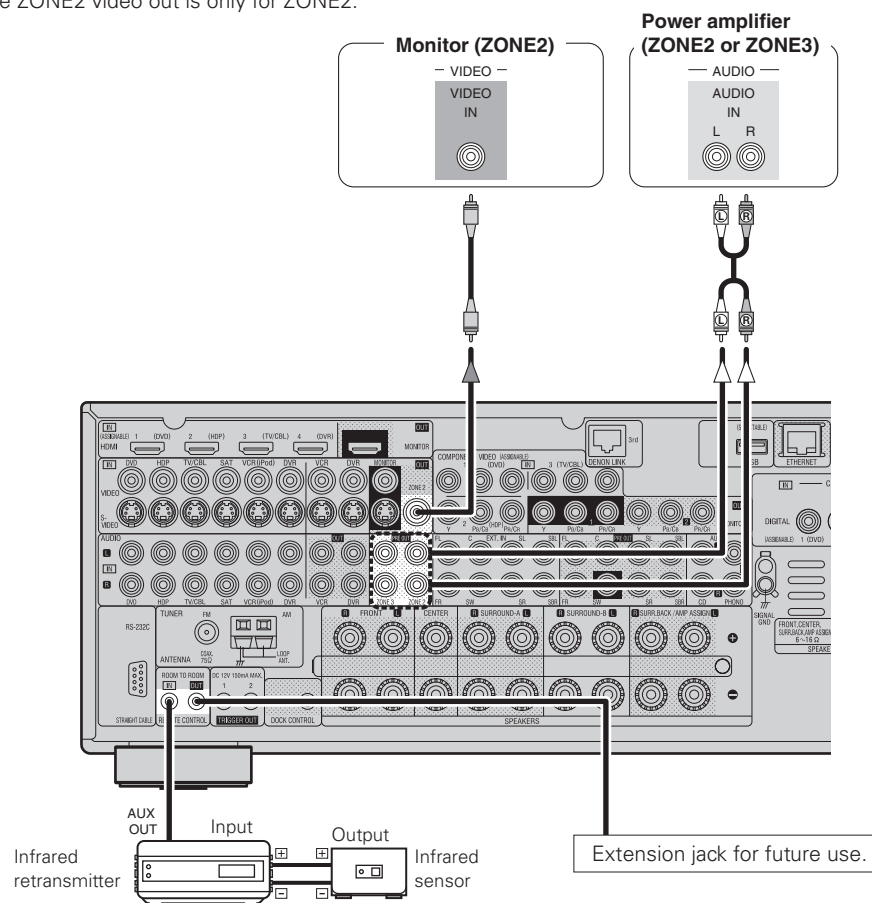

### ■ Others

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at GUI menu "Manual Setup" – "Network Setup" (page 32, 33).
- With the AVR-3808, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using a broadband router (DHCP function), the AVR-3808 sets the IP address, etc., automatically.  
When using the AVR-3808 connected to a network with no DHCP function, make the settings for the IP address, etc., at GUI menu "Manual Setup" – "Network Setup" (page 32, 33).
- The AVR-3808 is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a line of the type with which the PPPoE is set.
- Depending on the ISP with which you have your contract, it may be necessary to make proxy server settings to use the Internet radio function. If you made proxy server settings on the computer to connect to the Internet, make the proxy server settings on the AVR-3808 in the same way.

## Multi-Zone

### ZONE2 or ZONE3 Pre-out Connections

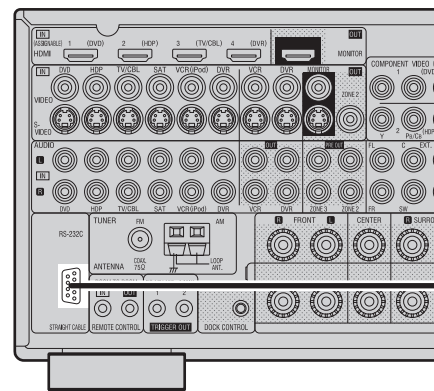

- If another power amplifier or pre-main (integrated) amplifier is connected, the ZONE2 or ZONE3 pre-out connectors can be used to play a different program source in ZONE2 or ZONE3 the same time (page 69 ~ 72).
- When using an S-Video cable or a video cable for connection between the AVR-3808 and an input device, connect to the video connectors.
- The ZONE2 video out is only for ZONE2.

#### NOTE

- For the audio output, use high quality pin-plug cords so that no induction humming or noise is produced.
- For instructions on installing and operating separately sold devices, refer to the respective devices' operating instructions.
- To conduct multi-zone playback, see "Amp Assign / Multi-Zone Connections and Operations" (page 69 ~ 72).

## External Controller

### RS-232C connector

This connector is used for an external controller.

※ If you wish to control the AVR-3808 from an external controller using the RS-232C connector, perform the operation below beforehand.

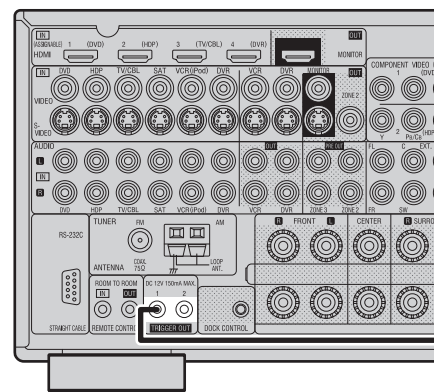

- ① Turn the AVR-3808's power.
- ② Turn off the AVR-3808's power from the external controller.
- ③ Check that the AVR-3808 is in the standby mode.

- When using in combination with an RF Remote Controller (RC-7000CI, sold separately) or RF Remote Receiver (RC-7001RCI, sold separately) two-way communication with an RF Remote Controller is possible.

The AVR-3808's status information as well as iPod and Internet audio music files can be browsed watching the RF Remote Controller's display. For details, refer to the operating instructions of the respective devices.

- When used in combination with an RF Remote Controller or RF Remote Receiver, make the settings at GUI menu "Manual Setup" – "Option Setup" – "2Way Remote" – "Used" (page 35).

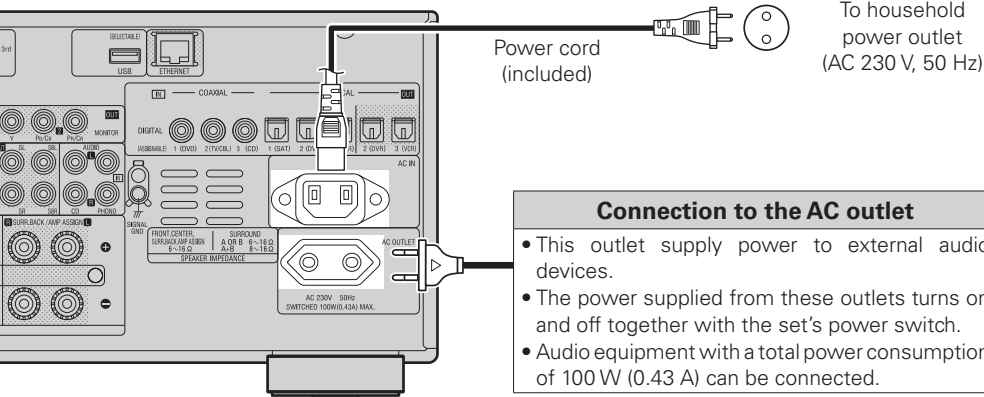

### Trigger output jacks

The power of an external device equipped with a trigger input jack can be turned on and off in association with operations on the AVR-3808. For details, see GUI menu "Manual Setup" – "Option Setup" – "Trigger Out 1" or "Trigger Out 2" (page 35).

- Output level: 150 mA/12 V  
Check the trigger input conditions of the connected device.
- If the trigger input level of the connected device is higher than 150 mA/12 V and depending on the short-circuiting conditions, the AVR-3808's protection circuit may be activated, in which case "TRIGGER PROTECT" appears on the display. If this happens, turn off the AVR-3808's power and disconnect the connected device.

## Connecting the Power Cord

Wait until all connections have been completed before connecting the power cord.

### NOTE

- Insert the AC plugs securely. Incomplete connections could cause noise.
- Only use the AC outlet to plug in audio devices. Do not use them as power supplies for hairdryers or anything other than audio equipment.

## Once Connections are Completed

### Turning the Power On (page 47)

## GUI Menu Operations

With the AVR-3808, settings and operations for most functions can be performed by operating while looking at the GUI menus displayed on the monitor screen.

The GUI cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g. VGA) are input.

## Example of the Display of the GUI Mark at a Title

Items for which this mark is indicated at the title can be operated from the GUI. We recommend performing such operations from the GUI.

### Auto Setup

Optimize settings for speakers in use.

This is the GUI icon for this setting item or for the menu series to which this item belongs.

## Example of Display of Default Values

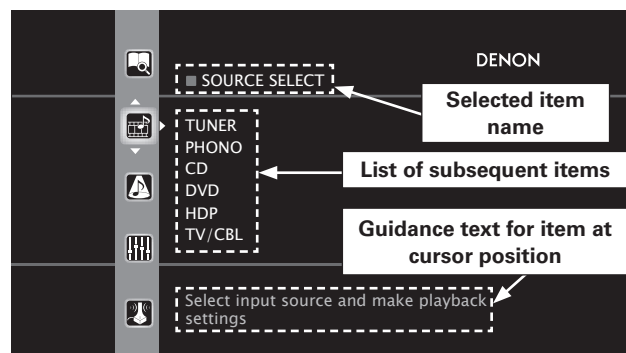

In lists of selectable items or adjustable ranges, the item surrounded by a border is the default value.

[Selectable items] 7.1 (B) 7.1 5.1

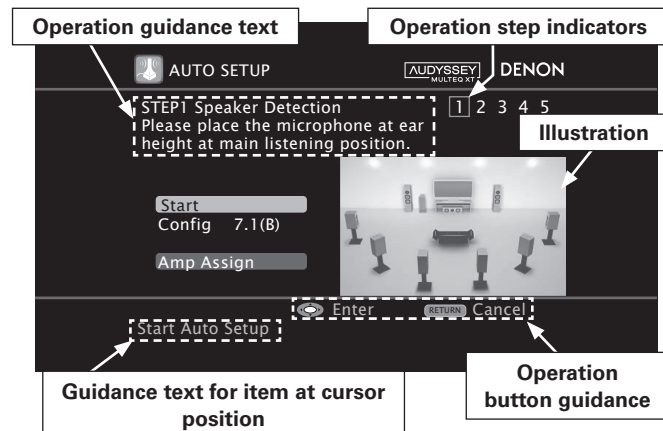

## Examples of GUI Screen Displays

Some typical examples are described below.

### Example: Browse Menu (Top Menu)

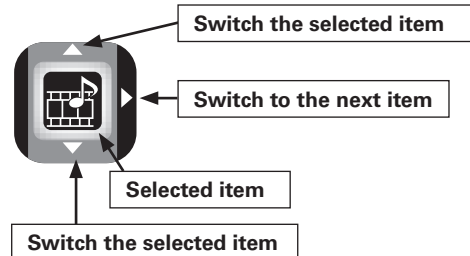

### Example: Menus with Illustrations (Auto Setup)

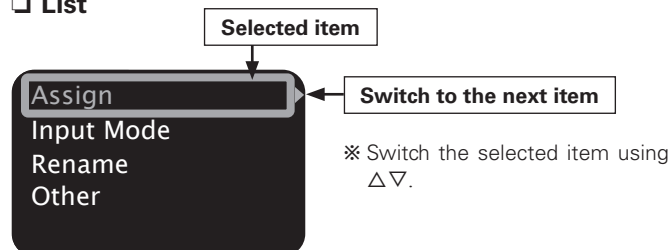

### Cursor Position Display

#### Icon

#### List

## Operations

The same operation is possible on the main unit or remote control unit.

### 1 Press the **MENU** button.

The GUI menu is displayed.

※ To operate from the main remote control unit, be sure to set the remote control unit to the AMP mode.

### 2 Press the **Δ ∇ ▷** button to select the menu to be set or operated.

※ To return to the previous item, press the **◀** or **RETURN** button.

### 3 Press the **ENTER** button to enter the setting.

### 4 Press the **MENU** button to finish.

When "Screensaver" is set to "ON", the screensaver is activated if no operation is performed for about 3 minutes.

## Auto Setup

- Audyssey MultEQ® XT automatically measures the acoustical problems in the listening environment to create the best audio experience for your home theater.
- It optimizes a large listening area where one or more listeners are seated.

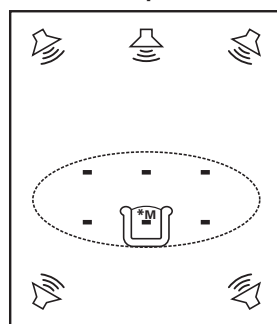

Measurements are performed by placing the calibrated microphone (DM-A405) successively at multiple positions throughout the listening area as shown in **Example ①**. For best results, it is strongly recommended to measure 6 or more positions so that the measurements have the proper spatial weighting.

Even if the listening environment is small as shown in **Example ②**, measuring at multiple points throughout the listening environment results in more effective correction.

**Example ①**

**Example ②**

### About the main listening position (\*M)

The main listening position refers to the most central position where one would normally sit within the listening environment.

MultEQ XT uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

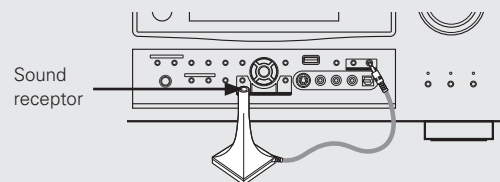

To make manual adjustments to the settings, see page 28, 29.

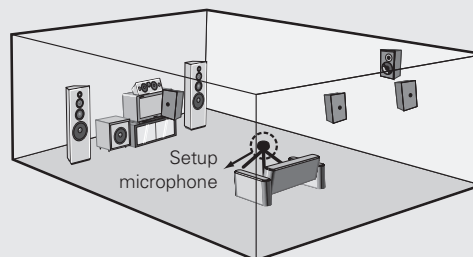

## Preparations

### 1 Connect the included calibrated setup microphone to the SETUP MIC jack on the main unit.

The auto setup screen appears automatically.

### 2 Place the microphone at ear height on a tripod or stand with the microphone pointing directly up towards the ceiling.

※ It is not recommended to hold it in your hand. Be sure that the path from microphone to the speakers is not blocked by objects. Avoid placing the microphone close to a seat back or wall as sound reflections may give inaccurate results.

When using a subwoofer, make the following settings before starting the auto setup procedure:

- Defeat the volume and crossover controls if possible
- If this is not possible then set
  - Volume: "12 o'clock" position
  - Crossover frequency: "Maximum/Highest Frequency"
  - Low pass filter: "Off"
  - Standby mode: "Off"

### NOTE

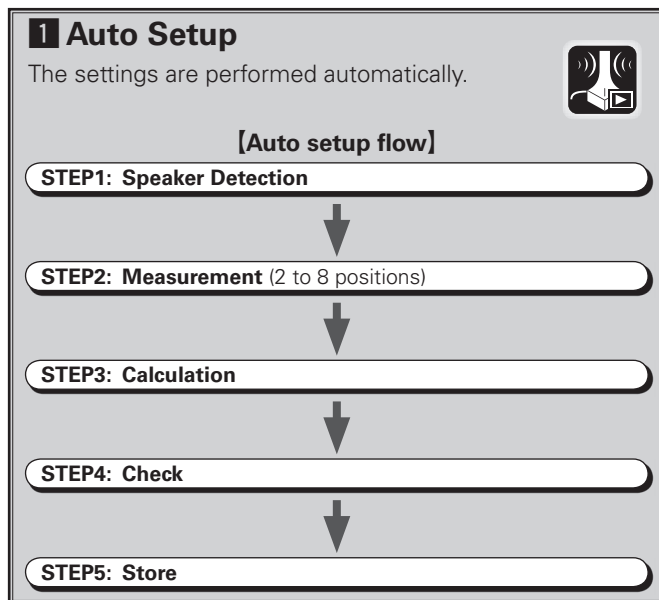

- Do not disconnect the setup microphone until the auto setup procedure is completed.
- When using headphones, unplug the headphones before starting the auto setup procedure.

# Auto Setup

Optimize settings for speakers in use.

● Menu tree ●

- Auto Setup
- 1 Auto Setup
- 2 Option
- 3 Parameter

### Start

Start Auto Setup.  
 The Audyssey MultEQ XT Auto Setup process automatically calculates the size, level, distance, bass management crossover frequency, and optimal settings for each speaker and subwoofer. Audyssey MultEQ XT corrects acoustical distortions within the listening area.  
 Before starting, connect and position all your speakers.  
 Once started, MultEQ XT will play a series of test tones through each speaker.

If an error message appears during the measurements, check “Error Messages” (🔍 page 27), take the advised action, then start the measurements again.

### Configuration

The speaker system to be measured can be selected ahead of time here.

[Selectable items] **7.1 (B)** **7.1** **5.1**

Setting the correct speaker configuration can reduce the time required to measure during the auto setup procedure as the system will not have to look for speakers that are not connected.

### Amp Assign

Advanced setting : changes power amplifier assignment.

#### NOTE

The items selectable at “Configuration” differ according to the “Amp Assign” settings.

#### STEP1 : Speaker Detection

The speaker connection and polarity are detected at the first measurement position. The following attributes are also determined at this time: “Speaker Size”, “Speaker Distance”, “Channel Level”, “Crossover Frequency”.

Once the measurements are completed, the results are displayed.

#### NOTE

- Loud test tone may be played during Audyssey MultEQ XT Automatic Speaker Setup. This is part of normal operation. If there is background noise in room, these test tones will increase in volume.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- Quiet the listening environment before beginning measurements and refrain from talking. Turn off air conditioning units or other devices that emit noise if at all possible as measurements may be affected by these sounds.
- Operating the **MASTER VOLUME** knob on the main unit or the **VOL +/-** buttons on the remote control unit during the measurements will cancel the measurements.
- Do not change the speaker connections or subwoofer volume after “STEP1.”

#### STEP2: Measurement

After completing a measurement position, move the microphone to the next position.

Measure at least 6 positions (main listening position and at least 5 other surrounding positions). For best results it is recommend measuring **6 or more positions** (with a maximum of 8 positions).

#### STEP3: Calculation

When “Calculate” is selected at “STEP2”, the measurements taken are analyzed automatically to determine how the speaker system interacts with the room.

The time required for this analysis depends on the number of speakers connected. The higher the number of speakers, the longer the time required for analysis.

#### STEP4: Check

Once the auto setup procedure is complete, a measuring result check screen appears.

Select any item whose results you want to check to review the results.

Values that are different from the actual distance may be set for speakers with built-in filters (subwoofers, etc.). This is because filters add electrical delay to the signal that should be compensated.

#### STEP5: Store

The auto setup measurement results are stored in the AVR-3808.

#### NOTE

Do not turn the power off while the settings are being stored.

## Error Messages

If the auto setup procedure could not be completed due to speaker installation, the measuring environment, etc., an error message is displayed. If this happens, check the relevant items, be sure to take the necessary measures, then perform the auto setup procedure over again.

Error messages (examples)	Cause	Measures
<b>No microphone or speaker</b>	<ul style="list-style-type: none"> <li>Included setup microphone is not connected.</li> <li>Not all speakers could be detected.</li> </ul>	<ul style="list-style-type: none"> <li>Connect the included setup microphone to the <b>SETUP MIC</b> jack on the main unit.</li> <li>Check the speaker connections.</li> </ul>
<b>Ambient noise is too high or Level is too low</b>	<ul style="list-style-type: none"> <li>Too much noise in the room for accurate measurements to be made.</li> <li>Speaker or subwoofer sound is too low for accurate measurements to be made.</li> </ul>	<ul style="list-style-type: none"> <li>Either turn off any device generating noise or move it away.</li> <li>Try again when the surroundings are quieter.</li> <li>Check the speaker installation and the direction in which the speakers are facing.</li> <li>Adjust the subwoofer's volume.</li> </ul>
<b>None</b>	<ul style="list-style-type: none"> <li>Displayed speaker could not be detected. <ul style="list-style-type: none"> <li>The front L and front R speakers were not properly detected.</li> <li>Only one channel of the surround (A) and surround (B) speakers was detected.</li> <li>Sound was output from the R channel when only one surround back speaker was connected.</li> <li>The surround back or the surround (B) speaker was detected, but the surround (A) speaker was not detected.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Check the connections of the displayed speaker.</li> </ul>
<b>Phase</b>	<ul style="list-style-type: none"> <li>Displayed speaker connected with the polarities reversed.</li> </ul>	<ul style="list-style-type: none"> <li>Check the polarities of the displayed speaker.</li> <li>For some speakers, this error message may be displayed even if the speaker is properly connected. If you are sure that the wiring is correct, select "Skip".</li> </ul>

 Select "Retry" to make the measurements again.

**NOTE** Be sure to turn the power off before checking the speaker connections.

## 2 Option

Select settings for room EQ, mic, etc.

### Room EQ

Select room EQ setting method.

[Selectable items] **All** **Assign**

### Direct Mode

Select room EQ use for DIRECT or PURE DIRECT mode.

[Selectable items] **ON** **OFF**

### Mic Select

Select the microphone type if not using supplied mic.  
The microphone connected to V.AUX Lch is used.

[Selectable items] **Mic** **V.AUX L**

Only a professionally certified installer should ever connect a professionally-calibrated microphone to the V.AUX L input on the front panel.

## 3 Parameter Check

Check auto setup measurement results.  
This is displayed after the auto setup procedure is completed.

### [Items to be checked]

**Spkr Config Check** **Distance Check** **Ch. Level Check**

**Crossover Check** **EQ Check**

The auto setup results can be reset to what was originally calculated by MultEQ XT when "Restore" is selected.

# Manual Setup

Make detail settings for various parameters.

## Speaker Setup

Use this procedure to set the speakers manually or if you wish to change the settings made with the auto setup procedure.

### Menu tree

#### Manual Setup

#### Speaker Setup

#### 1 Speaker Configuration

#### 2 Subwoofer Mode

#### 3 Distance

#### 4 Channel Level

#### 5 Crossover Frequency

#### 6 Surround Speaker

## 1 Speaker Configuration

Select speaker configuration and size.  
(bass reproduction capability)

### Front

Select front speaker size.

[Selectable items] **Large** **Small**

### Center

Select center speaker use and size.

[Selectable items] **Large** **Small** **None**

### Subwoofer

Select subwoofer use.

[Selectable items] **Yes** **No**

### Surround A

Select surround speakers A use and size.

[Selectable items] **Large** **Small** **None**

### Surround B

Select surround speakers B use and size.

[Selectable items] **Large** **Small** **None**

### Surround Back

Select surround back speaker use and size.

[Selectable items] **Large** **Small** **None**

**2spkrs** **1spkr**

**Large** : Select this for a large speaker with strong bass reproduction.

**Small** : Select this for a smaller speaker with weaker bass reproduction.

- Select “Large” or “Small” not according to the physical size of the speaker but according to the low frequency reproduction capabilities based on the frequency set at “Crossover Frequency” (page 29).
- When “Front” is set to “Small”, “Subwoofer” is automatically set to “Yes”.
- If “Subwoofer” is set to “No”, “Front” is automatically set to “Large”.
- If “Surround A” is set to “None”, “Surround B” and “Surround Back” are automatically set to “None”.
- When using just one surround back speaker, connect it to the left channel (SBL).

## 2 Subwoofer Mode

Select low range signal to be reproduced by subwoofer.

[Selectable items] **LFE** **LFE+Main**

- This can be set when GUI menu “Speaker Configuration” – “Subwoofer” is set to “Yes”.
- Play music or a movie source and select the mode offering the strongest bass.
- Select “LFE+Main” if you want the bass signals to always be produced from the subwoofer.

## 3 Distance

Set distance from listening position to speakers.  
Before making the settings, measure the distance from the listening position to the different speakers.

### Meters / Feet

Select unit for distance.

### Step

Select step. (smallest distance)

[Selectable items]

**0.1m** **0.01m** : Can be selected when “Meters” is set.

**1ft** **0.1ft** : Can be selected when “Feet” is set.

### Default

Resets the settings to the default values.

### Distance measurement

Select the speaker you want to set, then set the distance.  
Set the value closest to the measured distance.

[Variable range]

**0.00m ~ 18.00m** : Display when “Meters” is set.

**0.0ft ~ 60.0ft** : Display when “Feet” is set.

### NOTE

Set the distance between the listening position and the various speakers to no more than 6.00 meters (20.0 ft).

## 4 Channel Level

Adjust channel levels to obtain equal volume from all speakers.

### Mode

Select test tone playback method.

[Selectable items] **Auto** **Manual**

### Surround

Select surround speaker from which test tone is output.

[Selectable items] **A** **B** **A+B**

### Start

Output test tone.

[Variable range] **-12dB** ~ **0dB** ~ **+12dB**

### Default

Resets the settings to the default values.

### Operating from the main remote control unit

Adjusting with the main remote control unit using the test tones is only possible in the "Auto" mode and only effective in the STANDARD mode. The adjusted levels for the different modes are automatically stored in the memory.

#### [Adjusting using test tones]

- 1 Press the **TEST** button.  
Test tones are output from the various speakers.
- 2 Use the ◀ ▶ button to adjust so that the volume is equal for all speakers.
- 3 When the adjustments are completed, press the **TEST** button again.

- When the GUI menu "Speaker Configuration" – "Surround Back" setting (page 28) is set to "1spkr", the surround back speaker display is set to "Surround Back".
- Speakers set to "None" in the "Speaker Configuration" settings are not displayed.
- "Surround" can be set when GUI menu "Speaker Configuration" – "Surround B" is set to "Large" or "Small" (page 28).
- When using surround speakers, be sure to adjust the volume of the different speakers.
- When "Channel Level" is adjusted, the adjusted values are set for all the surround modes. To adjust the channel level separately for the different surround modes, use the operation see page 59.

## 5 Crossover Frequency

Select crossover frequency from which subwoofer handles low range signal.

### [Selectable items]

**40Hz** **60Hz** **80Hz** **90Hz** **100Hz** **110Hz**  
**120Hz** **150Hz** **200Hz** **250Hz**

Only the portion of the bass sound of the various speakers output from the subwoofer that has a frequency below the frequency set here is output.

Set this according to the low frequency reproduction capabilities of the speakers you are using.

### Advanced :

Set the crossover frequency separately for the different speakers.

- The "Crossover Frequency" can be set when there are speakers that have been set to "Small" at GUI menu "Speaker Configuration" or when "Subwoofer" is set to "Yes" (page 28).
- If in the "Advanced" settings, "Subwoofer Mode" (page 28) in the GUI menu is set to "LFE", it is possible to make this setting for speakers set to "Small" at "Speaker Configuration". If set to "LFE+Main", this setting can be made regardless of the speaker size.
- For speakers set to "Small", sound below the crossover frequency is cut from the sound output. The cut bass sound is output from the subwoofer or front speakers.
- Always set the crossover frequency to "80Hz". When using small speakers, however, we recommend setting the crossover frequency to a higher frequency.

## 6 Surround Speaker

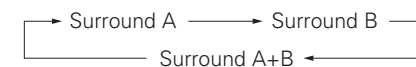

Select surround speakers to use for each surround mode.

[Selectable items] **A** **B** **A+B**

### Operating from the main remote control unit

Press the **SPKR** button.

- This can be set when GUI menu "Speaker Configuration" – "Surround A" and "Surround B" are used (page 28).
- When using the pre-out connectors, select and use either "Surround A" or "Surround B".
- Make the surround speaker settings when the input mode is set to "EXT. IN" at GUI menu "Manual Setup" – "Audio Setup" – "EXT. IN Setup" (page 30).

### About Speaker Type Setting when Using Both Surround speakers A and B

If "Small" is set for either surround speakers A or B, the output is the same as when "Small" is set for both A and B.

## HDMI Setup

Make settings for HDMI video/audio output.

### Menu tree

#### Manual Setup

#### HDMI Setup

- 1 i/p Scaler
- 2 Resolution
- 3 Progressive Mode
- 4 Aspect
- 5 Color Space
- 6 RGB Range
- 7 Auto Lip Sync
- 8 Audio

### 1 i/p Scaler

Make settings for i/p scaler function.

[Selectable items] **A to H** **A to H & H to H** **OFF**

A to H & H to H setting

- Deep color (10 bit/12 bit) signals are converted into 8-bit signals.
- The i/p scaler function does not work if xVYCC or computer's resolution signals are input.

### 2 Resolution

Make settings for resolution of HDMI video output signal.

[Selectable items] **Auto** **480p/576p** **1080i** **720p** **1080p**

This can be set when "i/p Scaler" is set to anything other than "OFF".

#### NOTE

- It is not possible to convert "1080i" signals into "720p" format.
- It is not possible to convert "720p" signals into "1080i" format.

### 3 Progressive Mode

Select optimum progressive mode for video material.

[Selectable items] **Auto** **Video1** **Video2**

This can be set when "i/p Scaler" is set to anything other than "OFF".

### 4 Aspect

This sets the aspect ratio when outputting 480i/576i or 480p/576p input signals from the HDMI output connector.

[Selectable items] **Full** **Normal**

This can be set when "i/p Scaler" is set to anything other than "OFF".

### 5 Color Space

Make settings for output color space.

[Selectable items] **YCbCr** **RGB**

When connected to a monitor with a DVI-D connector (HDCP compatible) using an HDMI/DVI converter cable, the signals are output in RGB format, regardless of this setting.

### 6 RGB Range

Make settings for RGB output range.

[Selectable items] **Normal** **Enhanced**

When "YCbCr" is selected under "Color Space," "RGB Range" will have no effect.

### 7 Auto Lip Sync

Automatic compensation for timing shift in audio and video output.

[Selectable items] **ON** **OFF**

### 8 Audio

Select HDMI audio output device.

[Selectable items] **Amp** **TV**

## Audio Setup

Make settings for audio playback.

### Menu tree

#### Manual Setup

#### Audio Setup

- 1 EXT.IN Setup
- 2 2ch Direct/Stereo
- 3 Downmix Option
- 4 Auto Surround Mode
- 5 Manual EQ

### 1 EXT. IN Setup

Make speaker settings for EXT. IN mode playback.

### Surround Speaker

Select the surround speakers to use.

[Selectable items] **A** **B** **A+B**

### Subwoofer Level

Set the subwoofer level for playback.

Select according to the player in use.

[Selectable items] **0dB** **+5dB** **+10dB** **+15dB**

We recommend setting to "+15 dB".

## 2 2ch Direct/Stereo

Make speaker settings for 2-channel mode playback.

### Setting

To change the settings, select “Custom”.

[Selectable items] **Basic** \* **Custom**

\*: Use the same settings as in “Speaker Setup”.

### Front

Select front speaker size.

[Selectable items] **Large** **Small**

### Subwoofer

Select subwoofer use.

[Selectable items] **Yes** **No**

### Subwoofer Mode

Select low range signal to be reproduced by subwoofer.

[Selectable items] **LFE** **LFE+Main**

### Crossover

Select crossover frequency from which subwoofer handles low range signal.

[Selectable items] **40Hz** **60Hz** **80Hz** **90Hz** **100Hz**  
**110Hz** **120Hz** **150Hz** **200Hz** **250Hz**

### Distance FL

Set distance from listening position to front left speaker.

[Variable range] **0.00m ~ 18.00m**

### Distance FR

Set distance from listening position to front right speaker.

[Variable range] **0.00m ~ 18.00m**

## 3 Downmix Option

Set dynamic range for downmix playback of Dolby Digital sources.

[Selectable items] **ON** **OFF**

- Set this to “ON” if the sound from the front speakers seems distorted.
- When not using the center speaker or surround speakers, the playback sound is down-mixed and output from the front speakers.

## 4 Auto Surround Mode

Make setting for memorizing surround mode setting for each input signal type.

[Selectable items] **ON** **OFF**

- The auto surround mode function lets you store in the memory the surround mode last used for playing the four types of input signals listed below.
  - ① Analog and PCM 2-channel signals
  - ② Dolby Digital and DTS 2-channel signals
  - ③ Dolby Digital and DTS multi-channel signals
  - ④ Multi-channel signals other than Dolby Digital and DTS (PCM, DSD, etc.)
- When playing in the PURE DIRECT mode, the surround mode does not change even if the input signal is changed.

## 5 Manual EQ

Adjust tonal quality for each speaker using graphic equalizer.

### Adjust CH

Select speaker adjustment method.

[Selectable items] **Each** **L/R** **All**

### Manual EQ

Select the speaker and frequency band and adjust the level.

[Selectable items] **63** **125** **250** **500** **1k** **2k** **4k**  
**8k** **16k**

[Variable range] **-20dB** ~ **0dB** ~ **+6dB**

### Curve Copy

Copy the Room EQ's “Audyssey Flat” correction curve.

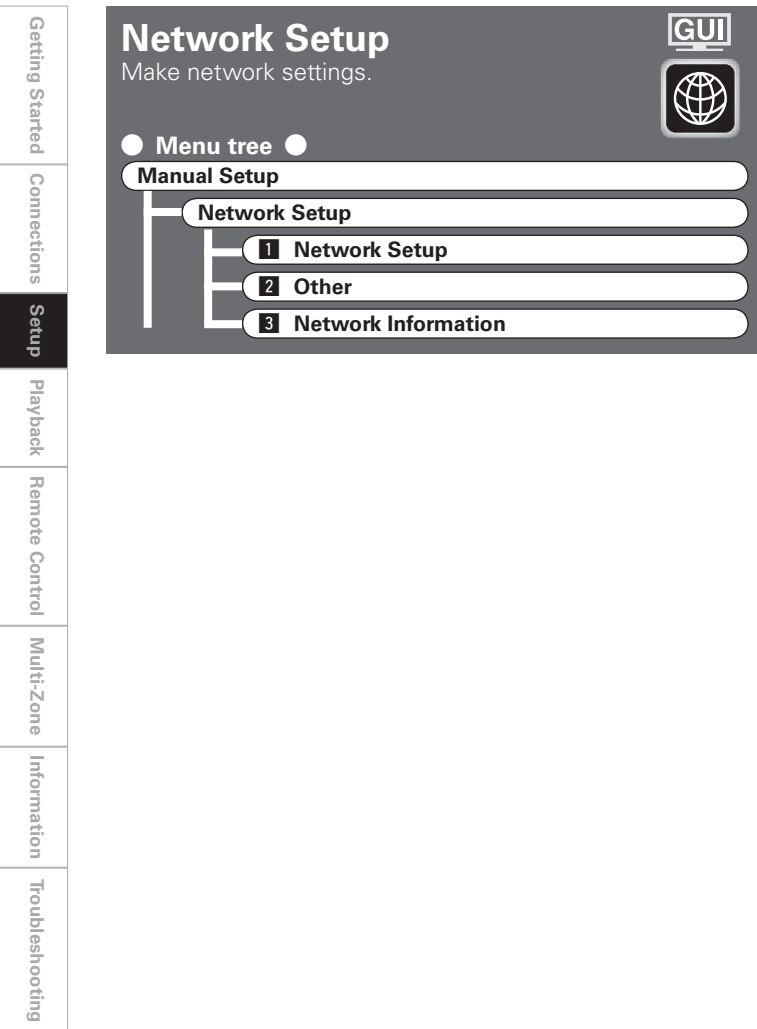

[Selectable items] **Yes** **No**

“Curve Copy” is displayed after the auto setup procedure has been performed.

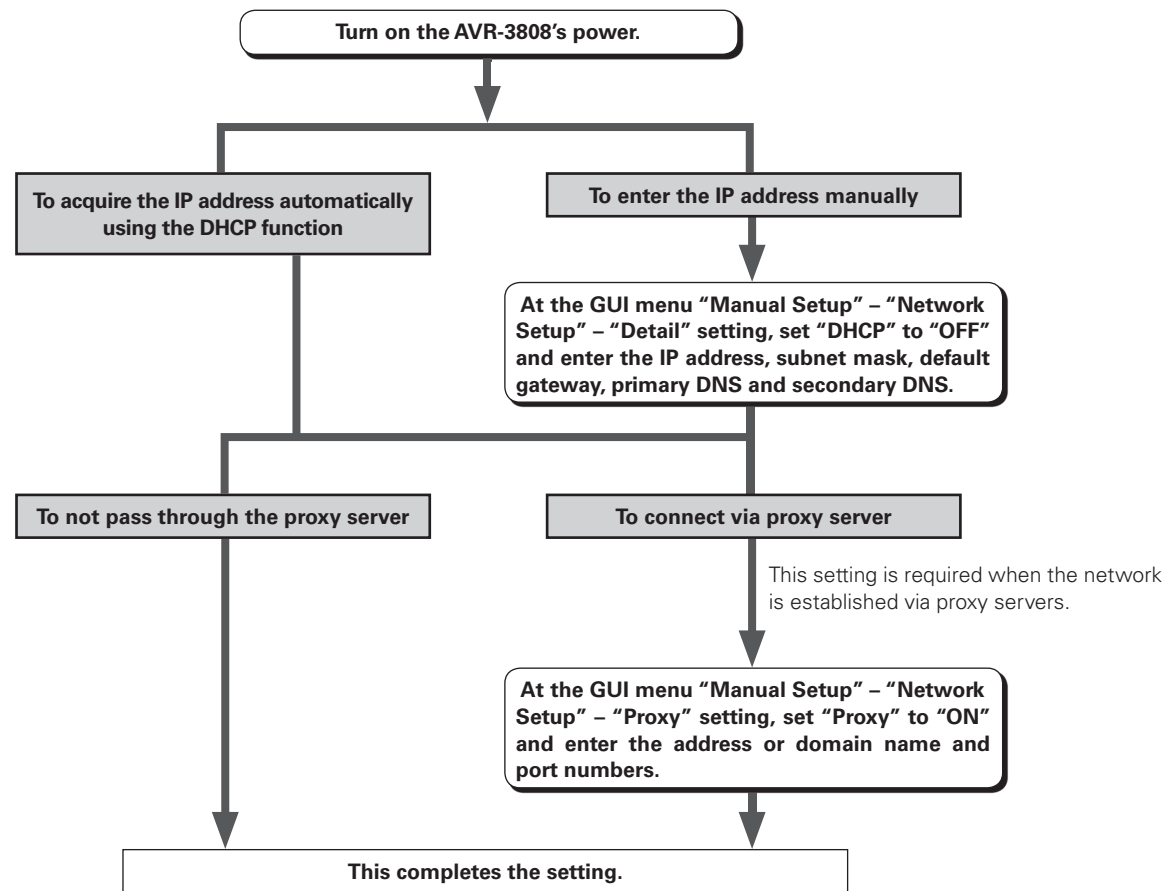

### Default

Resets the settings to the default values.

# 1 Network Setup

Make settings for LAN.

Recheck the connections and settings if you cannot connect to the Internet (☞ page 20).

**NOTE** Knowledge about networks is required to make the IP address and proxy settings. For details, consult a network administrator.

**2 Other**

Make setting for amp power save mode and computer language environment.

**Power Saving**

Make setting for power saving when not connected to network.

[Selectable items] **ON** **OFF**

**Character**

Set the character code type of the MP3 ID3-Tag played by USB.

[Selectable items] **Auto** **Latin** **Japanese**

If the characters are not properly displayed when set to "Auto", set to "Latin" or "Japanese".

**PC Language**

Select computer environment language.

[Selectable items] **ara** **chi (smp)** **chi (trad)** **cze** **dan**  
**dut** **eng** **fin** **fre** **ger** **gre** **heb**  
**hun** **ita** **jpn** **kor** **nor** **pol** **por**  
**por (BR)** **rus** **spa** **swe** **tur**

**3 Network Information**

Display network information.

[Items to be checked] **DHCP= ON or OFF** **IP Address**  
**MAC Address**

**Zone Setup**

Make settings for audio playback in a multi-zone system.

● Menu tree ●

Manual Setup

Zone Setup

1 ZONE2

2 ZONE3

**1 ZONE2**

Make settings for audio playback in a ZONE2 system.

**2 ZONE3**

Make settings for audio playback in a ZONE3 system.

**Bass**

Adjust low frequency range (bass).

[Variable range] **-10dB** ~ **0dB** ~ **+10dB**

**Treble**

Adjust high frequency range (treble).

[Variable range] **-10dB** ~ **0dB** ~ **+10dB**

**HPF**

When using speakers that cannot satisfactorily play low frequencies, distortion of the bass sound can be reduced by setting "HPF" to "ON".

[Selectable items] **ON** **OFF**

**Lch Level**

Adjust the left channel output level.

[Variable range] **-12dB** ~ **0dB** ~ **+12dB**

**Rch Level**

Adjust the right channel output level.

[Variable range] **-12dB** ~ **0dB** ~ **+12dB**

**Channel**

Switch between stereo and mono output.

[Selectable items] **Stereo** **Mono**

When GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" (page 34) is set to "ZONE (MONO)", the "Channel" setting is automatically set to "Mono".

**Volume Level**

Adjust the main volume level.

[Selectable items] **Variable** **-40dB** **0dB**

"Variable" is displayed when a power amplifier is assigned to the ZONE2 output channel at GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" (page 34).

**Volume Limit**

Make a setting for maximum volume.

[Selectable items] **OFF** **-20dB** **-10dB** **0dB**

**Power On Level**

Define the volume setting that is active when the power is turned on.

[Selectable items] **Last** **---** **-70dB ~ +18dB**

**Mute Level**

Set the amount of attenuation when muting is on.

[Selectable items] **Full** **-40dB** **-20dB**

## Option Setup

Make various other settings.

### Menu tree

#### Manual Setup

#### Option Setup

#### 1 Amp Assign

#### 2 Volume Control

#### 3 Source Delete

#### 4 GUI

#### 5 Quick Select Name

#### 6 Trigger Out 1

#### 7 Trigger Out 2

#### 8 Remote ID

#### 9 2Way Remote

#### 10 Dimmer

#### 11 Setup Lock

#### 12 Maintenance Mode

#### 13 Firmware Update

## 1 Amp Assign

Define how the amplifier for the surround back speaker channels is used.

The places where the surround back amplifier are used can be set freely according to the usage environment. This makes it possible to output sound to rooms other than the room (the main zone) where surround playback is performed (multi-zone playback) or play the sound with high quality using the front speakers (bi-amp connections).

### [Selectable items]

7.1CH ZONE2 ZONE3 ZONE(MONO) Bi-Amp 2CH

For details, see "Amp Assign / Multi-Zone Connections and Operations" (page 69 ~ 71).

## 2 Volume Control

Set the main zone volume setting.

### Volume Limit

Make a setting for maximum volume.

[Selectable items] OFF -20dB -10dB 0dB

### Power On Level

This sets the volume set when the main zone's power is turned on.

[Selectable items] Last --- -80dB ~ +18dB

### Mute Level

This sets the amount of attenuation of the volume when the mute mode is set in the main zone.

[Selectable items] Full -40dB -20dB

## 3 Source Delete

Remove input sources that are not used from the display.

[Selectable items] ON Delete

### NOTE

- Input sources being used in the various zones cannot be deleted.
- Input sources set to "Delete" cannot be selected from GUI menu "Source Select" or using the **SOURCE SELECT** knob on the main unit or **SOURCE SELECT** button on the remote control unit.

## 4 GUI

Make GUI related settings.

### Screensaver

Make screensaver settings.

Use the screensaver to prevent burn-in on the monitor screen. When set to "ON", the screensaver is activated if there is no activity for about 3 minutes.

[Selectable items] ON OFF

### Wall Paper

Change the GUI background.

[Selectable items] Picture Black Gray Blue

### Format

Select the video output signal format to match the monitor.

[Selectable items] PAL NTSC

### NOTE

When a format other than the video format of the connected monitor is set, the picture will not be displayed properly. Use the procedure described below to change the video format.

### Operating from the main unit

- ① Press and hold the **STATUS** and **RETURN** buttons for at least 3 seconds.  
"Video Format" appears on the display.
- ② Use the <|> button to make the setting.
- ③ Press the **ENTER**, **MENU** or **RETURN** button to complete the setting.

\*Video Format  
< PAL >

## Text

Text information display.

[Selectable items] **ON** **OFF**

## Master Volume

Master volume display during adjustment.

[Selectable items] **ON** **OFF**

## NET/USB / iPod / Tuner

This sets the time the on-screen display is displayed when an operation is performed.

[Selectable items] **Always** **30s** **10s** **OFF**

## 5 Quick Select Name

Change the Quick Select name.  
Up to 16 characters can be input.

[Input characters]

**A ~ Z** **a ~ z** **0 ~ 9**

**! " # % & ' ( ) \* + , - . / : ; < = > ? @ [ \ ] (space)**

## 6 Trigger Out 1

Select the conditions to turn on the trigger out 1 with respect to the zone, input source, surround mode, HDMI monitor, etc.

For details about the trigger out function, see page 21.

## 7 Trigger Out 2

This sets the conditions to turn on the trigger out 2, in the same way as "Trigger Out 1" above.

[Selectable items] **ON** **---**

## Setting with Respect to the Zone

- When the power of the zone turned on/off, the trigger out turns on.
- Associated with the power supply of zones set to "ON".

## Setting with Respect to the Input Source

- When the input source set to on is selected, the trigger out turns on.
- Associated with respect to the input source for zones set to "ON" at "Setting with Respect to the Zone".

## Setting with Respect to the Surround Mode

- When the surround mode set to on is selected, the trigger out turns on.
- Associated with respect to surround modes that are set to "ON".
- This can be set if the "MAIN ZONE" setting at "Setting with Respect to the Zone" is set to "ON".
- Associated when an input source for which "Setting with Respect to the Input Source" is set to "ON" is selected.

## Setting with Respect to the Monitor

- When the HDMI monitor set to on is selected, the trigger out turns on.
- Associated with respect to HDMI monitor that are set to "ON".
- This can be set if the "MAIN ZONE" setting at "Setting with Respect to the Zone" is set to "ON".
- Associated when an input source for which "Setting with Respect to the Input Source" is set to "ON" is selected.

## 8 Remote ID

Set remote control ID.

Match the ID setting of the remote control unit and the receiver.

[Selectable items] **1** **2** **3** **4**

- When changing the remote ID, also change the AMP, iPod, TU and NET/DTU modes of the main remote control unit at the same time (page 63).
- When changing the remote ID, also change the sub remote control unit at the same time (page 68).

## 9 2Way Remote

Make setting for 2-way remote control unit.

[Selectable items] **Used** **Not Used**

When using a 2-way remote control unit (RC-7000CI and RC-7001RCI, sold separately), set this to "Used".

## 10 Dimmer

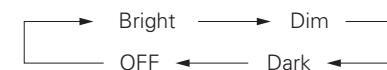

Adjust display brightness of the receiver.

[Selectable items] **Bright** **Dim** **Dark** **OFF**

## Operating from the main unit

Press the **DIMMER** button.

**11 Setup Lock**

Protect settings from inadvertent change.

[Selectable items] **ON** **OFF**

- When "Setup Lock" is set to "ON", the settings listed below can no longer be changed. Also, "SETUP LOCKED!" is displayed if you attempt to operate related buttons.
  - GUI menu operations
  - RESTORER
  - Night Mode
  - Parameter
  - Room EQ
  - Channel Level
  - Audio Delay
- To cancel the setting, press the **MENU** button to re-display the "Setup Lock" screen, then change the setting to "OFF".

**12 Maintenance Mode**

This sets the function for maintenance by a DENON serviceperson or installer. (For professional use only.)

This function allows a DENON serviceperson or installer to check the AVR-3808's status and make settings via the Internet.

**NOTE**

Only use this function if so instructed by a DENON serviceperson or installer.

**13 Firmware Update**

Update the firmware of the receiver.

[Selectable items]

**Start** :

Execute the update process.

When updating starts, the power indicator lights red. "Updating \* \* \*" is shown on the display during updating. Once updating is completed, "Updating complete" is displayed.

"Latest firmware" is displayed when the firmware is the latest version.

※ If the display reads as shown below, check the settings and network environment, then update again.

Display	Description
<b>Updating failed</b>	Updating failed.
<b>Login failed</b>	Failure to log into server.
<b>Server is busy</b>	Server is busy. Wait a while then try again.
<b>Connection failed</b>	Failure connecting to server.
<b>Regist failed</b>	Failure registering to server.

**NOTE**

- Connection to the network and specific settings are required to update the firmware. For details, see page 20, 32, 33.
- Do not turn off the power until updating is completed.
- Normally there is no need to use this function, aside from the cases described below.
  - The Firmware Update function is only used for updating the firmware (free or for a charge) via the Internet, for example for the purpose of adding functions to the AVR-3808 in the future.
  - Information regarding the Firmware Update function will be announced on the DENON web site each time related plans are defined.
  - A broadband connection to the Internet is required to use this function (☞ page 20).
  - Even with a broadband connection to the Internet, approximately 1 hour is required for the updating procedure to be completed. Once updating starts, normal operations on the AVR-3808 cannot be performed until updating is completed.
- Furthermore, updating the firmware may reset the backup data for the parameters, etc., set for the AVR-3808.

**Language**

This sets the language used on the display screens.

OFF

### NOTE

When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate. If this happens, please set the conversion mode to "OFF".

### Source Level

Corrects the playback level of the selected input source's audio input.

[Variable range]

-12dB

~

0dB

~

+12dB

For input sources for which "HDMI" and "Digital" are set at the GUI menu "Assign" setting, the analog input level and digital input level can be set separately.

## 8 Playback Mode (iPod)

Make settings for "iPod" playback.

### Repeat

Make settings for repeat mode.

[Input source] **CD** **DVD** **HDP** **TV/CBL** **SAT** **VCR**  
**DVR** **V.AUX**

[Selectable items] **All** **One** **OFF**

### Shuffle

Make settings for shuffle mode.

[Input source] **CD** **DVD** **HDP** **TV/CBL** **SAT** **VCR**  
**DVR** **V.AUX**

[Selectable items] **Songs** **Albums** **OFF**

This can be selected for input sources for which "Assign" is assigned at the "iPod dock" setting.

## 9 Assign

Assign input sources to input connectors.

### HDMI

Select HDMI connector to assign to this source.

[Input source] **DVD** **HDP** **TV/CBL** **SAT** **VCR**  
**DVR** **V.AUX**

[Selectable items] **1** **2** **3** **4** **None**

Input source	DVD	HDP	TV/CBL	SAT	VCR	DVR	V.AUX
Default setting	HDMI1	HDMI2	HDMI3	None	None	HDMI4	None

- With HDMI, the video and audio signals are transferred simultaneously. To play the video signal assigned at "HDMI" combined with the audio signal assigned at "Digital", select "Digital" at GUI menu "Source Select" – "Input Mode" (page 38).
- When the AVR-3808 and monitor are connected with an HDMI cable, if the monitor is not compatible with HDMI audio signal playback, only the video signals are output to the monitor.
- The audio signals input from the analog, digital and EXT. IN connectors are not output to the monitor.

### NOTE

This cannot be set for input sources for which "iPod dock" is assigned.

### Digital

Select digital input connector to assign to this source.

[Input source] **CD** **DVD** **HDP** **TV/CBL** **SAT**  
**VCR** **DVR** **V.AUX**

[Selectable items] **Coaxial1 ~ 3** **Optical1 ~ 4**  
**DENON LINK** \* **None**

Input source	CD	DVD	HDP	TV/CBL	SAT	VCR	DVR	V.AUX
Default setting	Coaxial 3	Coaxial 1	None	Coaxial 2	Optical 1	Optical 3	Optical 2	Optical 4

\*: When a DENON DVD player and the DENON LINK have been connected, be sure to make a setting to "DENON LINK".

### NOTE

- This cannot be set for input sources for which "iPod dock" is assigned.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB) input from the digital input connectors cannot be output from the ZONE2 and ZONE3 audio output connectors and the analog REC OUT connectors.

### Component

Select component video input to assign to this source.

[Input source] **DVD** **HDP** **TV/CBL** **SAT** **VCR**  
**DVR** **V.AUX**

[Selectable items] **1** **2** **3** **None**

Input source	DVD	HDP	TV/CBL	SAT	VCR	DVR	V.AUX
Default setting	Component 1	Component 2	Component 3	None	None	None	None

### NOTE

This cannot be set for input sources for which "iPod dock" is assigned.

### iPod dock

Assign Control Dock for iPod to this source.

[Input source] **CD** **DVD** **HDP** **TV/CBL** **SAT** **VCR**  
**DVR** **V.AUX**

[Selectable items] **Assign** **None**

- With the default settings, the Control Dock for iPod can be used connected to the VCR (iPod) connector.
- Even if "iPod dock" is set to "Assign", if the set is not connected to a Control dock for iPod, the input source can be used as the normal input source.

# 10 Playback Mode

Make settings for "NET/USB" playback.

[Input source]

# Surround Modes

GUI

## Standard Playback

This is the standard mode for enjoying surround sound according to the program source.

To select these surround modes pressing the **STANDARD** button on the main unit or press the **STD** button on the main remote control unit. The mode switches each time the button is pressed.

## Surround Playback of 2-channel Sources

☐ When using a surround back speaker

[Selectable items]

DOLBY PLIIx

DTS NEO:6

☐ When not using a surround back speaker

[Selectable items]

DOLBY PLII

DTS NEO:6

**DOLBY PLIIx**  
or **DOLBY PLII**

:The signals are decoded in DOLBY PLIIx or DOLBY PLII for playback.

→ **Cinema**

: This mode is suited for movie sources.

→ **Music**

: This mode is suited for music sources.

→ **Game**

: This mode is suited for games.

→ **Pro Logic**

: This is the Pro Logic playback mode. This can be selected when playing with a DOLBY PLII decoder. When this mode is selected, "DOLBY PL" is displayed.

**DTS NEO:6**

: The signals are decoded in DTS NEO:6 for playback.

→ **Cinema**

: This mode is suited for movie sources.

→ **Music**

: This mode is suited for music sources.

Select the "Cinema," "Music," "Game" and "Pro Logic" modes at GUI menu "Parameter" - "Audio" - "Surround Parameters" - "Mode" (page 42).

## Playing Multi-channel Sources (Dolby Digital, DTS, etc.)

[Selectable items]

**STANDARD**

This mode is for decoding the input signals according to their format and playing surround sound.

The display when the STANDARD mode is selected depends on the input signal and surround back output playback mode.

Input signal		Display
Dolby Digital Source	DOLBY DIGITAL (other than 2ch) / DOLBY DIGITAL EX	DOLBY DIGITAL DOLBY DIGITAL EX DOLBY DIGITAL+PLIIx CINEMA DOLBY DIGITAL+PLIIx MUSIC
	DOLBY DIGITAL Plus	DOLBY DIGITAL +
	DOLBY TrueHD	DOLBY TrueHD
	DTS (5.1ch) / DTS-ES Discrete 6.1 / DTS-ES Matrix 6.1 / DTS 96/24	DTS SURROUND DTS+PLIIx CINEMA DTS+PLIIx MUSIC DTS+NEO:6 DTS ES MTRX6.1 (*1) DTS ES DSCRT6.1 (*2) DTS 96/24 (*3)
DTS Surround Source	DTS-HD High Resolution Audio DTS-HD Master Audio	DTS-HD HI RES DTS-HD MSTR
	DVD-Audio, SACD	MULTI CH IN MULTI IN+PLIIx CINEMA MULTI IN+PLIIx MUSIC MULTI CH IN 7.1

\*1 : This is displayed when the input signal is "DTS-ES Matrix 6.1" and the AVR-3808's "AFDM" setting is set to "ON".

\*2 : This is displayed when the input signal is "DTS-ES Discrete 6.1".

\*3 : This is displayed when the input signal is "DTS 96/24".

For details, see page 78.

## DSP Simulation Playback

The desired mode according to the program source and viewing situation can be selected from among 10 DENON original surround modes.

The surround parameters can be adjusted (page 76, 77) to achieve an even more realistic, powerful sound field.

### [Selectable items]

- 7CH STEREO** : This mode is for enjoying stereo sound from all speakers.
- WIDE SCREEN** : This mode is for enjoying the atmosphere of viewing a movie on a large screen.
- SUPER STADIUM** : This mode is suited for viewing sports programs.
- ROCK ARENA** : This mode is for enjoying the atmosphere of a live concert in an arena.
- JAZZ CLUB** : This mode is for enjoying the atmosphere of a live concert in a jazz club.
- CLASSIC CONCERT** : This mode is for appreciating classical concert programs.
- MONO MOVIE** \* : This mode is for playing monaural movie sources with surround sound.
- VIDEO GAME** : This mode is suited for achieving surround sound with video games.
- MATRIX** : This mode lets you add a sense of expansion to stereo music sources.
- VIRTUAL** : This mode is for enjoying surround effects using only the front speakers or headphones.

\* : When playing sources recorded in monaural in the MONO MOVIE mode, the sound will be off balance with a single channel (left or right), so input to both channels.

- To select these surround modes using the buttons on the main remote control unit, press the **SIMU** button. The mode switches each time the button is pressed.
- Depending on the program source being played, it may not be possible to achieve a satisfactory surround effect. In this case, try other modes to achieve a sound field suited to your tastes.

## Stereo Playback

### [Selectable items]

#### STEREO :

This is the mode for playing in stereo. The tone can be adjusted. Sound is output from the front left and right speakers and subwoofer.

## Direct Playback

### [Selectable items]

#### DIRECT :

In this mode the signals bypass the tone control circuitry for high quality sound.

The sound is output to the same channels as the input signal.

The display when the DIRECT mode is selected depends on the input signal.

For multi-channel sources, the display depends on the surround back output's play mode.

Input signal	Display
Analog signal / PCM (2ch) / Dolby Digital source / DTS source / Other 2-channel digital signals	DIRECT
DSD (2ch)	DSD DIRECT (*)
PCM (multi ch)	MULTI CH DIRECT
	M DIRECT + PLIIx CINEMA
	M DIRECT + PLIIx MUSIC
	M DIRECT 7.1
DSD (multi ch)	DSD MULTI DIRECT (*)

\* : When DSD signals are converted to PCM signals as set by the audio parameters and speaker settings, "DIRECT" or "MULTI CH DIRECT" is displayed.

For details, see page 79.

## Playback in the PURE DIRECT Mode

This is the mode that recreates the original sound most faithfully, providing extremely high quality sound.

**Press the PURE DIRECT button on the main unit or the PURE button on the main remote control unit.**

- When in the PURE DIRECT mode, the GUI screen is not displayed and the display on the main unit is turned off.
- If the HDMI input connector is selected, video outputs are output in the PURE DIRECT mode.
- The channel level and surround parameters in the PURE DIRECT mode are the same as in the DIRECT mode.

## Parameter

Parameters can be called out directly by pressing the **PARA** button on the main remote control unit.

## Audio

Adjust various audio parameters.

### Menu tree

#### Parameter

#### Audio

#### 1 Surround Parameters

#### 2 Tone

#### 3 Room EQ

#### 4 RESTORER

#### 5 Night Mode

#### 6 Audio Delay

### 1 Surround Parameters

Adjust surround sound parameters.

The adjustable parameters differ for the different surround modes (see page 76, 77).

## Mode

Select the mode according to the playback source.

### [Selectable items]

In the PLIIx or PLII mode: **Cinema** **Music** **Game**  
**Pro Logic** \*

In the DTS NEO:6 mode: **Cinema** **Music**

\*: Can be selected in the PLII mode.

The “Music” mode is also effective for movie sources including a lot of stereo music.

## Cinema EQ

Soften the treble range of movie soundtracks for better understanding.

[Selectable items] **ON** **OFF**

## DRC

Compress dynamic range (difference between loud and soft sounds).

[Selectable items] **Auto** **Low** **Middle** **High** **OFF**

This can be set in the Dolby TrueHD mode.

## D.COMP

Compress dynamic range (difference between loud and soft sounds).

[Selectable items] **OFF** **Low** **Middle** **High**

When playing DTS sources, this is only displayed for compatible software.

## LFE

Adjust the low-frequency effects level (LFE).

[Variable range] **-10dB** ~ **0dB**

For proper playback of the different program sources, we recommend setting to the values below.

- Dolby Digital sources: “0 dB”
- DTS movie sources: “0 dB”
- DTS music sources: “-10 dB”

## Center Image

Assign center channel signal to front left and right channels for wider sound.

[Variable range] **0.0** ~ **0.3** ~ **1.0**

## Panorama

Assign front L/R signal also to surround channels, for wider sound.

[Selectable items] **ON** **OFF**

## Dimension

Shift sound image center to front or rear, to adjust playback balance.

[Variable range] **0** ~ **3** ~ **6**

## Center Width

Assign center channel signal to front left and right channels for wider sound.

[Variable range] **0** ~ **3** ~ **7**

## Delay Time

Adjust delay time to control sound stage size.

[Variable range] **0 ms** ~ **30 ms** ~ **300 ms**

## Effect

Switch effect signal for multi-surround speakers on and off.

[Selectable items] **ON** **OFF**

## Effect Level

Adjust effect signal level.

[Variable range] 1 ~ 10 ~ 15

Set to a lower level if the positioning and sense of phase of the surround signals seems unnatural.

## Room Size

Determine size of acoustic environment.

[Selectable items] Small Medium small Medium  
Medium large Large

### NOTE

"Room Size" does not indicate the size of the room in which sources are played.

## AFDM

Auto-select surround mode by source.

This function only works for software containing a special identification signal.

If the software being played is recorded in Dolby Digital EX or DTS-ES, it is played in 6.1-channels. If not, it is played in 5.1-channels.

[Selectable items] ON OFF

### Example : Playing Dolby Digital software (with EX flag)

- When "AFDM" is set to "ON", the surround mode is automatically set to the DOLBY D + PLIIx C mode.
- To play in the DOLBY DIGITAL EX mode, set "AFDM" to "OFF" and "SB CH Out" to "MTRX ON".

Some Dolby Digital EX sources do not include EX flags. If the playback mode does not switch automatically even when "AFDM" is set to "ON", set "SB CH Out" to "MTRX ON" or "PLIIx CINEMA".

## SB CH Out (for Multi-channel sources)

Select playback mode for surround back channels.

[Selectable items]

NON MTRX MTRX ON PLIIx CINEMA \*1 PLIIx MUSIC \*2  
ES MTRX \*3 ES DSCRT \*4 DSCRT ON OFF

\*1: This can be selected when "Surround Back" is set to "2spkr" at the GUI menu "Manual Setup" – "Speaker Setup" – "Speaker Configuration" setting (page 28).

\*2: This can be selected when "Surround Back" is set to "2spkr" or "1spkr" at the GUI menu "Manual Setup" – "Speaker Setup" – "Speaker Configuration" setting.

\*3: This can be selected when playing DTS sources.

\*4: This can be selected when playing DTS sources including a discrete 6.1-channel signal identification signal.

## SB CH Out (for 2-channel sources)

Determine whether to use surround back speakers.

[Selectable items] ON OFF

## Subwoofer Att.

Attenuate subwoofer level when using EXT. IN mode.

[Selectable items] ON OFF

Set this to "ON" if the subwoofer channel level seems too high when playing Super Audio CD.

## Subwoofer

Turn subwoofer output on and off.

[Selectable items] ON OFF

## Default

Resets the settings to the default values.

## 2 Tone

Adjust the tonal quality of the sound.

## Tone Defeat

Turn tone adjustments off.

[Selectable items] ON OFF

The tone cannot be adjusted when in the DIRECT mode.

## Bass

Adjust low frequency range (bass).

[Variable range] -6dB ~ +6dB

## Treble

Adjust high frequency range (treble).

[Variable range] -6dB ~ +6dB

"Bass" and "Treble" can be set when "Tone Defeat" is set to "OFF".

3 Room EQ

Select room equalizer for current environment.

[Selectable items]

- Audyssey** : Optimize frequency response of all speakers.
- Audyssey Byp. L/R** : Optimize frequency response of speakers except front L and R speakers.
- Audyssey Flat** : Optimize frequency response of all speakers to flat response.
- Manual** : Apply frequency response set with “Manual EQ” (page 31).
- OFF** : Turn equalizer off.

 **Operating from the main unit or main remote control unit**

Press the **ROOM EQ** button on the main unit or the **EQ** button on the main remote control.

When “Audyssey” is selected, “**AUDYSSEY MULTEQ XT**” lights.  
When “Audyssey Byp. L/R” or “Audyssey Flat” is selected, or when the auto setup measuring results have changed, “**AUDYSSEY MULTEQ XT**” lights.

- “Audyssey”, “Audyssey Byp. L/R” and “Audyssey Flat” can be selected after the auto setup procedure has been performed.
- If the settings of the speakers for which “None” has been determined at “Auto Setup” are changed, “Audyssey”, “Audyssey Byp. L/R” and “Audyssey Flat” cannot be selected and measurements have to be taken again to include the newly-added speakers.
- When using headphones, “Room EQ” is always set to “OFF”.

4 RESTORER

This function restores compressed audio signals to how they were before compression and corrects the sense of volume of the bass and treble to obtain richer playback sound.

[Selectable items]

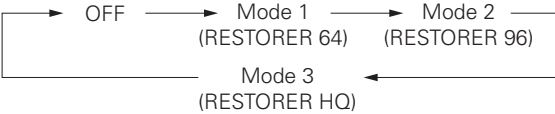

- OFF**
- Mode1** (RESTORER 64)
- Mode2** (RESTORER 96)
- Mode3** (RESTORER HQ)

The default setting for “NET/USB” and “iPod” is “Mode3”. All others are set to “OFF”.

 **Operating from the main unit or main remote control unit**

During playback, press the **RESTORER** button on the main unit or the **RSTR** button on the main remote control unit.

When set to something other than “OFF”, “**RESTORER**” is displayed.

**About the RESTORER function**

- Such compressed audio formats as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The RESTORER function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.
- This is displayed on the GUI menu and can be set when the input source is set to “NET/USB” or when analog signals (including AM/FM signals) or PCM signals (fs = 44.1/48 kHz) are input.

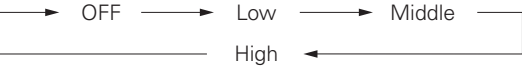

5 Night Mode

Optimized setting for late-night listening.

[Selectable items] **OFF** **Low** **Middle** **High**

 **Operating from the main remote control unit**

Press the **NGT** button.  
The “**NIGHT**” indicator lights when “Low”, “Middle” or “High” is selected.

6 Audio Delay

Compensate for mismatched timing between video and audio.

Delay audio.  
This sets the delay time for audio signals.

[Variable range] **0 ms** ~ **200 ms**

 **Operating from the main unit or main remote control unit**

- ① Press the **AUDIO DELAY** button on the main unit or the **A. DL** button on the main remote control unit.
- ② Use the **<|>** button to set.

- This cannot be adjusted when playing in the EXT. IN, DIRECT or STEREO mode (with “Front” set to “Large”, “Tone Defeat” to “ON” and “Room EQ” to “OFF”).
- The adjustment range is 0 to 100 ms when the Auto Lipsync Correction function is activated.

## Picture Adjust

Adjust the picture quality.

### Menu tree

#### Parameter

#### Picture Adjust

- 1 Contrast
- 2 Brightness
- 3 Chroma Level
- 4 Hue

### 1 Contrast

Adjust picture contrast.

[Variable range]    -6 ~ 0 ~ +6

### 2 Brightness

Adjust picture brightness.

[Variable range]    0 ~ +12

### 3 Chroma Level

Adjust picture chroma level (saturation).

[Variable range]    -6 ~ 0 ~ +6

### 4 Hue

Adjust color hue.

[Variable range]    -6 ~ 0 ~ +6

- Adjusting the “Contrast”, “Brightness”, “Chroma Level” and “Hue” settings does not affect the HDMI input signal.
- “Hue” can be adjusted for composite video and S-Video signals.
- The adjustment values are stored for the individual input sources.

## Information

### Status

Shows information about current settings.

### Menu tree

#### Information

#### Status

- 1 MAIN ZONE
- 2 ZONE2/3

### 1 MAIN ZONE

Shows information about audio input signals.

### Menu tree

#### Information

#### Audio Input Signal

#### [Items to be checked]

<b>Surround Mode</b>	: The currently set surround mode is displayed.
<b>Signal</b>	: The input signal type is displayed.
<b>fs</b>	: The input signal's sampling frequency is displayed.
<b>Format</b>	: The number of channels in the input signal (front, surround, LFE) is displayed.
<b>Offset</b>	: The dialogue normalization correction value is displayed.
<b>Flag</b>	: “MATRIX” is displayed if the input signal has undergone matrix processing, “DISCRETE” if the input signal has undergone discrete processing.

### Dialogue normalization function

This is automatically activated when playing Dolby Digital sources. This function automatically corrects the standard signal level for individual program sources. The correction value can be checked using the **STATUS** button on the main unit.

```
Dial.Norm
Offset - 4dB
```

The figure is the correction value when the standard level is corrected.

## Playback

### Preparations

#### Turning the Power On

- 1 Press **<POWER>**.  
The power indicator lights red and the power is set to the standby mode.
- 2 Press **<ON/STANDBY>** or **[POWER ON]**.  
The power indicator flashes green and the power turns on.

To operate the AVR-3808 using the main remote control unit, set the remote control unit to the AMP mode (see page 60 "Remote Control Unit Operations").

#### Turning the Power Off

- ① Press **<ON/STANDBY>** or **[POWER OFF]**.  
The power is set to the standby mode.
- ② Press **<POWER>**.  
The power indicator turns off, and so does the power.

#### NOTE

Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time or when traveling, either press **<POWER>** to turn off the power, or unplug the power cord from the power outlet.

### Operations During Playback

#### Adjusting the Master Volume

Either turn **<MASTER VOLUME>** or press **[MASTER VOLUME]**.

#### Turning Off the Sound Temporarily (Muting)

Press **[MUTE]**.

To cancel, press **[MUTE]** again. Muting can also be canceled by adjusting the master volume.

#### Listening with Headphones

Plug the headphones into **<PHONES>**.

The sound from the speakers and pre-out connectors is automatically cut.

#### NOTE

Be careful not to set the volume too high when using headphones.

### Playing Video and Audio Equipment

#### Basic Operation

#### 1 Prepare the equipment.

- ① Load the DVD, CD or other software in the player.  
(See the operating instructions of the respective devices.)
- ② To play a video device, switch the monitor input.  
(See the monitor's operating instructions.)

#### 2 To operate using the main remote control unit, set the remote control unit to the AMP mode.

(See page 60 "Remote Control Unit Operations")

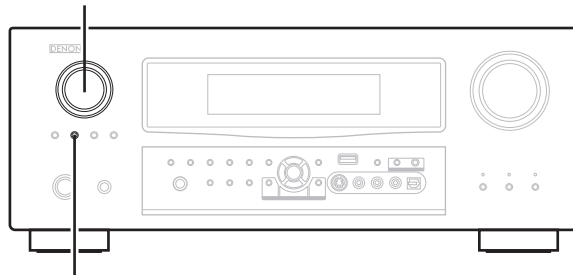

#### 3 Use SOURCE SELECT to select the input source.

**GUI** : "Source Select" (See page 37)

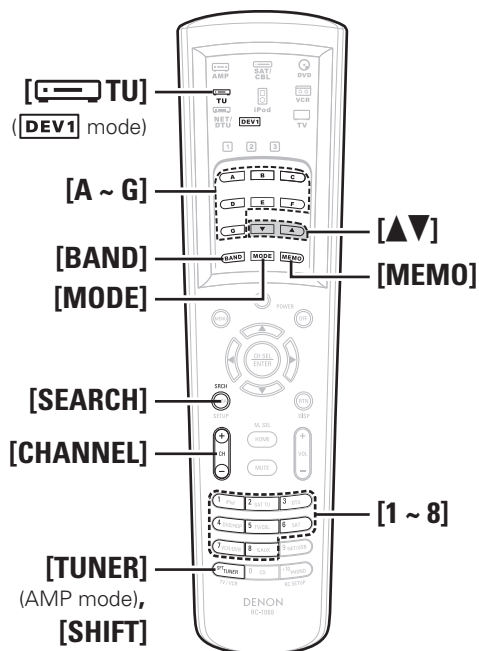

#### 4 Start playback.

(See the operating instructions of the respective devices.)

## <SOURCE SELECT>

## <TUNING PRESET>

### About the button names in these explanations

- < > : Buttons on the main unit

#### Button name only:

Buttons on the main unit and remote control unit

## Listening to FM/AM Broadcasts

### Basic Operation

**1** Either turn <SOURCE SELECT> or press [TUNER] (AMP mode) to select “TUNER”.

GUI : “Source Select” (page 37)

**2** To operate using the main remote control unit, set the remote control unit to the TUNER ([DEV1]) mode. (page 60 “Remote Control Unit Operations”)

**3** Press [BAND] to select “FM” or “AM”.

**4** Tune in the desired broadcast station.

#### ① To tune in automatically (Auto Tuning)

Press [MODE] to light the “AUTO” indicator on the display, then use [▲▼] to select the station you want to hear.

#### ② To tune in manually (Manual Tuning)

Press [MODE] to turn off the display’s “AUTO” indicator, then use [▲▼] to select the station you want to hear.

- It is also possible to switch to “FM” or “AM” in step 1 by pressing [TUNER].
- If the desired station cannot be tuned in with auto tuning, tune it in manually.
- When tuning in stations manually, press and hold [▲▼] to change frequencies continuously.
- The time for which the GUI menus are displayed can be set at GUI menu “Manual Setup” – “Option Setup” – “GUI” – “Tuner” (page 35).

## Presetting Radio Stations (Preset Memory)

Your favorite broadcast stations can be preset so that you can tune them in easily. Up to 56 stations can be preset.

**1** Tune in the broadcast station you want to preset.

**2** Press [MEMO].

**3** Press [A ~ G] to select the block in which the station is to be preset, then press [CHANNEL] or [1 ~ 8] to select the preset number.

※ The memory block can also be selected by pressing [SHIFT].

**4** Press [MEMO] again to complete the setting.

- To preset other stations, repeat steps 1 to 4.
- Stations can be preset automatically at GUI menu “Source Select” – “Tuner” – “Auto Preset” (page 37).

### NOTE

Preset stations are erased by overwriting them.

## Listening to Preset Stations

### Operation on the Main Unit

Press **<TUNING PRESET>**, then turn **<SOURCE SELECT>** to select the preset radio station.

### Operation on the Main Remote Control Unit

**1** Press **[A ~ G]** to select the memory block.

**2** Press **[CHANNEL]** or **[1 ~ 8]** to select the desired preset channel.

#### □ Default settings

Auto tuner presets	
A1 ~ A8	87.5 / 89.1 / 98.1 / 108.0 / 90.1 / 90.1 / 90.1 / 90.1 MHz
B1 ~ B8	522 / 603 / 999 / 1404 / 1611 kHz, 90.1 / 90.1 / 90.1 MHz
C1 ~ C8	90.1 MHz
D1 ~ D8	90.1 MHz
E1 ~ E8	90.1 MHz
F1 ~ F8	90.1 MHz
G1 ~ G8	90.1 MHz

## RDS (Radio Data System)

RDS (works only on the FM band) is a broadcasting service which allows a station to send additional information along with the regular radio program signal.

The following three types of RDS information can be received with this unit:

### Program Type (PTY)

PTY identifies the type of RDS program.

The program types and their displays are as follows:

<b>NEWS</b>	News	<b>WEATHER</b>	Weather
<b>AFFAIRS</b>	Current Affairs	<b>FINANCE</b>	Finance
<b>INFO</b>	Information	<b>CHILDREN</b>	Children's programmes
<b>SPORT</b>	Sports	<b>SOCIAL</b>	Social Affairs
<b>EDUCATE</b>	Education	<b>RELIGION</b>	Religion
<b>DRAMA</b>	Drama	<b>PHONE IN</b>	Phone In
<b>CULTURE</b>	Culture	<b>TRAVEL</b>	Travel
<b>SCIENCE</b>	Science	<b>LEISURE</b>	Leisure
<b>VARIED</b>	Varied	<b>JAZZ</b>	Jazz Music
<b>POP M</b>	Pop Music	<b>COUNTRY</b>	Country Music
<b>ROCK M</b>	Rock Music	<b>NATION M</b>	National Music
<b>EASY M</b>	Easy Listening Music	<b>OLDIES</b>	Oldies Music
<b>LIGHT M</b>	Light Classical	<b>FOLK M</b>	Folk Music
<b>CLASSICS</b>	Serious Classical	<b>DOCUMENT</b>	Documentary
<b>OTHER M</b>	Other Music		

### Traffic Program (TP)

TP identifies programs that carry traffic announcements.

This allows you to easily find out the latest traffic conditions in your area before leaving home.

### Radio Text (RT)

RT allows RDS stations to send text messages that appear on the display.

#### NOTE

The operations described below using **[SEARCH]** will not function in areas in which there are no RDS broadcasts.

## RDS Search

Use this function to automatically tune to FM stations that provide the RDS service.

**1** Either turn **<SOURCE SELECT>** or press **[TUNER]** (AMP mode) to select "TUNER".

**2** To operate using the main remote control unit, set the remote control unit to the TUNER (**[DEV1]**) mode.  
(☞ page 60 "Remote Control Unit Operations")

**3** Press **[SEARCH]** to select "RDS".

**4** Press **[CHANNEL]**.

The search for RDS stations begins automatically.

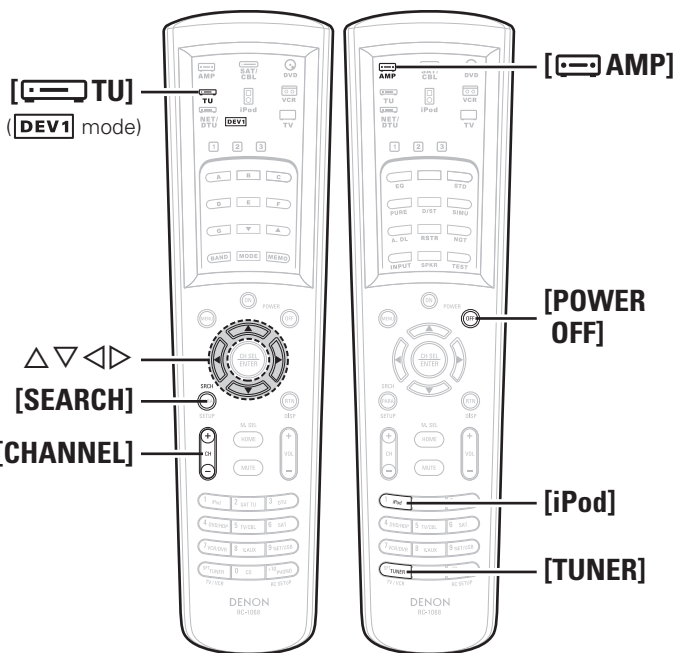

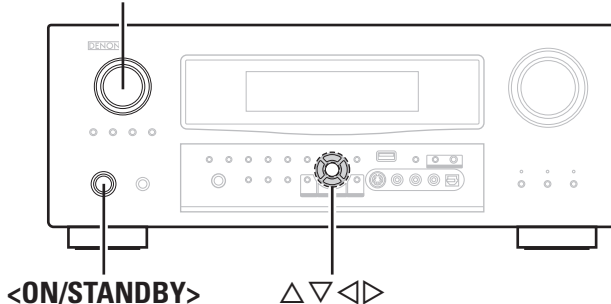

※ If no RDS stations are found with the above operation, all the reception bands are searched.

※ When a broadcast station is found, that station's name appears on the display.

**5** To continue searching, repeat steps 2 to 3.

※ If no RDS station is found when all the frequencies have been searched, "NO RDS" is displayed.

## <SOURCE SELECT>

### About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

## PTY Search

Use this function to find RDS stations broadcasting a designated program type (PTY).  
For a description of each program type, refer to "Program Type (PTY)".

- 1 Either turn <SOURCE SELECT> or press [TUNER] (AMP mode) to select "TUNER".
- 2 To operate using the main remote control unit, set the remote control unit to the TUNER ([DEV1]) mode.  
(☞ page 60 "Remote Control Unit Operations")
- 3 Press [SEARCH] to select "PTY".
- 4 Watching the display, press  $\Delta \nabla$  to call out the desired program type.
- 5 Press [CHANNEL].  
PTY search begins automatically.  
※ If there is no station broadcasting the designated program type with the above operation, all the reception bands are searched.  
※ The station name is displayed on the display after searching stops.
- 6 To continue searching, repeat steps 2 to 4.  
※ If no station broadcasting the designated program type is found when all the frequencies have been searched, "NO PROGRAMME" is displayed.

## TP Search

Use this function to find RDS stations broadcasting traffic programs (TP stations).

- 1 Either turn <SOURCE SELECT> or press [TUNER] (AMP mode) to select "TUNER".
- 2 To operate using the main remote control unit, set the remote control unit to the TUNER ([DEV1]) mode.  
(☞ page 60 "Remote Control Unit Operations")
- 3 Press [SEARCH] to select "TP".
- 4 Press [CHANNEL].  
TP search begins automatically.  
※ If no TP station is found with the above operation, all the reception bands are searched.  
※ The station name is displayed on the display after searching stops.
- 5 To continue searching, repeat steps 2 to 3.  
※ If no other TP station is found when all the frequencies have been searched, "NO PROGRAMME" is displayed.

## RT (Radio Text)

"RT" appears on the display when radio text data is received.

**1** Either turn **<SOURCE SELECT>** or press **[TUNER]** (AMP mode) to select "TUNER".

**2** To operate using the main remote control unit, set the remote control unit to the **TUNER (DEV1)** mode.  
(☞ page 60 "Remote Control Unit Operations")

**3** Press **[SEARCH]** to select "RT".

- ※ While receiving an RDS broadcast station, the text data broadcast from the station is displayed.
- ※ To turn the display off, press **<D>**.
- ※ If no text data is being broadcast, "NO TEXT DATA" is displayed.

## iPod® Playback

The music on an iPod can be played by using the Control Dock for iPod (ASD-1R, sold separately).

The operation can also be performed using the buttons on the main unit or remote control unit while watching the GUI menus.

iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

- ※ The iPod may only be used to copy or play contents that are not copyrighted or contents for which copying or playback is legally permitted for your private use as an individual. Be sure to comply with applicable copyright legislation.

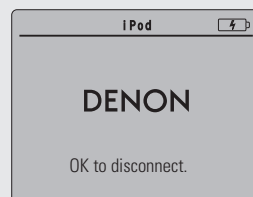

## Basic Operation

**1** Make the necessary preparations.

- ① Set the iPod in the DENON Control Dock for iPod.  
(☞ See the Control Dock for iPod's operating instructions.)
- ② Assign the Control Dock for iPod's input.

**GUI** : "Source Select" – "(input source)" – "Assign" – "iPod dock" (☞ page 39)

**2** Either turn **<SOURCE SELECT>** or press **[iPod]** (AMP mode) to select the input source assigned in step 1-② above.

(iPod screen)

- ※ If the screens above are not displayed, the iPod may not be properly connected. Try connecting again.

**GUI** : "Source Select" – "(input source)" – "Play"  
(☞ page 37)

**3** To operate using the main remote control unit, set the remote control unit to the **iPod** mode.

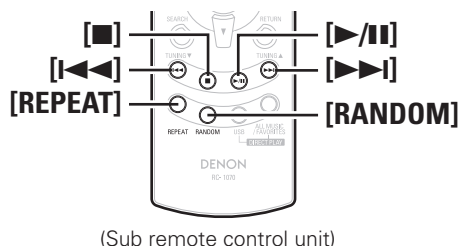

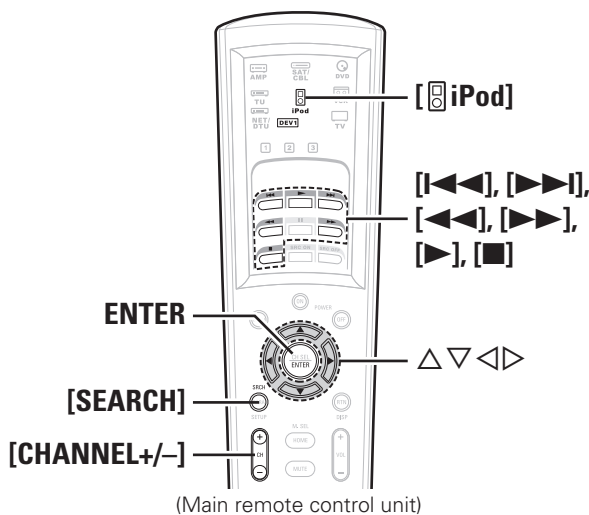

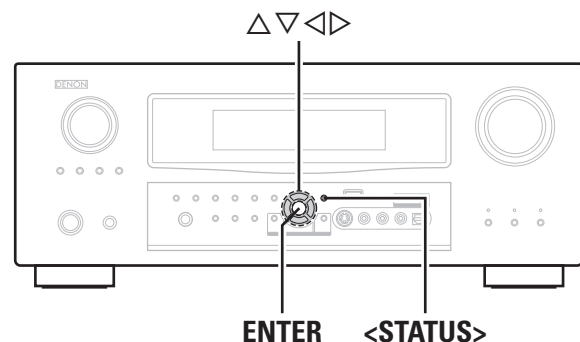

(☞ page 60 "Remote Control Unit Operations")

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- Press **<ON/STANDBY>** or **[POWER OFF]** and set the AVR-3808's power to the standby mode before disconnecting the iPod. Also switch the input source to one to which the GUI menu "iPod dock" is not assigned before disconnecting the iPod.

### NOTE

- Depending on the type of iPod and the software version, some functions may not operate.
- DENON will accept no responsibility whatsoever for any loss of iPod data.

Buttons on the main unit and remote control unit

## Listening to Music

**1** Use **Δ ∇** to select the menu, then press **ENTER** or **>** to select the music file to be played.

**2** Press **ENTER** or **>**.  
Playback starts.

### Stopping playback temporarily

During playback, press **ENTER** or **[>]**.

Press again to resume playback.

### Fast-forwarding or fast-reversing

During playback, either press and hold **Δ** (to fast-reverse) or **∇** (to fast-forward), or press **[<<]** or **[>>]**.

### To cue to the beginning of a track

During playback, either press **Δ** (to cue to the previous track) or **∇** (to cue to the next track), or press **[<<]** or **[>>]**.

### To stop

During playback, either press and hold **ENTER** or press **[■]**.

### Playing repeatedly

Press **[CHANNEL -]** or **[REPEAT]** on the sub remote control unit.

[Selectable items] **All** **One** **OFF**

**GUI** : "Source Select" – "(input source)" –  
"Playback Mode (iPod)" – "Repeat" (page 39)

## Shuffling playback

Press **[CHANNEL +]** or **[RANDOM]** on the sub remote control unit.

[Selectable items] **Albums** **Songs** **OFF**

**GUI** : "Source Select" – "(input source)" –  
"Playback Mode (iPod)" – "Shuffle" (page 39)

## Searching up or down pages

Press **[SEARCH]**, then press **<** (down) or **>** (up).

To cancel, press **Δ ∇** or **[SEARCH]**.

## To switch between the Browse and Remote modes

Either press and hold **[SEARCH]**.

- The title name, artist name and album name can be checked by pressing **<STATUS>** during playback.
- On the AVR-3808, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with " . (period)".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "iPod" (page 35).

## Viewing Still Pictures or Videos on the iPod

Photo and video data on the iPod can be viewed on the monitor. (Only for iPod equipped with slideshow or video functions.)

**1** Press and hold **[SEARCH]** to set the Remote mode.

**2** Watching the iPod's screen, use **Δ ∇** to select "Photos" or "Video".

**3** Press **ENTER** until the image you want to view is displayed.

"TV Out" at the iPod's "Slideshow Settings" or "Video Settings" must be set to "On" in order to display the iPod's photo data or videos on the monitor. For details, see the iPod's operating instructions.

## Playing Network Audio or USB Memory Devices

This procedure can be used to play Internet radio stations or music files stored on a computer or USB memory device.

### □ About the Internet radio function

- Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be tuned in.

The AVR-3808 is equipped with the following Internet radio functions:

- Stations can be selected by genre and region.
- Up to 56 Internet radio stations can be preset.
- Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
- Your favorite radio stations can be registered by accessing an exclusive DENON Internet radio URL from a Web browser on a computer.

※ The function is managed for individual users, so you must provide your MAC or e-mail address.

Exclusive URL: <http://www.radiodenon.com>

※ The radio station database service may be suspended without notice.

- The AVR-3808's Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for the AVR-3808.  
vTuner services may be discontinued without notice.

### □ Music server

This function lets you play music files and playlists (m3u, wpl) stored on a computer (music server) connected to the AVR-3808 via a network.

With the AVR-3808's network audio playback function, connection to the server is possible using one of the technologies below.

- Windows Media Player Network Sharing Service
- Windows Media DRM10

### □ USB memory devices

A USB memory device can be connected to the AVR-3808's USB port to play music files stored on the USB memory device.

- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-3808.
- The AVR-3808 is compatible with USB memory devices in "FAT16" or "FAT32" format.

[Compatible formats]

	Internet radio	Music server※	USB※
<b>WMA</b> (Windows Media Audio)	○	○	○*
<b>MP3</b> (MPEG-1 Audio Layer-3)	○	○	○
<b>WAV</b> *	—	○	○
<b>MPEG-4 AAC</b>	—	○*	○*
<b>FLAC</b> (Free Lossless Audio Codec)	—	○	○

A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

\*: Only files that are not protected by copyright can be played on the AVR-3808.

Contents downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc., on a computer may be copyright protected, depending on the computer's settings.

※ Music server and USB

- The AVR-3808 is compatible with MP3 ID3-Tag (Ver. 2) standards.
- The AVR-3808 is compatible with WMA META tags.

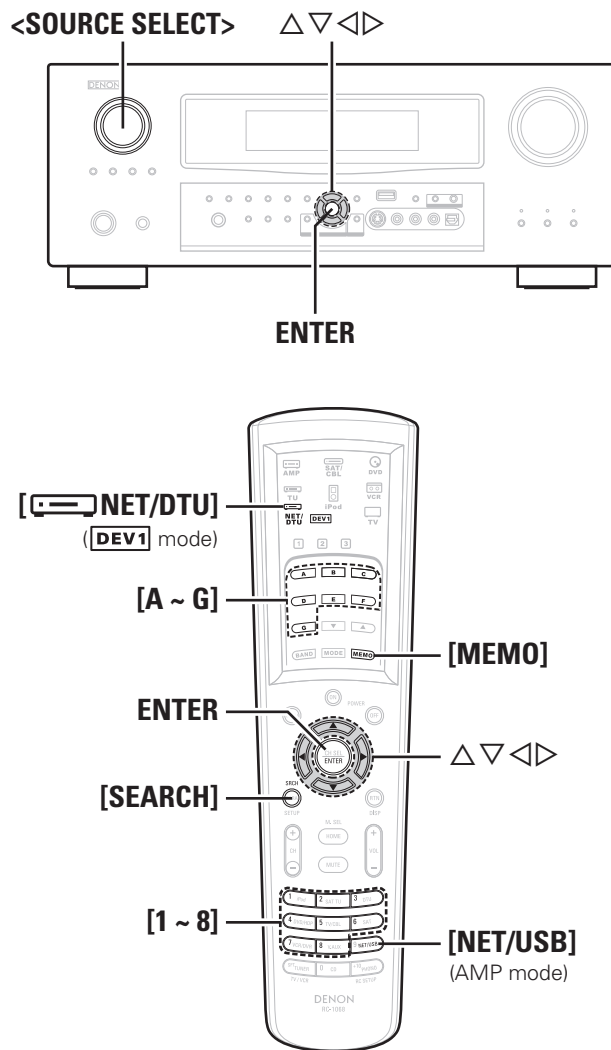

[Playable formats]

	Sampling frequency	Bit rate	Extension
<b>WMA</b> (Windows Media Audio)	32/44.1/48 kHz	48~192 kbps	.wma
<b>MP3</b> (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32~320 kbps	.mp3
<b>WAV</b>	32/44.1/48 kHz	—	.wav
<b>MPEG-4 AAC</b>	32/44.1/48 kHz	16~320 kbps	.aac/.m4a/.mp4
<b>FLAC</b> (Free Lossless Audio Codec)	32/44.1/48 kHz	—	.flac

WAV format Quantization bit rate: 16 bits.

### Installing Windows Media Player ver. 11

- If Windows XP Service Pack 2 has not yet been installed, either download it free of charge from Microsoft or install it via a Windows update installer.
  - Download the latest version of Windows Media Player ver. 11, either directly from Microsoft or using a Windows update installer.
- ※ When using Windows Vista, there is no need to download a new version of Windows Media Player.

#### About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

## Basic Operation

### 1 Make the necessary preparations.

- ① Check the network environment, then turn on the AVR-3808's power. (☞ page 20 "Network Audio")
- ② If settings are required, make the network settings. (☞ page 32, 33 "Network Setup")
- ③ Prepare the computer. (☞ Computer's operating instructions) Install "Windows Media Player ver. 11".

### 2 Either turn <SOURCE SELECT> or press [NET/USB] (AMP mode) to select "NET/USB".

**GUI** : "Source Select" – "NET/USB" – "Play"  
(☞ page 37)

### 3 To operate using the main remote control unit, set the remote control unit to the NET/DTU ([DEV1]) mode.

(☞ page 60 "Remote Control Unit Operations")

### 4 Use Δ ∇ to select the menu, then press ENTER or ▷ to select the file you want to play.

### 5 Press ENTER or ▷.

Playback starts.

### Stopping playback temporarily

During playback, press **ENTER**.

Press again to resume playback.

### To stop

During the play or pause mode, press and hold **ENTER**.

### Searching up or down pages

Press **[SEARCH]**, then press Δ (down) or ▷ (up).

To cancel, press Δ ∇ or **[SEARCH]**.

### Searching by first letter (Character search)

This operation is convenient for choosing items from the menu screens for Internet radio stations or files stored on the computer.

① When the menu screen is displayed, press **[SEARCH]** twice.

② Use Δ ▷ to select the first letter you want to search for.

If there are multiple items starting with the selected letter, they are displayed in alphabetical order.

If it is not possible to search the list, "Unsorted list..." is displayed.

- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "NET/USB" (☞ page 35).
- The display can be switched between the artist name, track name, album name.

## Listening to Internet Radio

### 1 Use Δ ∇ to select "Internet Radio", then press ENTER or ▷.

### 2 Use Δ ∇ to select the item you want to play, then press ENTER or ▷.

The station list is displayed.

### 3 Use Δ ∇ to select the station, then press ENTER or ▷.

Playback starts once buffering reaches "100%".

- There are many Internet radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely. Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted. Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.
- "Server Full" or "Connection Down" is displayed if the station is busy or not broadcasting.
- On the AVR-3808, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with " . (period)".

## Recently Played Internet Radio Stations

Recently played internet radio stations can be selected from “Recently Played” in top menu.

**1** Use  $\triangle$ / $\nabla$  to select “Recently Played”, then press **ENTER** or  $\triangleright$ .

**2** Use  $\triangle$ / $\nabla$  to select the item you want to play, then press **ENTER** or  $\triangleright$ .

### NOTE

Up to 20 stations stored in “Recently Played”.

## Presetting Internet Radio Stations

Preset Internet radio stations can be selected directly.

**1** While the Internet radio station you want to preset is playing, press **[MEMO]**.

**2** Use  $\triangle$ / $\nabla$  to select “Preset”, then press **ENTER**.

**3** Press **[A ~ G]**, then press **[1 ~ 8]** to select the desired preset number.  
The Internet radio station is now preset.

### NOTE

If registered at a number that has already been preset, the previously registered setting is cleared.

## Listening to Preset Internet Radio Stations

With the input source set to “NET/USB”, press **[A ~ G]**, then press **[1 ~ 8]**.

The AVR-3808 automatically connects to the Internet and playback begins.

## Registering Internet Radio Stations as Your Favorites

Favorites are listed at the top of the menu screen, so when a station is registered as a favorite it can be tuned in easily.

**1** Press **[MEMO]** while the Internet radio station you want to register is playing.

**2** Use  $\triangle$ / $\nabla$  to select “Favorites”, then press **ENTER**.

**3** Press  $\triangleleft$  to select “Yes”.  
The Internet radio station is registered.  
If you do not want to register it, press  $\triangleright$ .

## Listening to Internet Radio Stations Registered in Your Favorites

**1** Use  $\triangle$ / $\nabla$  to select “Favorites”, then press **ENTER** or  $\triangleright$ .

**2** Use  $\triangle$ / $\nabla$  to select the Internet radio station, then press **ENTER** or  $\triangleright$ .  
The AVR-3808 automatically connects to the Internet and playback begins.

## Clearing Internet Radio Stations from Your Favorites

**1** Use  $\triangle$ / $\nabla$  to select “Favorites”, then press **ENTER** or  $\triangleright$ .

**2** Use  $\triangle$ / $\nabla$  to select the Internet radio station you want to clear, then press **[MEMO]**.

**3** Press  $\triangleleft$  to select “Delete”.  
The selected Internet radio station is cleared.  
To cancel the operation without clearing the station, press  $\triangleright$ .

## Playing Files Stored on a Computer

Use this procedure to play music files or playlists.

**1** Use  $\triangle$ / $\nabla$  to select the host name of the computer on which the music file you want to play is located, then press **ENTER** or  $\triangleright$ .

**2** Use  $\triangle$ / $\nabla$  to select the search item or folder, then press **ENTER** or  $\triangleright$ .

**3** Use  $\triangle$ / $\nabla$  to select the file, then press **ENTER** or  $\triangleright$ .  
Playback starts once buffering reaches “100%”.

## Selecting tracks

During playback, either press  $\triangle$  (previous track) or  $\nabla$  (next track).

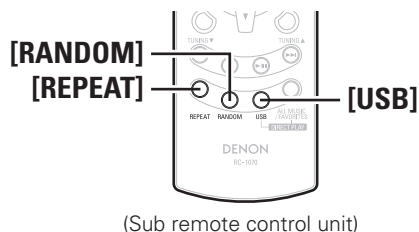

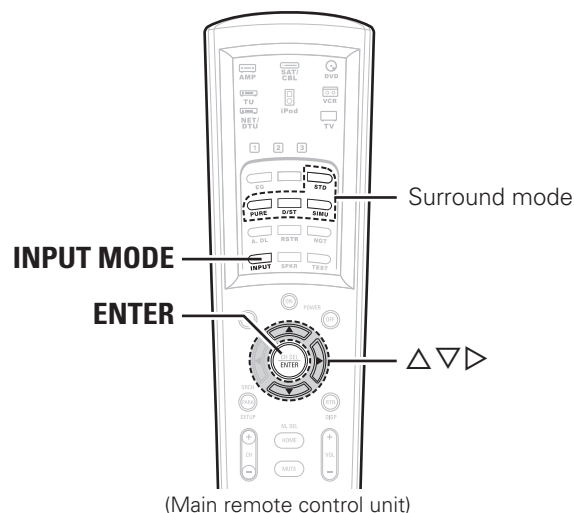

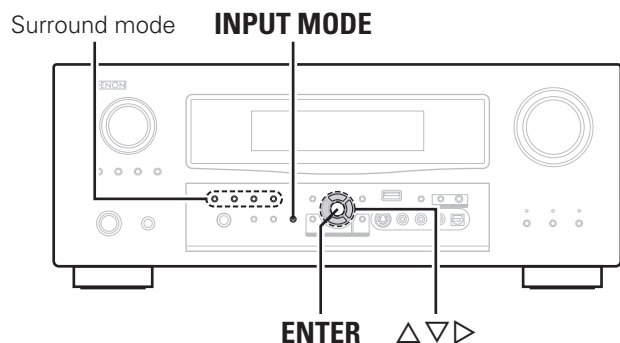

- Connections to the required system and specific settings must be made in order to play music files (see page 20).
- Before starting, you must launch the computer's server software and set the files as server contents. For details, see the operating instructions of your server software.

## Playing files that have been Preset or Registered in Your Favorites

Files can be preset, registered in your favorites and played using the same operations as for Internet radio stations.

### NOTE

- Presettings are erased by overwriting them.
- When the operation described below is performed, the music server's database is updated and it may no longer be possible to play preset or favorite music files.
  - When you quit the music server and then restart it.
  - When music files are deleted or added on the music server.

#### About the button names in these explanations

- < > : Buttons on the main unit  
[ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

## Playing Files Stored on USB Memory Devices

Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-3808.

### Basic Operation

#### 1 Make the necessary preparations.

- Set the USB port to be used.

**GUI** : "Source Select" – "NET/USB" – "Playback Mode" – "USB Select" (page 40)

- Connect the USB memory device to the set USB port.

#### 2 Use Δ ▽ to select "USB", then press ENTER or ▸.

#### 3 Use Δ ▽ to select the search item or folder, then press ENTER or ▸.

#### 4 Use Δ ▽ to select the file, then press ENTER or ▸.

Playback starts once buffering reaches "100%".

By default, the front panel's USB port will be used.

### Playing repeatedly

Press **[REPEAT]** on the sub remote control unit.

[Selectable items] **All** **One** **OFF**

**GUI** : "Source Select" – "NET/USB" – "Playback Mode" – "Repeat" (page 40)

### Playing in random order

Press **[RANDOM]** on the sub remote control unit.

[Selectable items] **ON** **OFF**

**GUI** : "Source Select" – "NET/USB" – "Playback Mode" – "Random" (page 40)

### Selecting tracks

During playback, either press Δ (previous track) or ▽ (next track).

- If the USB memory device is divided into multiple partitions, only the top partition can be selected.
- The AVR-3808 is compatible with MP3 files conforming to "MPEG-1 Audio Layer-3" standards.
- If **[USB]** on the sub remote control unit is pressed when the USB memory device or folder is selected, all the tracks on the USB memory device or in the folder are played.

#### NOTE

- The AVR-3808 is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" – "NET/USB" – "Playback Mode" – "USB Select" menu.
- DENON will accept no responsibility whatsoever for any loss or damage to data on USB memory devices when using the USB memory device connected to the AVR-3808.
- USB memory devices will not work via a USB hub.
- DENON does not guarantee that all USB memory devices will operate or receive power. When using a USB connection type portable hard disk of the type for which power can be supplied by connecting an AC adapter, we recommend using the AC adapter.
- It is not possible to connect and use a computer via the AVR-3808's USB port using a USB cable.
- The AVR-3808 is not compatible with the iPod shuffle.

## Operating the AVR-3808 Using a Browser (Web control)

This function lets you operate the AVR-3808 using Internet Explorer.

### 1 Check the AVR-3808's IP address.

**GUI** : "Manual Setup" – "Network Setup" – "Network Information" (☞ page 33)

### 2 Input the AVR-3808's IP address in Internet Explorer.

The AVR-3808 can be operated in the same way as with regular Internet browsing.

To use the web control function, set the GUI menu "Manual Setup" – "Network Setup" – "Other" – "Power Saving" setting to "OFF" (☞ page 33).

## Other Operations and Functions

### Other Operations

#### Playing Super Audio CD

### 1 Assign "DENON LINK" or "HDMI" at the "Digital" or "HDMI" setting (☞ page 39).

### 2 Either turn <SOURCE SELECT> or press [SOURCE SELECT] to select the input source assigned in step 1. The "[D.LINK]" or "[HDMI]" indicator lights on the display.

### 3 Use INPUT MODE to select the input mode (☞ page 38). Select the input mode according to the program source to be played.

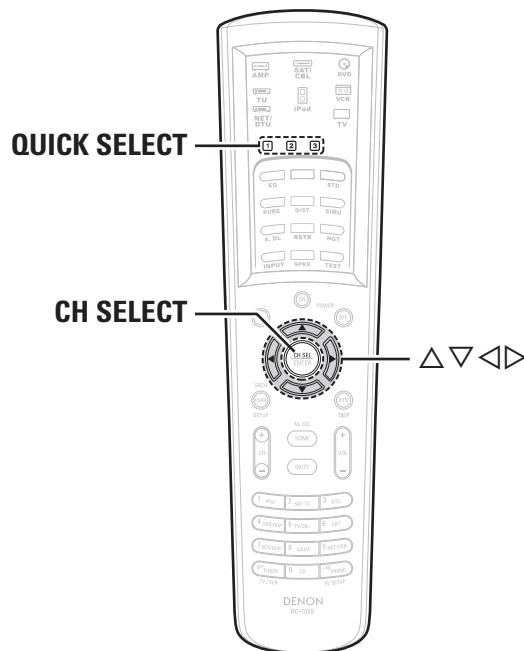

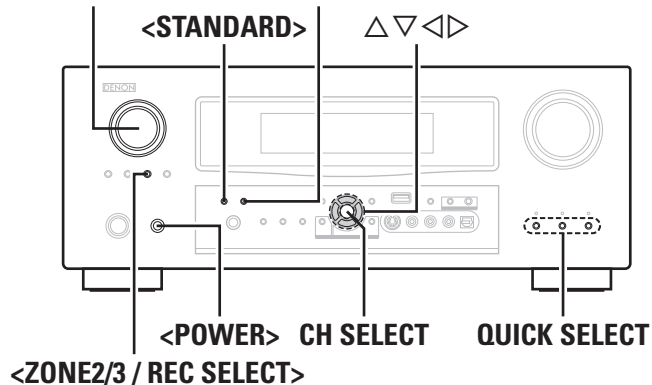

### 4 Select the surround mode (☞ page 40, 41). We recommend playing in the DIRECT mode.

### 5 Start playing the Super Audio CD. The "[DSD]" indicator lights on the display. For operating instructions, refer to the respective equipment's operating instructions.

- When playing DSD signals in the DIRECT or PURE DIRECT mode, the DSD signals are converted as such into analog signals. When playing in other surround modes, the DSD signals are first converted into PCM format, then into analog signals.
- "DSD DIRECT" is shown on the display when playing DSD 2-channel signals in the DIRECT mode. "DSD MULTI DIRECT" is shown on the display when playing DSD multi-channel signals in the DIRECT mode.

# <SOURCE SELECT> <DSP SIMULATION>

## About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

### Button name only:

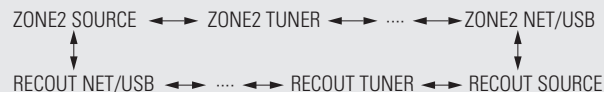

Buttons on the main unit and remote control unit

## Recording on an External Device (REC OUT mode)

You can listen to one program source while recording a different program source.

### 1 Press <ZONE2/3 / REC SELECT>.

"ZONE2 SOURCE" is shown on the display.

### 2 Turn <SOURCE SELECT> until "RECOUT SOURCE" is displayed.

The "REC" indicator lights.

### 3 Turn <SOURCE SELECT> to choose the input source to be recorded.

### 4 Play the program source.

For operating instructions, refer to the respective equipment's operating instructions.  
To record FM or AM broadcasts, select the broadcast (see page 48).

### 5 Start recording.

For operating instructions, refer to the respective equipment's operating instructions.

- To cancel, press <ZONE2/3 / REC SELECT>, then turn <SOURCE SELECT> until "ZONE2 SOURCE" is displayed.
- Make a test recording before starting the actual recording.
- Signals are only output to the analog REC OUT connectors when the digital signals input to the digital input connectors (OPTICAL/ COAXIAL) are PCM (2-channel) signals.
- Digital audio signals input to the DENON LINK or HDMI connectors are not output to the REC OUT connectors, so connect using the OPTICAL or COAXIAL connectors.
- Sources selected with the REC OUT mode are output from ZONE2 as well.
- In the REC OUT mode, the remote control unit's ZONE2 mode buttons cannot be operated.
- The network audio signals (Internet radio, music server, USB) are not output if they are copyright-protected.

### NOTE

- Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB), input from the digital input connectors cannot be output from the analog REC OUT connectors.
- Input sources for which "Delete" is selected at "Source Delete" cannot be selected.

## Convenient Functions

### Channel Level

You can adjust the channel level either according to the playback sources or to suit your taste, as described below.

**1** Press **CH SELECT**.

**2** Use  $\Delta$   $\nabla$  or **CH SELECT** to select the speaker.

The speaker that can be set switches each time one of the buttons is pressed.

**3** Use  $\triangleleft$   $\triangleright$  to adjust the volume.

※ "OFF" can be set by pressing  $\triangleleft$  when the subwoofer's volume is set to -12 dB.

### Fader Function

This function lets you adjust (fade) the sound from all the front or rear speakers at once.

**1** Press **CH SELECT**.

**2** Press  $\Delta$   $\nabla$  or **CH SELECT** to select "Fader".

**3** Use  $\triangleleft$   $\triangleright$  to adjust the volume of the speakers.  
( $\triangleleft$ : front,  $\triangleright$ : rear)

- The fader function does not affect the subwoofer.
- The fader can be adjusted until the volume of the speaker adjusted to the lowest value is -12 dB.

### Quick Select Function

With this function, the currently playing input source, input mode, surround mode, room EQ settings and volume can be stored in the memory.

**1** Set the input source, input mode, surround mode, room EQ settings and volume to the conditions you want to store.

**2** Press and hold the desired **QUICK SELECT**.  
Keep pressing the button until the quick select indicator lights.

#### [Quick Select Defaults]

	Input Source	Volume
<b>Quick Select 1</b>	DVD	-40 dB
<b>Quick Select 2</b>	TV/CBL	-40 dB
<b>Quick Select 3</b>	VCR	-40 dB

- To call out the settings, press **QUICK SELECT** at which the desired settings were stored.
- The Quick Select name can be changed (🔧 page 35).

#### NOTE

Input sources stored with the quick select function cannot be selected if they have been deleted at GUI menu "Manual Setup" – "Option Setup" – "Source Delete" (🔧 page 34). In this case, store them again.

### Personal Memory Plus Function

This function sets the settings (input mode, surround mode, etc.) last selected for the individual input sources. When you switch to an input source, the settings are automatically set to the ones that were set the last time that input source was used.

The surround parameters, tone control, room EQ settings and the volumes of the different speakers are stored for the individual surround modes.

### Last Function Memory

This stores the settings as they were directly before the standby mode was set.

When the power is turned back on, the settings are restored to as they were directly before the standby mode was set.

### Backup Memory

The various settings are backed up for about 1 week, even if the power is turned off or the power cord is disconnected.

### Resetting the Microprocessor

Perform this procedure if the display is abnormal or if operations cannot be performed.

When the microprocessor is reset, all the settings are reset to their default values.

**1** Turn off the power using **<POWER>**.

**2** Press **<POWER>** while simultaneously pressing **<STANDARD>** and **<DSP SIMULATION>**.

**3** Once the display starts flashing at intervals of about 1 second, release the two buttons.

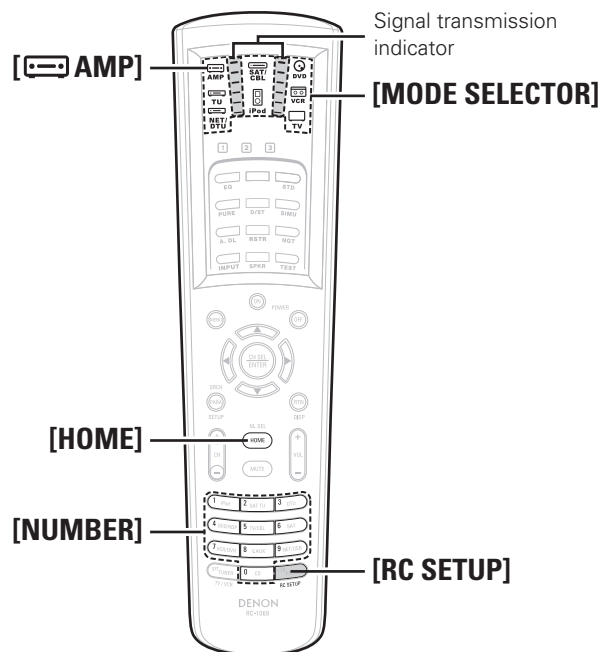

If in step 3 the display does not flash at intervals of about 1 second, start over from step 1.

# Remote Control Unit Operations

## Main Remote Control Unit

- On the main remote control unit, the display switches according to the device being operated and the mode.
- In modes other than iPod, the mode switches between "[DEV1]" and "[DEV2]" each time the [MODE SELECTOR] is pressed.
- In the AMP, TUNER, NET/DTU and iPod modes, when the remote ID is set, the AVR-3808 can be used independently even in an environment containing multiple DENON amplifiers.

Depending on the model and year of manufacture of your equipment, some buttons may not operate.

### NOTE

The device mode ("DEV1" or "DEV2") cannot be changed while the setting is being made.

## Operating DENON Audio Components

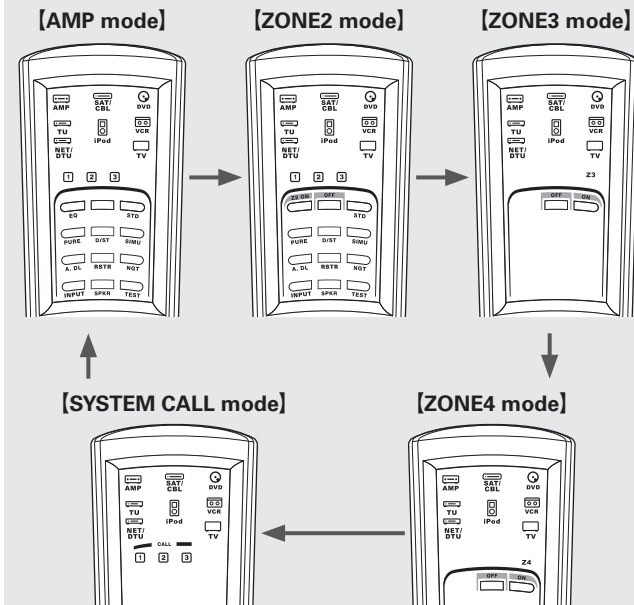

### 1 Press [MODE SELECTOR] for the component to be operated.

The indicator for the component to be operated flashes.

: AMP / ZONE2 / ZONE3 / ZONE4 / SYSTEM CALL	: iPod
: TUNER (FM/AM)	: DVD player (Recorder) / CD player (Recorder)
: NETWORK/USB / DIGITAL TUNER	: VCR / TAPE
: Satellite Receiver / Cable TV	: TV

※ The TUNER ([DEV2]) and NET/DTU ([DEV2]) mode is not used on the AVR-3808, so use the learn function to store the signals (page 63).

※ The mode switches each time [AMP] is pressed.

### 2 Operate the component.

※ For details, refer to the component's operating instructions.

[HOME] is used to return to the AMP mode (AMP, ZONE2, ZONE3, ZONE4 or SYSTEM CALL) when in any mode other than AMP.

## Presetting

The included main remote control unit can be preset to operate devices of various brands.

### 1 Press [MODE SELECTOR] for the device you want to preset.

### 2 Press and hold in [RC SETUP] for at least 3 seconds.

The signal transmission indicator flashes twice.

### 3 Press [NUMBER] and input the 5-digit number of the brand of the component to be preset. The numbers are shown in the Preset Code Table (End of this manual).

When the code is registered, the signal transmission indicator flashes twice.

When the preset code is transmitted, the mode indicator for the component to which that code belongs flashes.

※ The input mode is canceled if no button is operated for 10 seconds.

Some brands have more than one preset code. If the component does not operate, try inputting a different code.

## Operating Preset Components

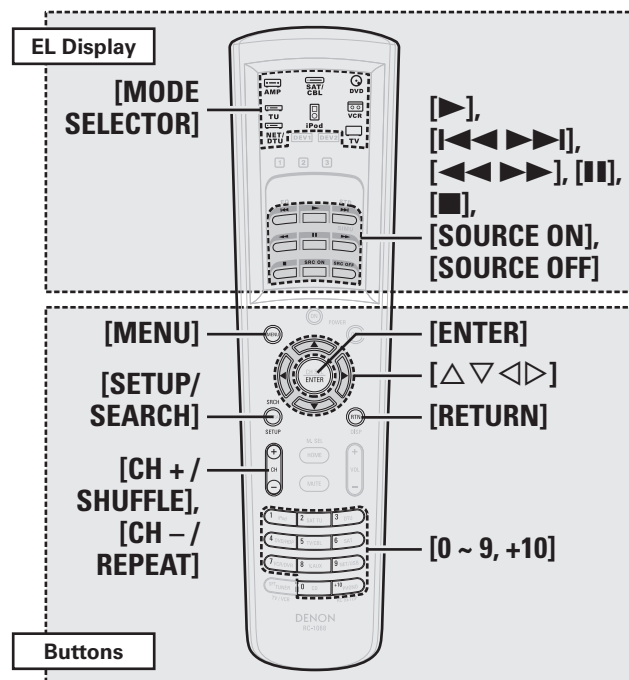

### 1 Press [MODE SELECTOR] for the component to be operated.

The mode indicator of the device to be operated flashes.

### 2 Operate the component.

※ For details, refer to the component's operating instructions.

## Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that only the desired AV receiver operates.

- 1 Press **[AMP]** to set the main remote control unit to the AMP mode.
- 2 Press and hold in **[RC SETUP]** for at least 3 seconds. The signal transmission indicator flashes twice.
- 3 Refer to the table at the right, and use **[NUMBER]** to input the 5-digit number corresponding to the remote ID to be changed. The signal transmission indicator flashes twice.
- 4 Press **[TU]**, **[iPod]** or **[NET/DTU]** to select the mode to be set.
- 5 Repeat steps 2 to 4 to set the remote IDs for all modes.

MODE SELECTOR	AMP (MAIN)	TUNER	iPod	NET/DTU
Remote ID		<b>DEV1</b> (Analog TUNER)		<b>DEV1</b> (Net Audio / USB)
1 (Default)	81001	52863	72815	62865
2	82001	52795	72816	62837
3	83001	52800	72817	62838
4	84001	52805	72818	62839

### NOTE

- When changing a setting, be sure to set the same remote ID as the AVR-3808's (page 35).
- When changing the AMP mode's remote ID, also change the "TUNER," "iPod" and "NET/DTU" remote ID at the same time.
- Set the remote ID of an analog tuner for "TUNER" – "**DEV1**".

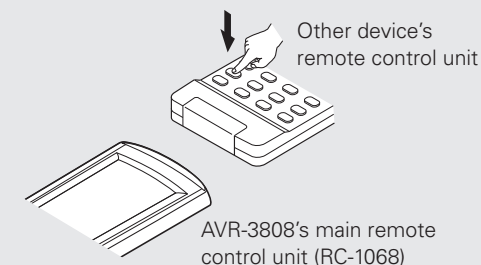

## Learning Function

If your AV devices are of a brand other than DENON or if they cannot be operated with the preset memory function, their remote control signals can be transferred to stored in the AVR-3808's main remote control unit.

- 1 Press **[MODE SELECTOR]** for the device you want to set.
- 2 Press and hold in **[RC SETUP]** for at least 3 seconds. The signal transmission indicator flashes twice.
- 3 Press **[9]**, **[7]** and **[5]**, in that order. The signal transmission indicator flashes twice and the learning mode is set.
- 4 Press the button to be set. The main remote control unit's display turns off.
  - ※ If a button that cannot be learned is pressed, the signal transmission indicator lights but the signal is not learned.

## 5 Point the main remote control units directly at each other and press and hold the button on the other device's remote control unit that you want to learn.

Once learning is completed normally, the display lights and the signal transmission indicator flashes twice.

- ※ If you want to learn other buttons, repeat steps 4 and 5.
- ※ The mode can be switched by pressing **[MODE SELECTOR]**.
- ※ The signal transmission indicator lights once for a long time if learning was not possible.

## 6 Press and hold in **[RC SETUP]** for at least 3 seconds.

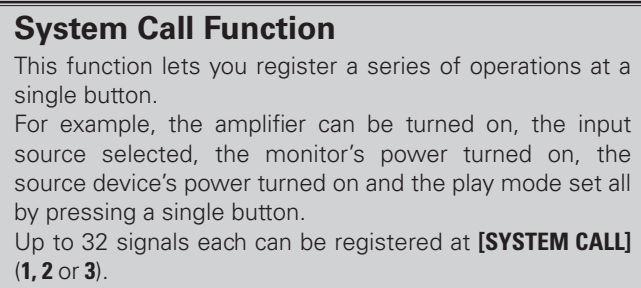

The signal transmission indicator flashes twice and the setting is completed.

- With some remote control units, the signals cannot be learned or the device will not operate properly even when the signals have been learned. In this case, use the device's own remote control unit.
- Learned buttons have priority over the preset memory. If you no longer need the learned setting, reset the learning function (page 65).

### NOTE

- **[HOME]** cannot be learned.
- Do not learn any remote control signals at **[RC SETUP]**.
- The AMP, ZONE2, ZONE3, ZONE4 and SYSTEM CALL modes cannot be learned.

- 1 Press [MODE SELECTOR] for the device you want to register.**
- 2 Press and hold in [RC SETUP] for at least 3 seconds.**  
The signal transmission indicator flashes twice.
- 3 Press [9], [7] and [8], in that order.**  
The signal transmission indicator flashes twice and the system call registration mode is set.
- 4 Press [SYSTEM CALL] (1, 2 or 3) at which you want to register the signals.**
- 5 Press the buttons you want to register in the same sequence as the operations you want to perform.**  
The signal transmission indicator lights when a button is pressed.  
**Example :** Press **[POWER ON]**.  
↓  
Press **[MODE SELECTOR] – [DVD]**.  
↓  
Press **[▶]**.  
※ The mode can be switched by pressing **[MODE SELECTOR]**.  
※ Perform the registration procedure for all the buttons you want to register.
- 6 Press and hold in [RC SETUP] for at least 3 seconds.**  
The signal transmission indicator flashes twice and the setting is completed.

- 1** Press **[AMP]**, to select “**SYSTEM CALL**”.
- 2** Press **[SYSTEM CALL]** (1, 2 or 3) at which the signals were registered.  
The registered signals are transmitted in the registered sequence.

CD, DVD or VCR mode buttons can be stored at unused TV or SAT/CBL mode buttons.

For example, when DVD mode buttons are assigned to the TV mode, the DVD mode operations can be performed while in the TV mode.

---

- 1 Press [MODE SELECTOR] for the device you want to punch through (CD, DVD or VCR).**
- 2 Press and hold in [RC SETUP] for at least 3 seconds.**  
The signal transmission indicator flashes twice.
- 3 Press [9], [8] and [4], in that order.**  
The signal transmission indicator flashes twice and the punch through setting mode is set.
- 4 Press the button you want to punch through (▶, ■, ◀◀, ▶▶, ◀◀◀, ▶▶▶ or II).**
- 5 Press [MODE SELECTOR] for the device you want to punch through (TV or SAT/CBL).**
- 6 Press and hold in [RC SETUP] for at least 3 seconds.**  
The signal transmission indicator flashes twice and the setting is completed.

## Setting the Time the Backlight Stays Lit

- 1** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 2** Press **[9]**, **[7]** and **[3]**, in that order.  
The signal transmission indicator flashes twice and the backlight on time setting mode is set.
- 3** Set the light on time.  
The signal transmission indicator flashes twice.  
[Settable times] : **[1]** : 5 sec.  
                          **[2]** : 10 sec. (Default)  
                          **[3]** : 15 sec.  
                          **[4]** : 20 sec.  
                          **[5]** : 25 sec.

## Adjusting the Backlight's Brightness

The display's brightness can be adjusted in 5 steps.  
(Default: Step 3)

- 1** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 2** Press **[CHANNEL +]** or **[CHANNEL -]**.  
The display gets one step brighter when **[+]** is pressed.  
The display gets one step darker when **[-]** is pressed.
- 3** Press **[RC SETUP]** to complete the setting.

## Resetting the Main Remote Control Unit

### Learning Function

#### [Resetting button by button]

- 1** Press **[MODE SELECTOR]** for the device you want to reset.
- 2** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 3** Press **[9]**, **[7]** and **[6]**, in that order.  
The signal transmission indicator flashes twice.
- 4** Press the button you want to reset twice.  
The signal transmission indicator flashes twice.

#### [Resetting by device mode]

- 1** Press **[MODE SELECTOR]** for the device you want to reset.
- 2** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 3** Press **[9]**, **[7]** and **[6]**, in that order.  
The signal transmission indicator flashes twice.
- 4** Press **[MODE SELECTOR]** for the device you want to reset twice.  
The signal transmission indicator flashes twice.

## System Call Function

- 1** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 2** Press **[9]**, **[7]** and **[8]**, in that order.  
The signal transmission indicator flashes twice.
- 3** Press **[SYSTEM CALL]** (1, 2 or 3) you want to reset.
- 4** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.

## Punch Through Function

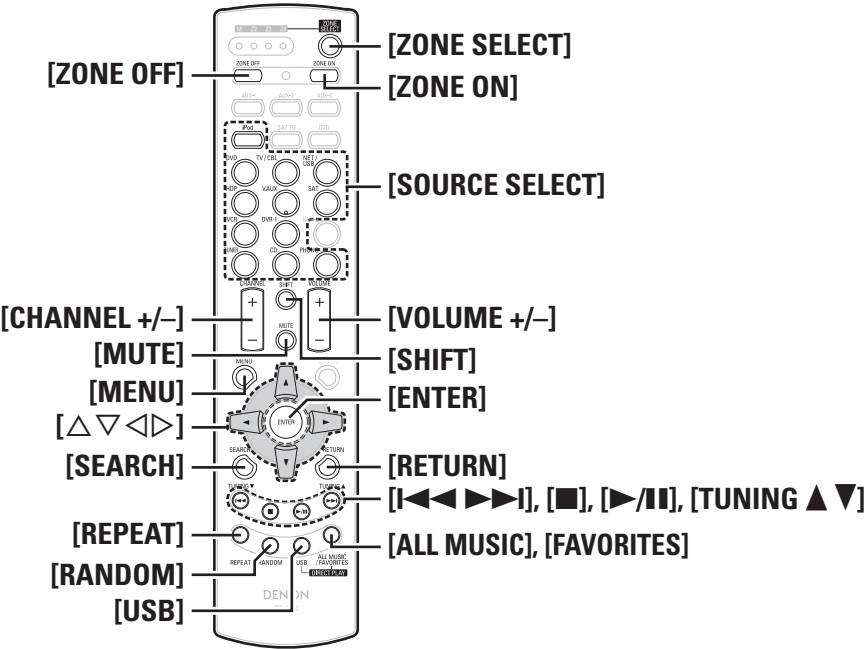

- 1** Press **[MODE SELECTOR]** for the device you want to reset (TV or SAT/CBL).
- 2** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 3** Press **[9]**, **[8]** and **[4]**, in that order.  
The signal transmission indicator flashes twice.
- 4** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.

## All Settings

- 1** Press and hold in **[RC SETUP]** for at least 3 seconds.  
The signal transmission indicator flashes twice.
- 2** Press **[9]**, **[8]** and **[1]**, in that order.  
The signal transmission indicator flashes 4 times.  
All the settings are restored to their defaults.

Sub Remote Control Unit Operations

- The sub remote control unit is equipped with frequently used buttons, so it can be used for simple remote control unit operations.
- The sub remote control unit can also be used for multi-zone, so you can use it to control the AVR-3808 from other rooms.
- The operations listed below can be performed with the sub remote control unit.
  - Switching the input source
  - Adjusting the volume
  - Tuner (AM/FM) and iPod operations
  - NET/USB direct play
  - GUI menu and ZONE2 on-screen display operations
  - Zone power on/off
- It is not possible to operate devices other than the amplifier.

Functions of Buttons by Component

## Switching Zones

Use this procedure to select the zone to be operated by the sub remote control unit.

- 1** Press **[ZONE SELECT]**.  
The currently selected multi-zone indicator lights.
- 2** While the multi-zone indicator is light, press **[ZONE SELECT]** to select the zone to be operated.  
The currently selected multi-zone indicator lights.

## Setting the Zone for Which the Sub Remote Control Unit is Used (ZONE SELECT LOCK mode)

We recommend always using the sub remote control unit for the same room. When this is done, the unit can be set so that the zone does not switch when buttons are operated.

- 1** Use the tip of a pen to press **[ADVANCED SETUP]**.  
All the multi-zone indicators light.
- 2** Select the multi-zone to be set.  
The selected multi-zone indicator lights.
  - ① To set to main zone : Press **[REPEAT]**.
  - ② To set to ZONE2 : Press **[RANDOM]**.
  - ③ To set to ZONE3 : Press **[USB]**.
- 3** Use the tip of a pen to press **[ADVANCED SETUP]**.  
The multi-zone indicator turns off.

### To Cancel

- 1** Use the tip of a pen to press **[ADVANCED SETUP]**.  
The currently selected multi-zone indicator lights.
- 2** Press **[ZONE SELECT]**.  
All the multi-zone indicators light.
- 3** Use the tip of a pen to press **[ADVANCED SETUP]**.  
The multi-zone indicator turns off.

## Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that no AV receiver other than the desired one operates.

- 1** While pressing **[MENU]**, press **[ADVANCED SETUP]** with the tip of a pen.  
The multi-zone indicator corresponding to the currently selected remote ID flashes.
- 2** Select the remote ID to be set.
  - ① To set to 1 : Press **[REPEAT]**.  
The "M" indicator flashes.
  - ② To set to 2 : Press **[RANDOM]**.  
The "Z2" indicator flashes.
  - ③ To set to 3 : Press **[USB]**.  
The "Z3" indicator flashes.
  - ④ To set to 4 : Press **[ALL MUSIC/FAVORITES]**.  
The "Z4" indicator flashes.

- 3** While pressing **[MENU]**, press **[ADVANCED SETUP]** with the tip of a pen.  
The multi-zone indicator turns off.

### NOTE

When changing a setting, be sure to set the same remote ID as the AVR-3808's (☞ page 35).

## Resetting the Settings

While pressing **[ZONE OFF]**, press **[ADVANCED SETUP]** with the tip of a pen.  
All the multi-zone indicators flash 4 times, then all the settings are restored to their defaults.

# Amp Assign / Multi-Zone Connections and Operations

The AVR-3808 is compatible with the following types of playback:

- **Multi-zone playback (ZONE2 & ZONE3)**
- **Bi-amp playback (front speaker)**

## NOTE

- For bi-amp playback, use speakers compatible with that type of connection.
- When conducting bi-amp playback, remove the short-circuiting boards (or wires) from the speaker terminals.

## Multi-Zone Settings with the Amp Assign Function

The amp assign function lets you assign the amplifiers for the different channels built into the AVR-3808 to the speaker outputs for the different zones.

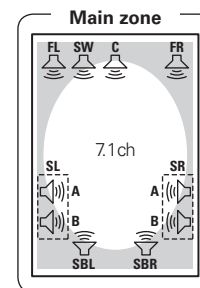

Select the desired playback environment from among "Setting 1" to "Setting 4," then set the corresponding "Amp Assign" mode at GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" (page 34).

Connect the speakers as described at "Amp Assign mode settings and speakers connected to the various speaker terminals".

"Setting 3" is possible to switch the Amp Assign mode between the 5.1-channel mode and 2-channel mode without changing the speaker connections.

## Setting 1 : ●7.1-channel playback

Amp Assign mode:  
7CH (Default)

Both A and B can be installed for SR and SL.

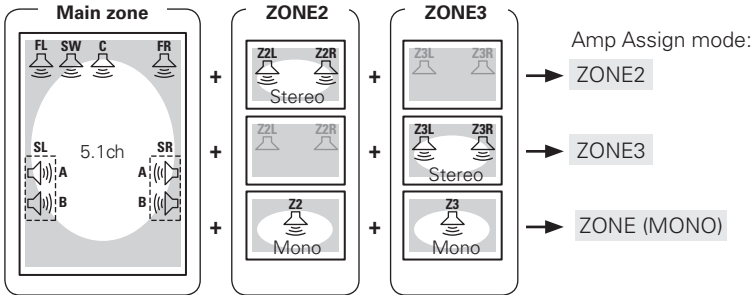

## □ Amp Assign mode setting and speakers connected to the various speaker terminals

Speaker terminal Amp Assign mode	FRONT		CENTER	SURR-A		SURR-B		SURR. BACK / AMP ASSIGN	
	R	L		R	L	R	L	R	L
7.1CH	FR	FL	C	SR-A	SL-A	SR-B	SL-B	SBR	SBL

Setting 2 :

● Multi-zone playback

- 5.1-channel playback + ZONE2 or ZONE3 stereo playback
- 5.1-channel playback + ZONE2 or ZONE3 monaural playback

- “STEREO” or “MONO” depends on the setting at GUI menu “Manual Setup” – “Zone Setup” – “Channel” (page 33).
- Both A and B can be installed for SR and SL.

❑ Amp Assign mode setting and speakers connected to the various speaker terminals

Speaker terminal Amp Assign mode	FRONT		CENTER	SURR-A		SURR-B		SURR. BACK / AMP ASSIGN	
	R	L		R	L	R	L	R	L
ZONE2	FR	FL	C	SR-A	SL-A	SR-B	SL-B	Z2R	Z2L
ZONE3								Z3R	Z3L
ZONE (MONO)								Z3 (MONO)	Z2 (MONO)

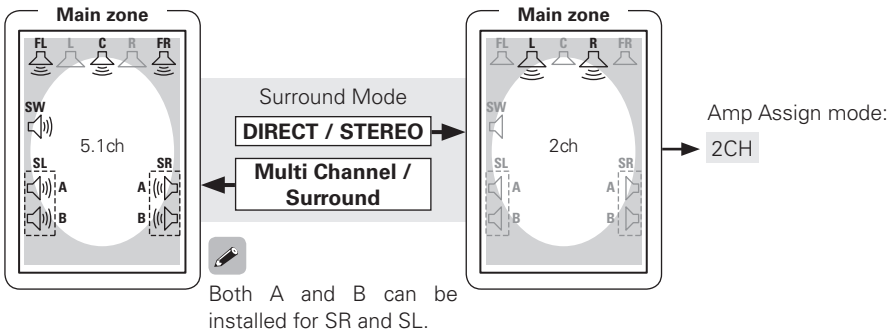

Setting 3 :

With this setting it is possible to switch between the following two playback modes.

● 5.1-channel playback

● 2-channel playback

Switching .....Surround Mode switching

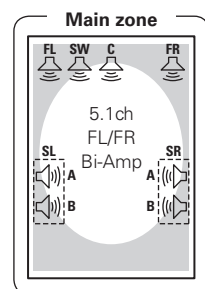

❑ Amp Assign mode setting and speakers connected to the various speaker terminals

Speaker terminal Amp Assign mode	FRONT		CENTER	SURR-A		SURR-B		SURR. BACK / AMP ASSIGN	
	R	L		R	L	R	L	R	L
2CH	FR	FL	C	SR-A	SL-A	SR-B	SL-B	FR	FL

## Setting 4 :

- Making bi-amp connections for the FL and FR channels in the main zone and conducting 5.1-channel playback (switching with other modes not possible)

Amp Assign mode:

→ Bi-Amp

Both A and B can be installed for SR and SL.

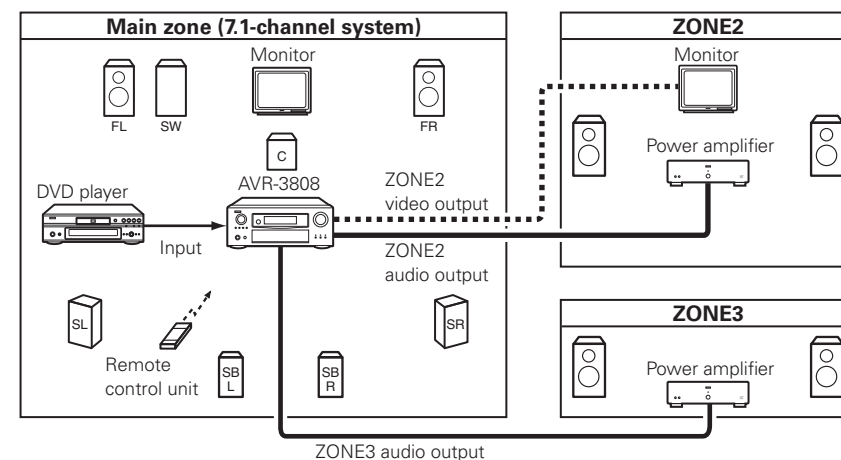

### □ Amp Assign mode setting and speakers connected to the various speaker terminals

Speaker terminal	FRONT		CENTER	SURR-A		SURR-B		SURR. BACK / AMP ASSIGN	
	R	L		R	L	R	L	R	L
Amp Assign mode									
Bi-Amp	FR	FL	C	SR-A	SL-A	SR-B	SL-B	FL/FR Bi-Amp connection	

## Multi-Zone Settings and Operations with Zone Pre-out Output

Prepare power amplifiers for ZONE2 and ZONE3.

	Connectors for audio output	Audio signals	Connectors for video output
ZONE2	ZONE2 PRE OUT	Stereo	ZONE2 VIDEO OUT
ZONE3	ZONE3 PRE OUT	Stereo	—

-----: Multi-zone video cable  
 —————: Multi-zone audio cable

- When only using one speaker for ZONE2 or ZONE3, set to “Mono”. In this case, the ZONE2 (ZONE3) monaural output is output from the ZONE2 (ZONE3) pre-out L and R connectors, so connect as desired.
- Separate power amplifiers are needed for ZONE2 and ZONE3.

#### About the button names in these explanations

- < > : Buttons on the main unit  
[ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

## Multi-Zone Operations

### Turning the Power On and Off

#### [Operation on the main unit]

Press **<ZONE2 ON/OFF>** or **<ZONE3 ON/OFF>** for the zone to be operated. When the power turns on, the multi-zone indicator lights on the display.

#### [Operation on the remote control unit]

In the zone mode you want to operate, press **[ON]** or **[OFF]**.

### Selecting the Input Source

#### [Operation on the main unit]

- Press **<ZONE2/3 / REC SELECT>** and select the zone to be adjusted.
- Turn **<SOURCE SELECT>**.

#### [Operation on the remote control unit]

In the zone mode you want to operate, press **[SOURCE SELECT]**.

### Adjusting the Volume

#### [Operation on the main unit]

- Press **<ZONE2/3 / REC SELECT>** and select the zone to be adjusted.
- Turn **<VOLUME>** to adjust.

#### [Operation on the remote control unit]

In the zone mode whose volume you want to adjust, press **[VOLUME]**.

**[Variable range]** --- **-70dB** ~ **-40dB** ~ **+18dB**

The volume can be adjusted when GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Level" is set to "Variable". The volume can be increased up to the value set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Limit" (page 33).

### Turning off the Sound Temporarily

In the zone mode for which you want to mute the sound, press **[MUTE]**.

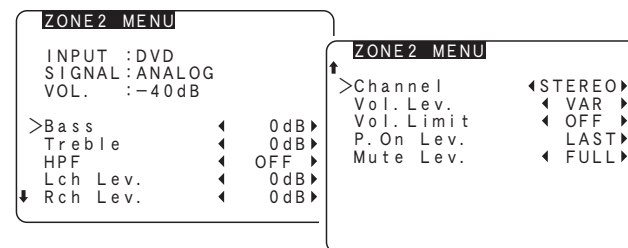

The sound is reduced to the level set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Mute Level" (page 33).

To cancel, either adjust the volume or press **[MUTE]** again.

The setting is canceled when the zone's power is turned off.

- The source selected for ZONE2 is also output from the recording output connectors.
- For ZONE2, the "Zone Setup" can be made while watching the on-screen display. Also, when ZONE3 is operated, the on-screen display appears on the ZONE2 monitor, so operation can be performed watching this on-screen display.

#### NOTE

- When the input source to which the digital input connectors (OPTICAL/COAXIAL) are assigned is selected in ZONE2 or ZONE3, playback is only possible if the digital signal being input is in PCM (2-channel) format.
- Digital audio signals input from the DENON LINK or HDMI connectors cannot be played in multi-zone.
- When certain digital signals are being input, noise may be output from the ZONE2 and ZONE3 audio output connectors.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB) input from the digital input connectors cannot be output from the ZONE2 and ZONE3 audio output connectors.

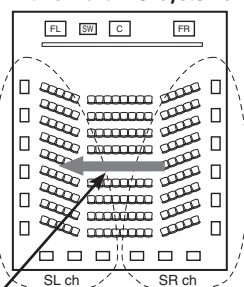

# Other Information

## About Speaker Installation

### Surround back speakers

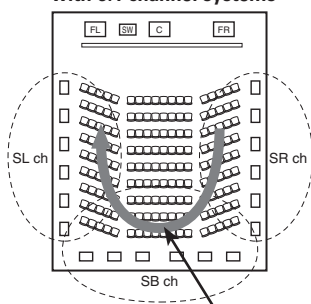

Sound positioning directly to the rear can be achieved easily by adding a surround back speaker to a 5.1-channel system. In addition, the acoustic image extending between the sides and the rear is narrowed, thus greatly improving the expression of the surround signals for sounds moving from the sides to the back and from the front to the point directly behind the listening position.

#### Change of positioning and acoustic image with 5.1-channel systems

Movement of acoustic image from SR to SL

#### Change of positioning and acoustic image with 6.1-channel systems

Movement of acoustic image from SR to SB to SL

In addition to sources recorded in 6.1-channels, the surround effect of conventional 2- to 5.1-channel sources can also be enhanced.

### Number of surround back speakers

We recommend using 2 speakers. When using dipolar speakers in particular, be sure to use 2 speakers.

### Placement of the surround left and right channels when using surround back speakers

We recommend installing the speakers for the surround "L" and "R" channels a bit forward.

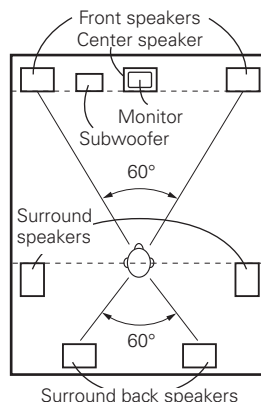

### Examples of speaker layouts

Below we introduce examples of speaker layouts. Refer to these to arrange your speakers according to their type and how you want to use them.

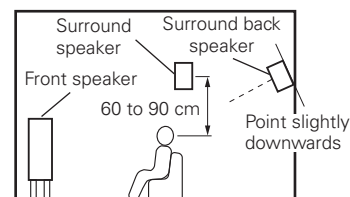

#### [1] Using surround back speaker(s)

##### ① When mainly playing movies

Recommended when your surround speakers are single or 2-way speakers.

[As seen from above]

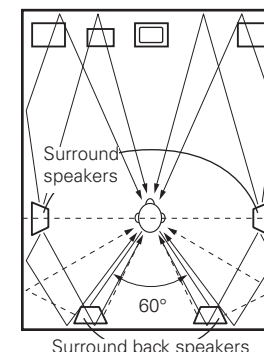

[As seen from the side]

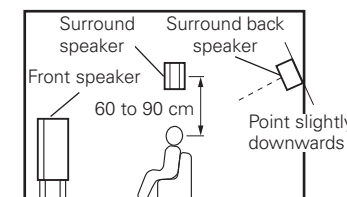

##### ② Setting for primarily watching movies using diffusion type speakers for the surround speakers

For the greatest sense of surround sound envelopment, diffuse radiation speakers such as bipolar types, or dipolar types, provide a wider dispersion than is possible to obtain from a direct radiating speaker (monopolar). Place these speakers at either side of the prime listening position, mounted above ear level.

#### Path of the surround sound from the speakers to the listening position

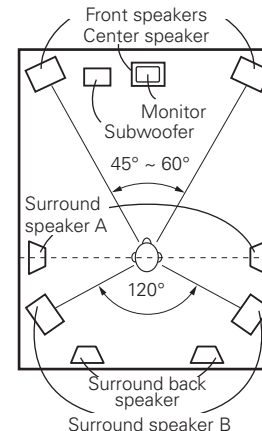

[As seen from above]

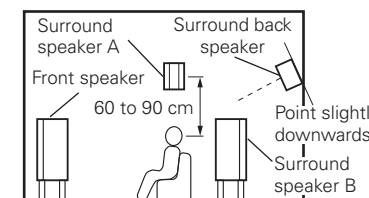

[As seen from the side]

##### ③ When playing movies and music

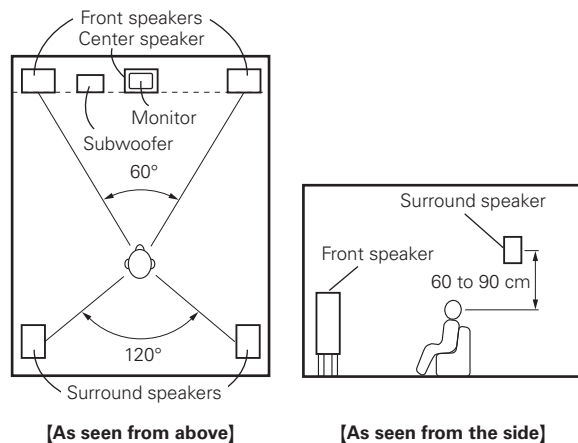

[As seen from above]

[As seen from the side]

## [2] When not using surround back speakers

## Surround

The AVR-3808 is equipped with a digital signal processing circuit that lets you play program sources in the surround mode to achieve the same sense of presence as in a movie theater.

## Dolby Surround

### Dolby Digital

Dolby Digital is a multi-channel digital signal format developed by Dolby Laboratories.

A total of 5.1-channels are played: 3 front channels ("FL", "FR" and "C"), 2 surround channels ("SL" and "SR") and the "LFE" channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a "three-dimensional" feeling (sense of distance, movement and positioning) is achieved.

A real, overpowering sense of presence is achieved when playing movie sources in AV rooms as well.

### Dolby Digital Plus

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1-channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback equipment.

## Dolby TrueHD

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format is compatible with a maximum sampling frequency of 96 kHz and up to 7.1-channels, so it is used for applications particularly prioritizing sound quality.

## Dolby Pro Logic II

Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5-channels to achieve an excellent surround effect.

The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

## Dolby Pro Logic IIx

Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology.

Audio signals recorded in 2-channels are decoded to achieve a natural sound with up to 7.1-channels.

There are 3 modes: "Music" suited for playing music, "Cinema" suited for playing movies, and "Game" which is optimized for playing games.

### ※ Sources recorded in Dolby Surround

Sources recorded in Dolby Surround are indicated with the following logo marks.

Dolby Surround support mark : 

Manufactured under license from Dolby Laboratories.

"Dolby", "Pro Logic" and the double-D symbol are trademarks of Dolby Laboratories.

## DTS Surround

### DTS Digital Surround

DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1-channels of digital discrete surround sound.

### DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1-channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

### DTS-HD Master Audio

DTS-HD Master Audio is DTS, Inc.'s lossless audio format compatible with up to 96 kHz/7.1-channels. The lossless audio coding technology faithfully reproduces the sound of the studio master. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

### DTS-ES™ Discrete 6.1

DTS-ES™ Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

### DTS-ES™ Matrix 6.1

DTS-ES™ Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

### DTS NEO:6™ Surround

DTS NEO:6™ is a matrix decoding technology for achieving 6.1-channel surround playback with 2-channel sources. It includes "DTS NEO:6 CINEMA" suited for playing movies and "DTS NEO:6 MUSIC" suited for playing music.

## DTS 96/24

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1-channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

Manufactured under license under U.S. Patent #'s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,226,616; 6,487,535 & other U.S. and worldwide patents issued & pending. DTS is a registered trademark and the DTS logos, Symbol, DTS-HD and DTS-HD Master Audio are trademarks of DTS, Inc.© 1996-2007 DTS, Inc. All Rights Reserved.

## Audyssey MultEQ® XT

Audyssey MultEQ® XT is the first technology to properly measure sound information throughout a listening area, then combine this information to accurately represent the acoustical problems in the room. Based on these measurements, MultEQ XT calculates an equalization solution that corrects for both time and frequency response problems in every seat.

Audyssey MultEQ XT not only corrects frequency response problem in a large listening area, it also performs a fully automated surround system setup.

For a detailed description, see page 25.

Audyssey MultEQ® XT is a trademark of Audyssey Laboratories. It is licensed under U.S. and National Patent Applications 20030235318 and 10/700,220. Additional U.S. and Foreign Patents pending. MultEQ XT and the Audyssey MultEQ XT logo are trademarks of Audyssey Laboratories, Inc. All rights reserved.

## HDCD® (High Definition Compatible Digital®)

HDCD® is an encoding/decoding technology that greatly reduces the distortion that occurs upon digital recording while maintaining compatibility with the conventional CD format, thus expanding the dynamic range and achieving a high resolution.

Conventional CDs and HDCD compatible CDs are identified automatically to select the optimum digital processing.

HDCD®, HDCD®, High Definition Compatible Digital® and Microsoft® are either registered trademarks or trademarks of Microsoft Corporation, Inc. in the United States and/or other countries. HDCD system manufactured under license from Microsoft Corporation, Inc. This product is covered by one or more of the following: In the USA: 5,479,168, 5,638,074, 5,640,161, 5,808,574, 5,838,274, 5,854,600, 5,864,311, 5,872,531, and in Australia: 669114. Other patents pending.

## DENON LINK

DENON LINK is a unique digital, balanced transfer type interface developed by DENON. It offers high speed, high quality transfer of digital audio data with low signal loss. It can be used together with DENON DVD players equipped with a special DENON LINK connector using a single cable to enable playback with high sound quality.

It allows digital transfer of the 192 kHz/24 bit 2-channel digital signals of DVD-Audio discs, PCM multi-channel signals, etc. Full-spec digital transfer of the audio contents of Super Audio CD is possible by connecting a player equipped for DENON LINK 3rd Edition.

## AL24 Processing Plus

### AL24 Processing for All Channels

DENON has further developed its proprietary AL24 Processing, an analog waveform reproduction technology, to support the 192 kHz sampling frequency of DVD-Audio. AL24 Processing Plus, thoroughly suppresses quantization noise associated with D/A conversion of LPCM signals to reproduce the low-level signals with optimum clarity that will bring out all the delicate nuances of the music.

Equipped for not only front left and right channels but also for the surround left and right, center and subwoofer channels.

## HDMI (High-Definition Multimedia Interface)

HDMI is a digital interface standard for next generation TVs based on DVI (Digital Visual Interface) standards and optimized for use in consumer equipment.

Non-compressed digital video and multi-channel audio signals are transmitted with a single connection.

HDMI is also compatible with HDCP (High-bandwidth Digital Contents Protection), a technology for protecting copyrights that encrypts digital video signals in the same way as with DVI.

### Deep Color

Eliminates on-screen color banding, for smooth tonal transitions and subtle gradations between colors.

Enables increased contrast ratio.

Can represent many times more shades of gray between black and white.

At 30-bit pixel depth, a four times improvement would be the minimum, and the typical improvement would be eight times or more.

### xvYCC

Next-generation "xvYCC" color space supports 1.8 times as many colors as existing HDTV signals.

Lets HDTVs display colors more accurately.

Enables displays with natural, vivid colors.

### Lip Sync

Because consumer electronics devices are using increasingly complex digital signal processing to enhance the clarity and detail of the content, synchronization of video and audio in user devices has become a greater challenge and could potentially require complex end-user adjustments. HDMI 1.3 incorporates an automatic video/audio synching capability that allows devices to perform this synchronization automatically with total accuracy.

"HDMI", "HDMI logo" and "High-Definition Multimedia Interface" are trademarks or registered trademarks of HDMI Licensing LLC.

About Networks

Windows Media Player ver. 11

This is a media player distributed free of charge by Microsoft Corporation.  
It can be used to play playlists created with Windows Media Player ver. 11 as well as files in such formats as WMA, DRM WMA, MP3 and WAV.

vTuner

This is a free online contents server for Internet radio. Note that usage fees are included in upgrade costs.  
For inquiries about this service, visit the vTuner site below.  
vTuner website: <http://www.radiodenon.com>

This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.

DLNA

- DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance.
- Some contents may not be compatible with other DLNA CERTIFIED™ products.

Windows Media DRM

- A copyright-protected technology developed by Microsoft.
- Windows Vista and the Windows logo are trademarks of the Microsoft group of companies.
  - The PlaysForSure logo, Windows Media and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.
  - Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

○ : Signal present

× : No signal

480p ~ 720p : 480p / 576p / 1080i / 720p

× : No output

\*1 : The "Picture Adjust" setting can be made.

\*2 : Superimposed over video signal

\*3 : Only displayed when the **MENU** button is pressed

\*4 : If the input signal is in SECAM format, it is converted to PAL for output

※ : Output according to "Resolution" setting (i/p Scaler : When "A to H" is set) (page 30).

■ : Wallpaper or set background color displayed

■ : Output according to "Resolution" setting (i/p Scaler : When "H to H" is set) (page 30).

■ : GUI menu not displayed

- The main zone video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4,43, PAL -N, PAL -M and PAL -60.
- When SECAM signals of video input are up-converted, the signals are output in PAL format from the S-Video connector.
- If the input signal is a component 1080p signal, up-converting to HDMI is not possible.
- The GUI menu display cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g. VGA) are input.

# Troubleshooting

If a problem should arise, first check the following:

1. Are the connections correct?

2. Is the set being operated as described in the owner's manual?

3. Are the other components operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.

## [General]

Symptom	Cause	Countermeasure	Page
Power does not turn on, or turns off directly after it was turned on.	<ul style="list-style-type: none"> <li>Connection of the power cord is faulty.</li> </ul>	<ul style="list-style-type: none"> <li>Check that the power plugs are securely inserted into the AVR-3808's AC inlet and the wall power outlet.</li> </ul>	22
No sound is produced from speakers.	<ul style="list-style-type: none"> <li>Connection with the input devices or connection of the speaker cables is faulty.</li> <li>Device you want to play and set input source do not match.</li> <li>Master volume is turned too low.</li> <li>Mute mode is set.</li> <li>Headphones are connected.</li> <li>No digital signals are being input.</li> <li>The connectors to which the digital inputs are assigned and the settable input modes do not match.</li> </ul>	<ul style="list-style-type: none"> <li>Check the connections.</li> <li>Select an appropriate input source.</li> <li>Adjust the master volume to an appropriate level.</li> <li>Cancel the mute mode.</li> <li>Disconnect the headphones.</li> <li>Select an input source for which the digital input setting has been made.</li> <li>Set the input mode.</li> </ul>	9 37 47 47 39 39
Display is off.	<ul style="list-style-type: none"> <li>The "Dimmer" setting is set to "OFF".</li> <li>The PURE DIRECT mode is set.</li> </ul>	<ul style="list-style-type: none"> <li>Set to something other than "OFF".</li> <li>Set a surround mode other than the PURE DIRECT mode.</li> </ul>	35 40, 41
"DOLBY DIGITAL" indicator does not appear on display.	<ul style="list-style-type: none"> <li>DVD player's digital audio output setting is not proper.</li> </ul>	<ul style="list-style-type: none"> <li>Check the DVD player's audio output setting. For details, read the DVD player's operating instructions.</li> </ul>	—

Symptom	Cause	Countermeasure	Page
Power turns off suddenly and power indicator flashes red.	<ul style="list-style-type: none"> <li>Protection circuit activated due to rise of internal temperature.</li> </ul>	<ul style="list-style-type: none"> <li>Turn off the power, wait for the set to fully cool down, then turn the power back on.</li> </ul>	10
	<ul style="list-style-type: none"> <li>Core wires of two speakers are touching each other or a core wire is sticking out of the terminal and touching the set's rear panel, activating the protection circuit.</li> </ul>	<ul style="list-style-type: none"> <li>Place the set in a well-ventilated place.</li> </ul>	10
	<ul style="list-style-type: none"> <li>Speakers with an impedance other than specified are being used.</li> </ul>	<ul style="list-style-type: none"> <li>First unplug the power cord, then twist the core wires tightly or terminate the speaker cables, then reconnect.</li> </ul>	10
	<ul style="list-style-type: none"> <li>Set is damaged.</li> </ul>	<ul style="list-style-type: none"> <li>Use speakers with the specified impedance.</li> <li>Turn off the power and contact a DENON service center.</li> </ul>	10 —

## [Remote Control Unit]

Symptom	Cause	Countermeasure	Page
Set does not work properly when remote control unit operated.	<ul style="list-style-type: none"> <li>Batteries are worn.</li> </ul>	<ul style="list-style-type: none"> <li>Replace with new batteries.</li> </ul>	3
	<ul style="list-style-type: none"> <li>You are operating outside of the specified range.</li> </ul>	<ul style="list-style-type: none"> <li>Operate within the specified range.</li> </ul>	3

	<ul style="list-style-type: none"> <li>The set's remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.).</li> </ul>	<ul style="list-style-type: none"> <li>Move the set to a place in which the remote control sensor will not be exposed to strong light.</li> </ul>	3
	<ul style="list-style-type: none"> <li>The remote ID of the main unit and remote control unit do not match.</li> </ul>	<ul style="list-style-type: none"> <li>Set the same remote IDs for the main unit and remote control unit.</li> </ul>	35, 63

[Audio]

Symptom	Cause	Countermeasure	Page
No sound is produced from center speaker.	• You are playing a monaural source (TV, AM radio broadcast, etc.) in the STANDARD mode.	• The mode is set to something other than "STANDARD".	41
No sound is produced from surround speakers.	• The surround mode is set to "STEREO", "DIRECT" or "PURE DIRECT".	• Set to a surround playback mode.	40, 41
No sound is produced from surround back speaker.	• The surround back speaker's power amplifier is assigned to a different channel. • Surround back speaker setting is set to "None". • Surround mode not set to a mode for 6.1- or 7.1-channel playback.	• Check the setting and change it as necessary. • Set to something other than "None". • Select a surround playback mode.	28 28 40, 41
No sound is produced from subwoofer.	• Subwoofer's power not turned on. • The "Subwoofer" setting at "Speaker configuration" is set to "No". • The subwoofer is not properly connected. • The subwoofer's volume is turned off.	• Turn on the subwoofer's power. • Set to "Yes". • Check the connections. • Adjust the subwoofer's volume to an appropriate level.	– 28 9 59
No test tones are produced when main remote control unit's <b>TEST TONE</b> button is pressed.	• Surround mode not set to "STANDARD".	• Set to the STANDARD mode.	40
DTS sound is not output.	• DVD player's audio output setting is not set to bitstream. • DVD player is not compatible with DTS sound playback. • The AVR-3808's "Decode Mode" setting is set to "PCM".	• Set the DVD player. For details, refer to the DVD player's operating instructions. • Use a DTS-compatible player. • Set to the "Auto" or DTS mode.	– – 38
HDMI audio signals are not output from speakers.	• The "Manual Setup" – "HDMI Setup" – "Audio" setting is set to "TV".	• Set to "Amp".	30

Symptom	Cause	Countermeasure	Page
No sound is output from the monitor connected with HDMI connections.	• The "Manual Setup" – "HDMI Setup" – "Audio" setting is set to "Amp".	• Set to "TV".	30

[Video]

Symptom	Cause	Countermeasure	Page
The on-screen display does not appear.	• The format of the GUI and TV (PAL or NTSC) do not match.	• Match the format of the GUI and TV.	34
No picture appears.	• The connections between the AVR-3808 and monitor are faulty. • The monitor's input setting is wrong. • PURE DIRECT mode is set. • The player is connected using the component input connectors, the monitor is connected using the video (yellow) or S-Video output connectors.	• Check the connections. • Set properly. • Cancel the PURE DIRECT mode. • High definition (1080i/720p) and progressive (480p/576p) video signals are not down-converted. Set the player to interlace (480i/576i) signals.	11 ~ 22 – 40, 41 –
No picture appears with HDMI connections.	• The connections to the HDMI connectors are faulty. • HDMI input setting is improper. • The monitor is not compatible with copyright protection (HDCP). • The HDMI format of the player and monitor do not match.	• Check the connections. • Check the HDMI input setting. • Connect a monitor that is compatible with copyright protection (HDCP). • Match the HDMI format of the player and monitor.	11 39 11 11
Picture cannot be recorded.	• Input source does not match recorder's video connection connector (video or S-Video).	• The video conversion function does not work for the REC OUT connectors. Match the input source and recorder connections.	15
DVDs cannot be copied on a VCR.	–	• This is not a malfunction. Most movie software includes copy prevention signals and cannot be copied.	–

## [iPod]

Symptom	Cause	Countermeasure	Page
iPod cannot be played.	<ul style="list-style-type: none"> <li>The input source assigned to "iPod dock" is not selected.</li> <li>Cable is not properly connected.</li> <li>Control Dock for iPod's AC adapter is not connected to power outlet.</li> </ul>	Switch to the input source assigned at "iPod dock".	39
		Reconnect.	13
		Plug the Control Dock for iPod's AC adapter into a power outlet.	–

## [NET/USB]

Symptom	Cause	Countermeasure	Page
When a USB memory device is connected, "USB" is not displayed on the GUI menu.	<ul style="list-style-type: none"> <li>The set cannot recognize a USB memory device.</li> <li>A USB memory device not conforming to mass storage class or MTP standards is connected.</li> <li>The set port and the connected port do not match.</li> <li>A USB memory device that the set cannot recognize is connected.</li> <li>USB memory device is connected via USB hub.</li> </ul>	Check the connection.	18
		Connect a USB memory device conforming to mass storage class or MTP standards.	–
		Connect to the port set at "USB Select".	40
		This is not a malfunction. DENON does not guarantee that all USB memory devices will operate or receive power.	–
Files on a USB memory device cannot be played.	<ul style="list-style-type: none"> <li>USB memory device is in format other than FAT16 or FAT32.</li> <li>USB memory device is divided into multiple partitions.</li> <li>Files are stored in a non-compatible format.</li> <li>You are attempting to play a file that is copyright protected.</li> </ul>	Connect the USB memory device directly to the USB port.	–
		Set the format to FAT16 or FAT32. For details, refer to the USB memory device's operating instructions.	–
		When divided into multiple partitions, only files stored in the top partition can be played.	–
		Record the files in a compatible format.	53
The file names are not displayed properly ("...", etc.).	<ul style="list-style-type: none"> <li>Characters that cannot be displayed are used.</li> </ul>	Files that are copyright protected cannot be played on this set.	53
		This is not a malfunction. On this set, characters that cannot be displayed are replaced with a " . (period)".	–

Symptom	Cause	Countermeasure	Page
Internet radio cannot be played.	<ul style="list-style-type: none"> <li>Ethernet cable is not properly connected or network is disconnected.</li> <li>Program is being broadcast in non-compatible format.</li> <li>The computer's or router's firewall is activated.</li> <li>Radio station is not currently broadcasting.</li> <li>IP address is wrong.</li> </ul>	Check the connection status.	20
		Only Internet radio programs in MP3 and WMA can be played on this set.	53
		Check the computer's or router's firewall settings.	–
		Choose a radio station that is currently broadcasting.	54
Files stored on a computer cannot be played.	<ul style="list-style-type: none"> <li>Files are stored in a non-compatible format.</li> <li>You are attempting to play a file that is copyright protected.</li> <li>Set and computer are connected by USB cable.</li> </ul>	Check the set's IP address.	33
		Record in a compatible format.	53
		Files that are copyright protected cannot be played on this set.	53
		The set's USB port cannot be used for connection to a computer.	–
Server is not found, or it is not possible to connect to the server.	<ul style="list-style-type: none"> <li>The computer's or router's firewall is activated.</li> <li>Computer's power is not turned on.</li> <li>Server is not running.</li> <li>Set's IP address is wrong.</li> </ul>	Check the computer's or router's firewall settings.	–
		Turn on the power.	–
		Launch the server.	–
		Check the set's IP address.	32, 33
Cannot connect to preset or favorite radio stations.	<ul style="list-style-type: none"> <li>Radio station is not currently broadcasting.</li> <li>Radio station is not currently in service.</li> </ul>	Wait a while before trying again.	–
		It is not possible to connect to radio stations that are no longer in service.	–
For some radio stations, "Server Full" or "Connection Down" is displayed and station cannot be connected to.	Station is congested or not currently broadcasting.	Wait a while before trying again.	–
Sound is broken during playback.	Network's signal transfer speed is slow or communications lines or radio station is congested.	This is not a malfunction. When playing broadcast data with a high bit rate, the sound may be broken, depending on the communications conditions.	–
Sound quality is poor or played sound is noisy.	File being played has a low bit rate.	This is not a malfunction.	–

Specifications

Audio section

- Power amplifier  
Rated output:  
Front:  
130 W + 130 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)  
160 W + 160 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)  
Center:  
130 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)  
160 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)  
Surround (A + B):  
130 W + 130 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)  
160 W + 160 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)  
Surround back:  
130 W + 130 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)  
160 W + 160 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)  
140 W x 2ch (8 Ω/ohms)  
210 W x 2ch (4 Ω/ohms)  
Dynamic power:  
Output connectors:  
Front, Center, Surround back 6 ~ 16 Ω/ohms  
Surround: A or B 6 ~ 16 Ω/ohms  
A + B 8 ~ 16 Ω/ohms
- Analog  
Input sensitivity / Input impedance: 200 mV / 47 kΩ/kohms  
Frequency response: 10 Hz ~ 100 kHz — +1, -3 dB (DIRECT mode)  
S/N: 102 dB (DIRECT mode)  
Distortion: 0.005 % (20 Hz ~ 20 kHz) (DIRECT mode)  
Rated output: 1.2 V
- Digital  
D/A output:  
Rated output — 2 V (at 0 dB playback)  
Total harmonic distortion — 0.008 % (1 kHz, at 0 dB)  
S/N ratio — 102 dB  
Dynamic range — 96 dB  
Format — Digital audio interface
- Digital input:
- Phono equalizer (PHONO input — REC OUT)  
Input sensitivity: 2.5 mV  
RIAA deviation: ±1 dB (20 Hz to 20 kHz)  
S/N: 74 dB (A weighting, with 5 mV input)  
Rated output: 150 mV  
Distortion factor: 0.03 % (1 kHz, 3 V)

Video section

- Standard video connectors  
Input / output level and impedance: 1 Vp-p, 75 Ω/ohms  
Frequency response: 5 Hz ~ 10 MHz — +0, -3 dB (when video convert set to “OFF”)
- S-Video connectors  
Input / output level and impedance: Y (brightness) signal — 1 Vp-p, 75 Ω/ohms  
C (color) signal — 0.3 (PAL) / 0.286 (NTSC) Vp-p, 75 Ω/ohms  
5 Hz ~ 10 MHz — +0, -3 dB (when video convert set to “OFF”)  
Frequency response:
- Color component video connector  
Input / output level and impedance: Y (brightness) signal — 1 Vp-p, 75 Ω/ohms  
P<sub>B</sub> / C<sub>B</sub> signal — 0.7 Vp-p, 75 Ω/ohms  
P<sub>R</sub> / C<sub>R</sub> signal — 0.7 Vp-p, 75 Ω/ohms  
5 Hz ~ 100 MHz — +0, -3 dB (when video convert set to “OFF”)  
Frequency response:

Tuner section

	[FM]	[AM]
	(note: μV at 75 Ω/ohms, 0 dBf = 1 x 10 <sup>-15</sup> W)	
Receiving Range:	87.5 MHz ~ 108.0 MHz	522 kHz ~ 1611 kHz
Usable Sensitivity:	1.0 μV (11.2 dBf)	18 μV
50 dB Quieting Sensitivity:	MONO 1.6 μV (15.3 dBf) STEREO 23 μV (38.5 dBf)	
S/N (IHF-A):	MONO 77 dB STEREO 72 dB	
Total harmonic Distortion (at 1 kHz):	MONO 0.15 % STEREO 0.3 %	

General

- Power supply: AC 230 V, 50 Hz  
Power consumption: 550 W  
0.3 W (Standby)  
Maximum external dimensions: 434 (W) x 171 (H) x 420 (D) mm  
Mass: 17.8 kg

Main remote control unit (RC-1068)

- Batteries: LR6/AA Type (two batteries)  
Maximum external dimensions: 63 (W) x 238 (H) x 31 (D) mm  
Mass: 190 g (including batteries)

Sub remote control unit (RC-1070)

- Batteries: R03/AAA Type (two batteries)  
Maximum external dimensions: 49 (W) x 220 (H) x 24.5 (D) mm  
Mass: 114 g (including batteries)
